GRADUATE STATUS REPORT

Introduction

Comparatively speaking, “What a difference a year makes.” That statement was made over and over during the last six months of the 2000-2001 academic year. It reflected the reality faced by the 2000-2001 graduating class when making preparations for entering the job market. Shortly after the turn of the calendar year, January 2001, employers began the painful process of cutting back on scheduled interview dates, placing job offers on hold, extending reporting dates for 3, 6 and 9 months, and in some extreme cases, withdrawing offers altogether. In March 2001, national economists formally declared what the graduating class had already suspected, our nation was falling into a recession.

Hardest hit: high technology industries. Few escaped. Over the years, these industries have represented major, significant employers of Cal Poly graduates. California was particularly vulnerable in its northern Silicon Valley where closures, downsizing, and hiring freezes replaced the robust, frenzied hiring of the previous years. With the state’s economy so dependent on the success of its high tech industry, the downturn rippled outward to other industries with varying degrees of impact. Those heavily reliant on high tech were obviously more impacted than others. With this as a backdrop, we now turn to what the 2000-2001 graduates reported in the annual survey.

Graduate Status 2000-2001 Graduates

As expected, Cal Poly graduates were not insulated from the downturn. The combined statistics of those reporting full time employment and those entering a professional or graduate school slipped from a previous year’s high of 96% to **93%**. Those reporting full time employment dropped from 78% the previous year to 74%; professional and graduate school percentages rose slightly from 18% to 19%. Both are typical in an economy such as this and one can easily pick out the cycles when reviewing the 10 year Comparison Chart:

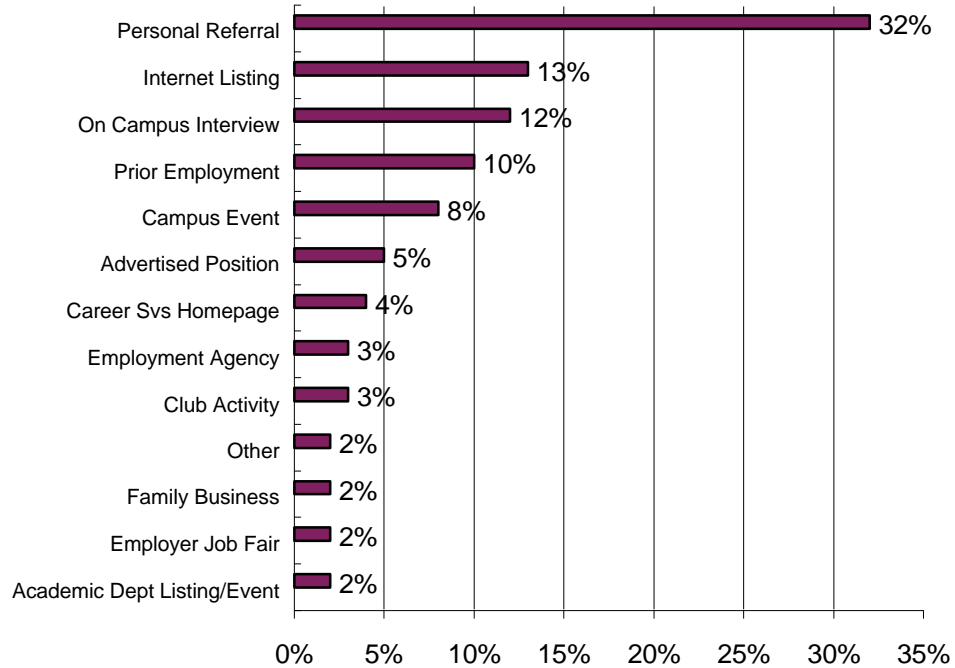

Year	Graduates	Respondents	Employed		Graduate School	Seeking Employment		Other					
			Full-time	Part-time									
2000-01	3230	1754	54%	1306	74%	47	3%	339	19%	41	2%	21	1%
1999-00	3966	2318	58%	1798	78%	44	2%	425	18%	36	2%	15	1%
1998-99	3648	1991	55%	1525	77%	43	2%	394	20%	17	1%	12	1%
1997-98	3440	1989	58%	1534	77%	53	3%	364	18%	21	1%	17	1%
1996-97	3111	1834	59%	1427	78%	58	3%	293	16%	35	2%	21	1%
1995-96	3353	1925	57%	1479	77%	94	5%	298	15%	34	2%	20	1%
1994-95	3364	2142	64%	1627	76%	92	4%	330	15%	57	3%	36	2%
1993-94	3723	1907	51%	1369	72%	94	5%	357	19%	53	3%	34	2%
1992-93	3653	2170	59%	1518	70%	148	7%	364	17%	97	4%	43	2%
1991-92	3637	2184	60%	1538	70%	144	7%	347	16%	108	5%	47	2%

