Budget & Acquisition

University Telephone Support

$ 2,733,760

During 2015/16, ITS spent nearly $3MM on hardware, software and services in support of the university landline telephone system, a communication mode that is quickly becoming obsolete.

Campus Security Status

Education is the 2nd most breached industry since 2010. Universities have many student and alumni records, as well as research information. Both are valuable targets to attackers, who take advantage of the trusting and open culture at many universities. Addressing this requires a combination of technical measures as well as education.

System Status

Internet traffic to Cal Poly equivalent to 15,000 DVDs …in one week

Lynda.com and SkillSoft both offer untapped resources for staff professional development. ITS pays for Lynda.com for the campus, and supports the Chancellor’s Office distribution of Skillsoft. Statistics are for campus usage in September and October 2016.

DID YOU KNOW?

According to a new study from Raytheon and the National Cyber Security Alliance, 37% of young adults are now more likely to consider a cybersecurity career than they were a year ago.
