GRADUATE STATUS REPORT

Introduction

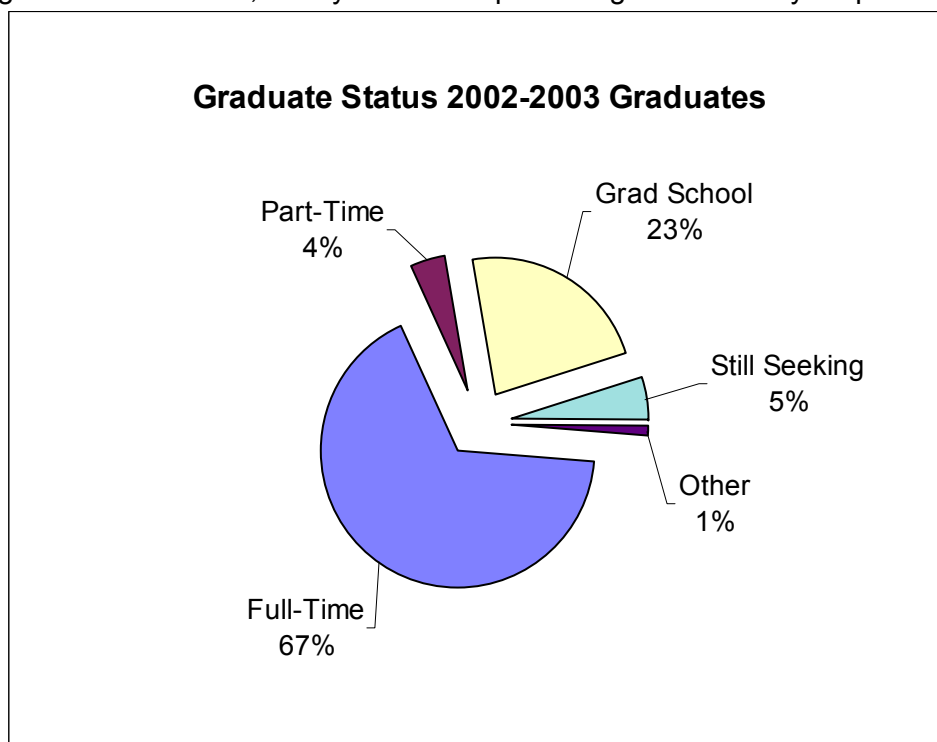

Career Services is pleased to present the following Cal Poly, San Luis Obispo 2002-2003 Graduate Status Report. This comprehensive report is the culmination of six months of survey distribution and collection, cross-checks with official graduation records, and data entry and compilation of nearly 2000 responses, 54% of the entire graduating class. The report that follows includes a report synopsis in chart form for quick reference, as well as detailed descriptions by college and major describing job titles, salary ranges, locations, and post graduate education activities.

Year	Graduates	Respondents		Employed Full-time		Employed Part-time		Graduate School		Seeking Employment		Other	
2002-03	3458	1867	54%	1254	67%	69	4%	436	23%	86	5%	22	1%
2001-02	3995	2090	53%	1419	68%	58	3%	512	24%	68	3%	33	2%
2000-01	3230	1750	54%	1302	74%	47	3%	339	19%	41	2%	21	1%
1999-00	3966	2318	58%	1798	78%	44	2%	425	18%	36	2%	15	1%

10 Year Comparison of Graduate Status Information

2002-2003 proved another difficult year for newly graduated students to enter the job market. As news reports indicated, the modest gains in the business climate did not necessarily translate to more job opportunities. In spite of the problematic economic climate, 90% of Cal Poly's graduates were either employed or enrolled in post-graduate education, a very consistent percentage over a ten year period.

The difference is in the higher percentage enrolled in post graduate education and a decline in the percentage that immediately enter the workforce. Four years ago 77 to 78% were employed immediately following graduation. That percentage is now 67 to 68%, with a corresponding increase in graduate school attendance. 5% were still seeking employment, a slightly higher percentage than previous years, but still a relatively small number. On the whole, Cal Poly graduates continue to be highly successful in reaching their career goals.

