# GRADUATE STATUS REPORT

## Introduction

With 92% of the survey respondents reporting Full-time Employment or attending Graduate School as their primary activity following graduation, one can conclude that Cal Poly's 2001-2002 graduates responded to the downturn in the economy in the only way they possibly could, they adjusted. A close look at the mix of these two categories reveals a record low percentage for those reporting Full-time Employment (68%) and a record high percentage for those reporting Graduate School (24%); a significant shift in response to a stubborn economy. By comparison, it is interesting to note that when both figures are combined for this class they are well above the combined percentages reported during the last major downturn in the early 1990's. Who can say whether this graduating class rejected the employment search from the outset and decided to ride out the soft market in graduate school or whether there was a major shift in interest level. One thing is for sure, the 2001-2002 graduates, faced with unprecedented market conditions, responded with great perseverance and flexibility and are well on their way to pursuing their career goals.

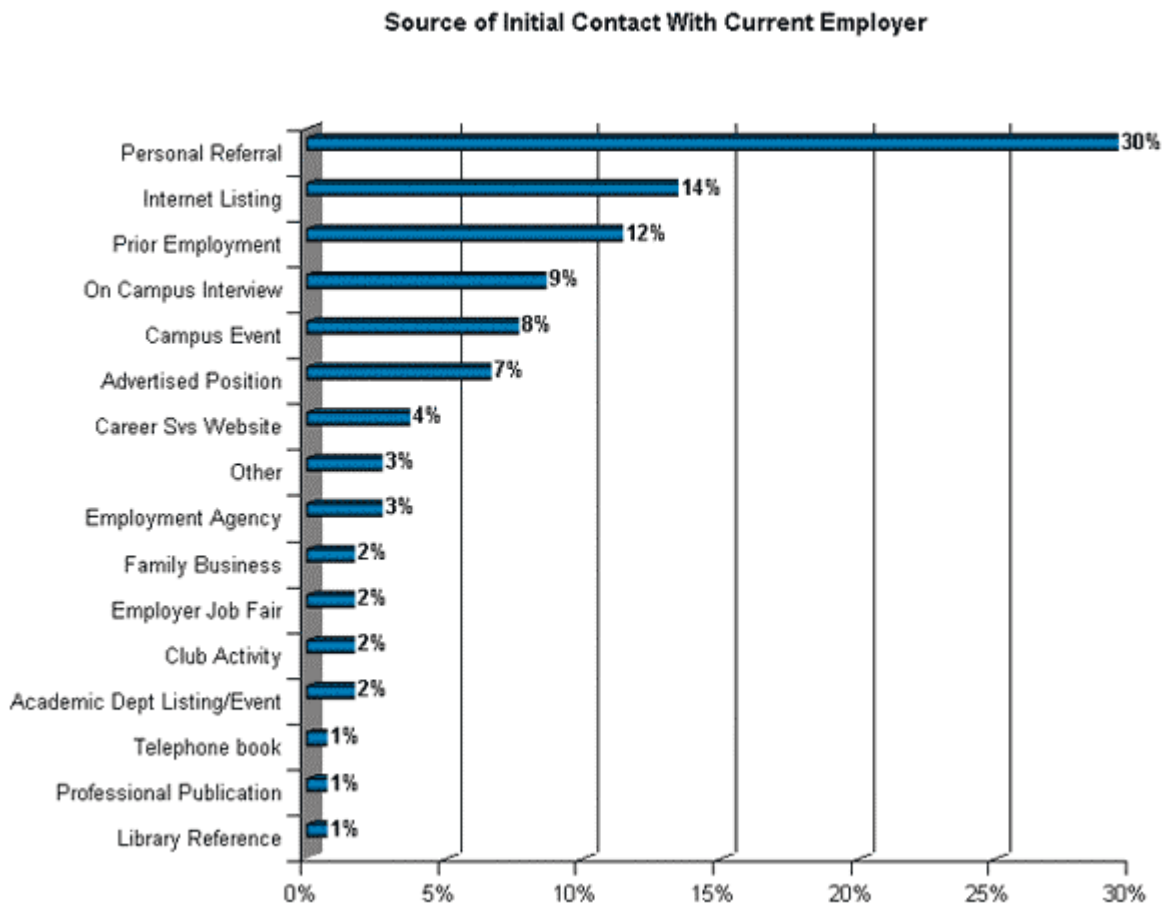

Year	Graduates	Respondents	Employed Full-time	Employed Part-time	Graduate School	Seeking Employment	Other						
2001-02	3995	2090	53%	1419	68%	58	3%	512	24%	68	3%	33	2%
2000-01	3230	1750	54%	1302	74%	47	3%	339	19%	41	2%	21	1%
1999-00	3966	2318	58%	1798	78%	44	2%	425	18%	36	2%	15	1%
1998-99	3648	1991	55%	1525	77%	43	2%	394	20%	17	1%	12	1%
1997-98	3440	1989	58%	1534	77%	53	3%	364	18%	21	1%	17	1%

1992-93	3653	2170	59%	1518	70%	148	7%	364	17%	97	4%	43	2%

### 10 Year Comparison of Graduate Status Information

For the second year in a row high technology industries took the hardest hit. With the California economy so highly dependent on the success of this industry, its persistent sluggishness continued to ripple through other sectors of the market. While there were fewer announcements of closures and major layoffs, employers remained reluctant to add to their workforce in any significant numbers, choosing only to hire and fill in behind retirements or unplanned vacancies rather than company expansion and growth. One bright spot for this year's graduates was in the building and design industry where employers capitalized on a backlog of

