DID YOU KNOW?

According to a December 2016 report by Cyber Seek there are 348,975 cybersecurity job openings in the U.S. right now, and approximately 45,000 of them are in California.

Budget & Acquisition

Moving to the cloud reduces the cost of hardware and the associated maintenance and provides more robust computing capabilities to support the campus.

Campus Security Status

Last week saw concerted phishing attack activity. Much of this originated from Nigeria. We continue to add technical measures to curb these attacks. We also have found instances where a person at Cal Poly fell for phishing three or more times this year, each time with negative impact to themselves and the campus. We’re addressing that as a training challenge.

System Status

Looking at campus WiFi, some customers use 250 times as much data as the average campus customer. Today, all of this traffic is prioritized the same.

Staffing

Thirteen ITS employees were honored at the 2017 Annual Service Awards Luncheon. Their combined service of 230 years included 30 year awardees Kathy Kimball and Steve Rutland, and 25 year awardee Mary Padilla.