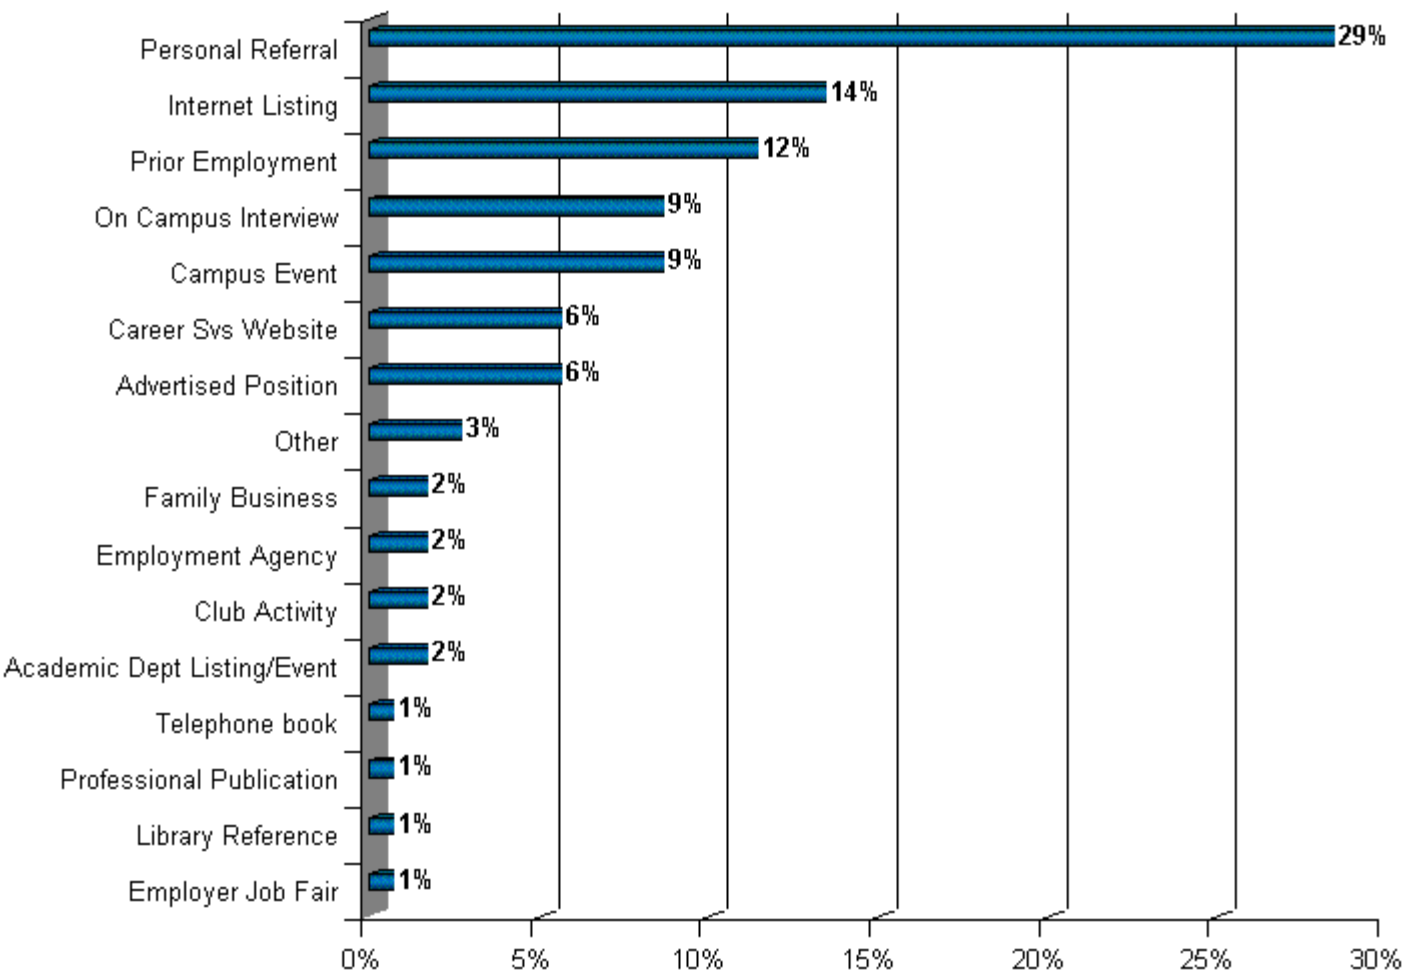

Colleges that traditionally have high graduate school participation, Science and Mathematics and Liberal Arts, continue the trend at about 40%. This percentage has been consistent for the past 10 years. The increases are in the applied programs of Engineering, Business, and Agriculture, all now indicating

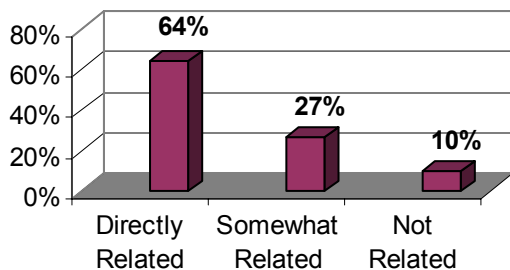

about 16% post-graduate educational activity level. For Engineering and Business this is more than double the graduate school participation level reported 4 years ago. Although one explanation for this increase would be the difficult job market, there are certainly other factors at work. Many fields now require a higher level of specialization and education and graduate education is a necessity for success. Interest in fields such as medicine, teaching, biotechnology and biomedical engineering, and law, which generally require post-graduate training, has increased. In response to higher student and industry demand for post-graduate education, Universities such as Cal Poly have developed more advanced degree options, which students are actively pursuing. It should also be noted that salary trend information, including that reported in this document, indicates that completing graduate degrees results in a significantly higher compensation levels.

