ACADEMIC SENATE
OF
CALIFORNIA POLYTECHNIC STATE UNIVERSITY, SAN LUIS OBISPO

RESOLUTION REGARDING MINORS

Background: Since several departments have proposed minors for the 1986-1988 catalog, and since no new minors were approved for the 1984-1986 catalog, the Academic Senate Curriculum Committee endorses the following resolution concerning minors, and submits it to the Academic Senate along with other catalog recommendations.

- WHEREAS, A minor may give a student the opportunity to broaden his/her educational background and have that breadth of training indicated on his/her transcript; and
- WHEREAS, A minor may increase the job opportunities available to a graduate; and
- WHEREAS, A minor may be interdisciplinary and provide an opportunity for cooperative efforts of faculty from different disciplines; and
- WHEREAS, Some majors have a number of electives allowing a student who plans carefully (often utilizing general education and breadth courses) to take a minor while not extending or only slightly extending his/her time in college; and
- WHEREAS, Little or no additional faculty or facilities are necessary for some minors; therefore be it
- RESOLVED: That the Academic Senate ask the President of California Polytechnic State University, San Luis Obispo, to carefully consider the merits and benefits of the minors proposed for the 1986-1988 catalog and approve them, providing an opportunity to see what the student demand for minors is and to assess the benefits or problems that may arise from having more minors available to the students.

RECOMMENDATIONS FROM THE ACADEMIC SENATE CURRICULUM COMMITTEE
FOR PROPOSED CURRICULAR CHANGES FOR THE 1986-1988 CATALOG FROM
THE SCHOOL OF ENGINEERING

Changes for the graduate program:		Type of Change	#	Comm. Action
1. CHANGE from a Master of Engineering with a field of study in Aeronautical Engineering to a Master of Science in Aeronautical Engineering. Approval contingent on the inclusion of a 599 Design Project (Thesis)*as a requirement in the degree.				A
2. CHANGE from a Master of Engineering with a field of study in Civil and Environmental Engineering to a Master of Science in Civil and Environmental Engineering. Approval contingent on the inclusion of a 599 Design Project (Thesis)*as a requirement in the degree.				A
3. CHANGE from a Master of Engineering with a specialization in Electrical Engineering to a Master of Science in Electrical Engineering. Approval contingent on the inclusion of a 599 Design Project (Thesis)*as a requirement in the degree.				A
4. CHANGE from a Master of Engineering with a specialization in Electronic Engineering to a Master of Science in Electronic Engineering. Approval contingent on the inclusion of a 599 Design Project (Thesis)*as a requirement in the degree.				A
5. CHANGE from a Master of Engineering with a field of study in Industrial Engineering to a Master of Science in Industrial Engineering.				DA
6. CHANGE from a Master of Engineering to a Master of Science in Engineering with specializations in:				
A. Biochemical Engineering Approval contingent on the inclusion of a 599 Design Project (Thesis)*as a requirement.				A
B. Mechanical Engineering				A
C. Metallurgical Engineering Approval contingent on the inclusion of a 599 Design Project(Thesis)* as a requirement.				A
7. The Curriculum Committee recommends that if any of the separate engineering degrees are not approved that those areas of engineering be included as specializations in the Master of Science in Engineering degree, if the departments so desire.				A
8. ENGR 599 Design Project (Thesis) (2)(2)(5)	NEW	8	A	
9. ENGR 563 Graduate Seminar (1)	NEW	13	A

<u>Natural Resources Management (cont'd.)</u>			
NOTE: In the last catalog cycle a Forestry MAJOR with some options was proposed. The options were approved after the catalog was printed but not the major. In the curriculum for Natural Resources Management proposed for the 1986 catalog there are 39 units in the MAJOR column of the curriculum with a FOR prefix, compared to 7 units with a FOR prefix in the 1984 catalog.			
58. The Forest Resources-Watershed, Chaparral, and Fire Management Option has 27 specified units. A variance from the 30 minimum units to be specified for an option (CAM) was requested by NRM. This was denied by Dr. Wilson, and 3 more units are to be added. The NRM major curriculum needs to have 9 free electives instead of the 8 given, unless a variance is approved.			NR