10 Year Comparison of Employment Status Information

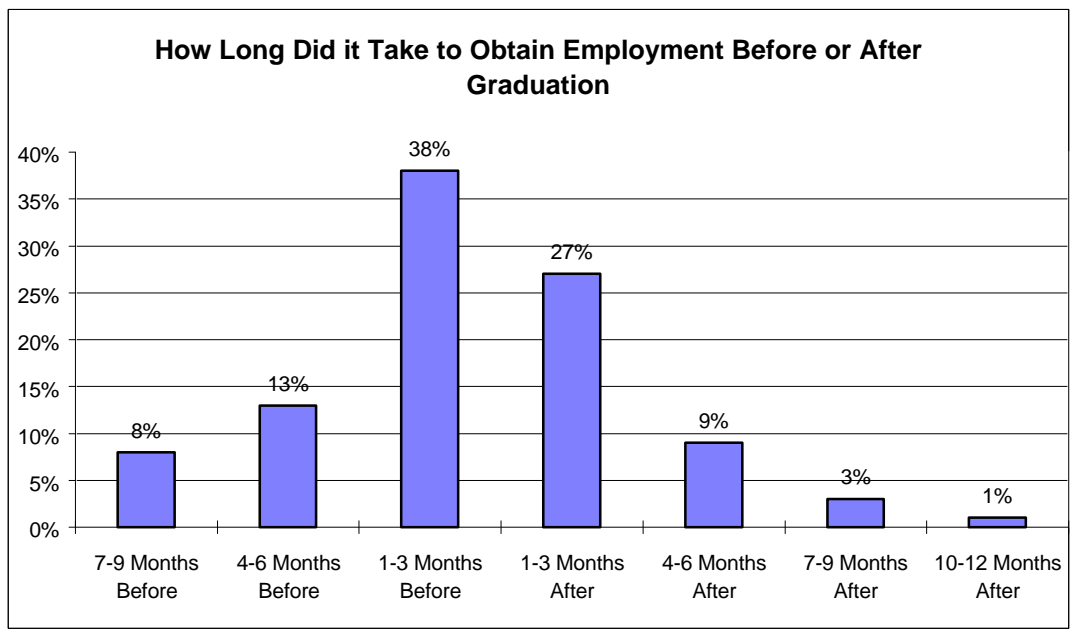

With traditional, student on campus interview activity dropping an unprecedented 34% over the previous year, one anticipated a much greater impact on graduates reporting full time employment. Over the past decade, specifically in the early 90’s, consecutive years of decline in campus interviewing saw a much greater impact on this statistic when it fell to 70%. Comparing the respective market conditions and the end result on graduates reporting full time employment, this year’s 74% figure is considered rather strong. Clearly graduates did not wait until employers came to them but employed

more assertive methods by following up on personal referrals, applying directly through employer website or internet listings and returning to previous summer or co-op employers. Career counseling sessions with the graduates stressed flexibility and creativity in the job search and taking initiative and responsibility for making the contact. This is not new counsel but it became particularly relevant for the 2000-2001 class.

Source of Initial Contact With Current Employer

One of the more striking characteristics of this year’s class was the “Length of Time Before Obtaining Employment” statistic. In the previous year, 51% of the graduates reported obtaining employment prior to graduation, which mirrored the national average. While no comparative national data is available, of those 2000-2001 graduates reporting employment, 59% said they obtained their employment prior to graduation. Many inferences can be drawn from this higher percentage, but probably the most logical is the graduates’ awareness that the multiple offers of the past were just that, in the past. No need to wait if the offer on the table was acceptable and satisfied the majority of the factors graduates considered in making their decision.

For the most part, salary offers continued to acknowledge the value of the high tech majors, in spite of the softening economy. Some increases were considerably higher, specifically the Engineering and Computer-related majors, while others either kept pace with previous years or reflected only modest increases. The campus-wide, median salary reported was \$3,350/month or \$40,200 annual, a 3% increase over the previous year. Top undergraduate median salary reported was Computer Science at \$5,267/month or \$63,204 annual, a 9% increase over the previous year. The two Colleges from which the highest reported number of graduates went on to a professional or graduate school were the College of Liberal Arts (43%) and the College of Science and Mathematics (40%).

Overall, the 2000-2001 graduates faced a much softer market than their classmates in recent years. The downturn in the high tech industry caught most of the media's attention and fueled uncertainty in other segments of the economy. Brighter spots, as reported nationally, included Education, Federal Government employment, Accounting Services, Social and Health-related Services, and modest gains in the energy related sector. It is only anecdotal observation, but the highly aggressive recruiting activity and the multiple offers and signing bonuses of previous years took a back seat to a much more cautious approach to hiring new college graduates. As a class, the 2000-2001 graduates made the adjustments, used all resources available and can be described as successful in their pursuit of their career plans.

For a more detailed review of the survey results for the 2000-2001 class, you are encouraged to turn to the Synopsis and body of the report. The Career Services staff is pleased to present this report in cooperation with the six academic colleges and the UCTE. It is believed to be the most comprehensive report of its kind for the campus and hopefully is used by high school and community college counselors, campus outreach staff, advising center staff, advancement officers, and anyone else connected with the career planning and decision-making process for current or prospective students. A special thanks, once again, to Shel Burrell and Mary Milosevic from Career Services who served as co-coordinators of the report.

Comments, questions and suggestions are welcome. This report may also be viewed on line through the Career Services web site: <http://www.careerservices.calpoly.edu/Students/CareerPlanning/gsr.htm>