The members of the 2002-2003 graduating class responded to the difficult employment market by utilizing a wide variety of job search contacts, indicated in the chart below.

Source of Initial Contact With Current Employer

Extent Job is Related to Major

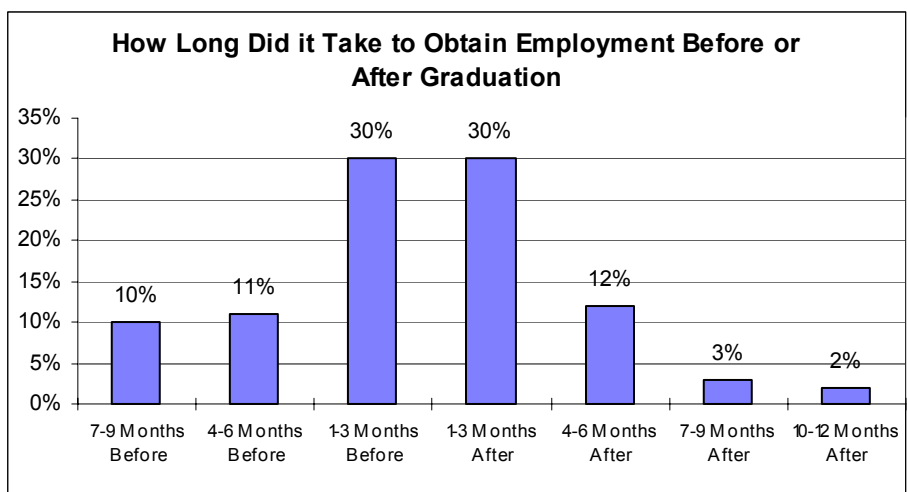

Networking and personal referral remain a major component of the successful job search, as does contact initiated through a summer, co-op, or internship experience. The use of technology such as internet listings, including Cal Poly's "Mustang Jobs" on-line job listing, interview scheduling, and job fair reporting resource (over 50% of graduates, including 84% of engineering

ssions, which could add significantly to dollar amounts.

graduates utilized this service), is steadily on the rise. Another significant resource is employment contacts made at campus job fairs such as the Fall and Spring Job Fairs and the annual Career Symposium, where thousands of students initiate contacts with hundreds of organizations. By utilizing a variety of resources and diversifying their job search methods, Cal Poly students continue to seek and obtain employment and graduate school opportunities that relate to their degree programs. 90% indicated that their post graduation activity was either directly related or somewhat related to their major.

81% of survey respondents reported having obtained employment by 3 months after graduation, with 51% of these obtaining employment prior to graduation. This is a few percentage points improvement over past year's length of job search. Only 5% took longer than 6 months past graduation to secure their employment.

Median salary also indicated some modest signs of gain. After actually falling last year, this year's median salary is up 2.5%. The highest "still seeking" percentage, 8%, was in the College of Engineering, indicating how hard the sluggish economy has been on the largest technology employers that were the traditional employers of these students. Job opportunities in the high technology fields are fewer and more competitive, although the highest median salaries for Bachelors degrees are still in Computer Engineering at \$58,350 and Computer Science at \$54,000. The campus median salary was \$40,000 annually, up from \$39,000 the previous year.

The Graduate Status Report is a collective effort, receiving support and input from all Cal Poly academic departments and the entire Career Services staff. This comprehensive report is used by high school and community college counselors, campus outreach staff, advising center staff, advancement officers, and many others who are involved in the career planning and decision-making process for current and prospective students. A special thank you goes to Mary Milosevic for her work in administering, compiling, and preparing the report and to Career Services intern Erica Williams for coordinating the data entry and compiling the job search advice provided for current students by the graduates. The results of her project can be found with the on-line version of the Graduate Status Report at:

<http://www.careerservices.calpoly.edu/Students/CareerPlanning/gsr.htm>

Comments, questions, and suggestions are welcome. We hope you will find the information contained in the body of this report helpful in supporting and evaluating the success of Cal Poly graduates.
