

Taylor Farms, a processor of salads and fresh-cut vegetables, was formed in January 1995 by a group of salad industry leaders intent on creating a special company. Taylor Farms vision is to partner with the nation's leading restaurant groups and foodservice distributors to provide great quality, uniquely designed salads and cut vegetable products to service their customers.

In twenty-five years, Taylor Farms has grown to be one of the largest supplier of salads and fresh-cut vegetables to the foodservice market with processing facilities in eight locations around the United States and one in Mexico. We continue to be committed to provide great quality products, excellent value and superior service to our customer partners every day.

Current Open Positions
Salinas, CA

Sales Coordinator

Internship Program
Salinas, CA

We are pleased to offer a summer internship program for undergraduate students interested in learning more about our business. For consideration, please visit our website and fill out the form in its entirety and include a resume. Completed forms with resumes should be sent for review by no later than **March 13th**. If we have an opportunity that may be a fit for you, we will reach out to you to set up an interview. Interns will be selected and notified by **April 13th**. If you have not been contacted by this date, we encourage you to apply again next year.

We have available internships in the following areas:

Product Management
Shipping
Production
Quality Assurance

Marketing
Finance and Accounting
Logistics
Raw Product

Please visit www.taylorfarms.com to complete the application online and attach your resume.

To learn more about us, or for further information on internships and career opportunities, please visit us at: www.taylorfarms.com or www.taylorfarmsfoodservice.com

Taylor Farms Overview

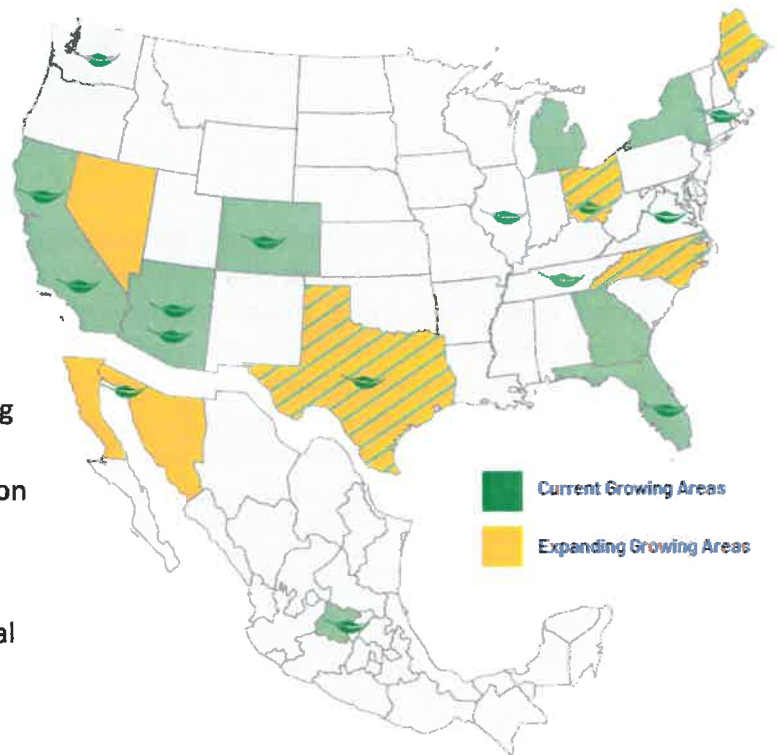

Facility Locations

Taylor Farms facilities are located strategically across the country and Mexico to best support our supply chain.

Food Safety

Committed to driving food safety across our organization as well as the entire produce industry. Key initiatives include:

- SmartWash water additive development along with huge advancement in wash monitoring technology that eliminates cross contamination in the water.
- Improved zone control and equipment modifications to ease the accessibility for ideal sanitation practices.

Emerging Issues & Opportunities

Committed to spending and allocating resources to address and mitigate many emerging issues.

- Labor - Ongoing focus on automation due to an aging and limited labor force.
- Automation- In the field, currently utilizing automated romaine, cabbage, and celery harvesters that drive a more desirable and ergonomically correct work environment. In the production facilities, using and expanding automation with automated case packers, carton erectors and palletizers.
- Assured Supply - We continue to expand our diverse raw product supply to mitigate product shortages during tight markets.
