

**To:** Cal Poly Academic Senate  
**From:** Neal MacDougall  
Chair, Academic Senate Sustainability Committee  
**Re:** Winter Quarter 2012 Progress Report  
**Date:** March 25, 2012

The Committee met five times during winter quarter. The focus of most of the quarter was on assisting the Academic Senate's Executive Committee in gathering data on the feasibility of instituting a sustainability requirement. The committee was asked to survey existing courses – primarily GE courses as well as other courses critical to (large) majors. The committee developed a format and rough methodology and spent quite a bit of time trying to norm the process so that its results would be sufficiently robust. This process is still ongoing. Most committee members attending the meetings were actively involved with the committee's activities. Agendas and minutes of committee meetings are attached.