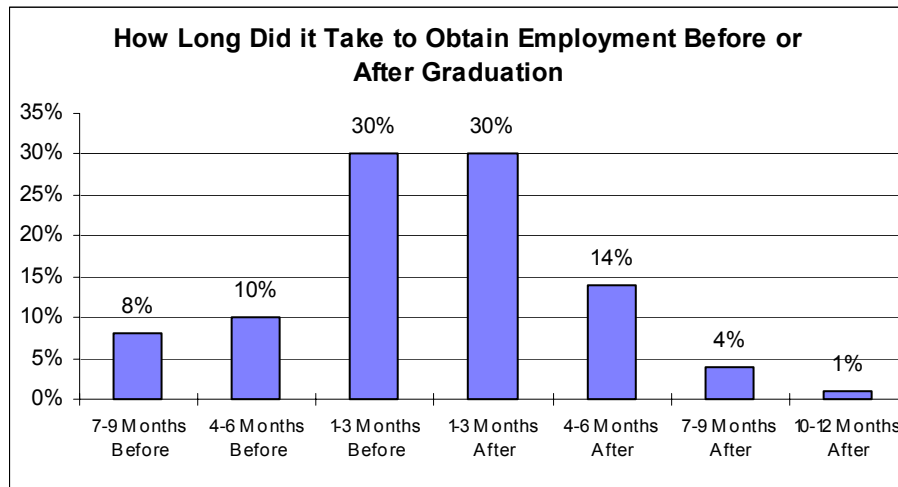

orders and the continual slide of interest rates. Hiring in design and construction was brisk, particularly on the residential side. Accounting and Finance majors also reported strong figures for full-time employment.

With employers' presence on campus declining in proportion to the downturn in the economy, graduates relied heavily on networking through personal contacts, prior employers and the use of technology to obtain their current employment. As the following chart reveals, well over 50% of the graduates reporting full-time employment identified these three methods as their initial source of contact with their current employer. These methods of hiring and recruitment are typical for small to medium size employers, clearly a major source of employment opportunities for the 2001-2002 class.

According to surveys, a higher percentage of graduates took longer to find employment than graduates over the previous two years. While 92% of the graduates reported finding employment within six months following graduation, a smaller percentage of graduates (48%) reported obtaining employment prior to graduation. Percentages for the past two years were 58% and 51% respectively. This is not unusual given the market conditions but is an indication of the difficulty this class endured.

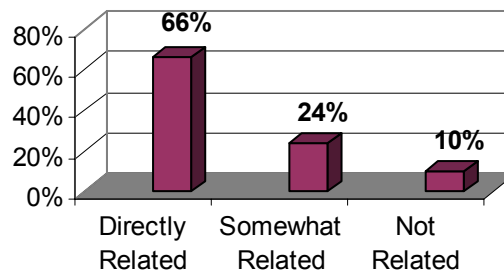

One characteristic about this class that was consistent with their peers of the previous two years was the desirability of their preparation in their respective majors. When asked whether their current position was directly or somewhat related to their major, 90% reported that it was, leaving 10% working outside their major field of study. With much more competitive market conditions facing them, this year's Cal Poly graduates continued to prevail in their efforts to secure employment related to their major.

“It’s not all about money” is a phrase by career counselors when helping with their decisions. It is intended to students balance all factors before a decision. For this graduating class, it was another dose of reality. Not only did the employment market impact the employment opportunities, it also impacted the level of salary offers. After a 5% annual increase in past salary levels went in the other direction for 2001-2002 graduates. As it

turned out, all six colleges and the University Center for Teacher Education reported median salary figures below 2000-2001 levels. The campus median salary came in at \$39,000 compared to \$40,200 for the previous year. Computer Science majors recorded the highest median salary at \$60,000/annual but that, too, was down from \$63,204. Helping to establish the highest campus percentage of graduates reporting Graduate School, College of Science and Mathematics (45%) and College of Liberal Arts (40%) once again led the way in this category.

### Extent Job is Related to Major

often used students help making a decision was also the number of impacted seeing 3 years, direction turned

Historically, downturns in the employment market tend to be cyclical. An adjustment generally can be seen every nine to ten years before rebounding to meet demand. What is unsettling for prospective graduates is not knowing how long the period of adjustment will take before the economy begins its rebound. So many factors contribute to the rebound with international markets having increased influence domestically in more recent years. Only time will tell when the market will once again be more top heavy on the demand side of the equation. Until then, as the class of 2001-2002 demonstrated in their response, Cal Poly graduates will continue to exercise good judgment, flexibility and perseverance in pursuit of their career goals. They are truly some of our nation’s brightest hopes for the future.

As a reminder to the reader, a more detailed review of the survey results for the 2001-2002 class can be found in the Synopsis and body of the report. The Career Services staff is pleased to present this report in cooperation with the six academic colleges and the University Center for Teacher Education. It is believed to be the most comprehensive report of its kind for the campus and is used by high school and community college counselors, campus outreach staff, advising center staff, advancement officers, and many others who are involved in the career planning and decision-making process for current and prospective students. A special thank you to Shel Burrell and Mary Milosevic from Career Services who serve as co-coordinators of the report.

Comments, questions, suggestions are welcome. This report may also be viewed on line through the Career Services web site:
