For the Week of May 17, 2021

Senior Project Course Offerings ~ 2021-22

- If you are a currently a junior or senior and are planning to complete Senior Project in the next academic year, we need to plan for your enrollment so we can accommodate everyone.
- **FILL OUT THIS SURVEY ASAP** to tell us about your plans for taking Senior Project courses.
- You will need to plan carefully for enrollment as there are changes to how Senior Project courses are offered!!
  - **Seniors planning a fall 2021 graduation date**
    - If you’ve completed one or more Senior Project courses with either an AGED or AGC prefix, enroll in the remaining required course as soon as your registration period begins. All Senior Project courses now have an AGC prefix for students in both AGC and AGSC majors.
    - If you have not completed any of the Senior Project courses, you also need to plan carefully and register immediately when your registration period opens.
  - **Seniors planning a spring 2022 graduation date**
    - If you do not have a clear idea of what you will do for your Senior Project, we recommend you enroll in AGC 460 for the fall term and plan to complete AGC 461 and 462 in the spring term.
    - If you have clear ideas about your Senior Project, please contact Dr. Cannon prior to enrolling in all three courses in the same term. While it is possible to take all three courses at once, permission codes are required, and you’ll need to contact Dr. Cannon to get one.
    - The best path for a successful senior project with a spring 2022 graduation date is:
      - AGC 460 in fall 2021
      - AGC 461 and AGC 462 in spring 2022
  - Questions about Senior Project? Check out the Senior Project Page on the AEC Department website here [https://aged.calpoly.edu/senior-projects](https://aged.calpoly.edu/senior-projects) or contact Dr. Cannon for specific questions or to discuss project ideas at kcanno01@calpoly.edu

Participate in a Food Science Research Study

- Are you interested in plant-based protein, want to learn more about your body composition, want a free blender bottle with a week's worth of protein shakes, or just want free food? We want you to participate in a study! You will get a $10 Trader Joe's gift card for completing a 10 day study involving plant-based protein shakes. You will be asked to drink a protein shake 2x per day, with no other dietary changes. Completion of
the study also comes with a body composition report, including bone density, body fat, and muscle mass, as well as a blender bottle and protein powder scoop. Participants must be able to come to campus.

- See if you qualify at https://forms.gle/6CYSCVXFde6jynUQ6. Questions? Email Addy Maykish at amaykish@calpoly.edu. See attached flyer for more details.

Scholarship Opportunity: California Citrus Mutual
- Applications due June 30. See attached flyer for details.

Cal Poly Showcase for COVID 19 Related Research
- We are pleased to announce Cal Poly’s Showcase for COVID-19 pandemic related research, hosted by the Center for Health Research, will be held May 20, 11:00 am to 12:40 pm. Cal Poly Faculty, students, and staff from each college will present novel research in concurrent symposium that includes an Education & Social track, and Virus & Impact track. Presentations will be recorded and will be available on the Center for Health Research’s website (https://healthresearch.calpoly.edu/cal-polys-covid-19).
- Please see attached flyer for more info, zoom link, and link to schedule. Please stop by for any or all presentations.

Job and Internship Opportunities
- Mustang Media Group – We are hiring across all of the Mustang Media Group platforms – Mustang News, KCPR, Mustang Business – and are looking for aspiring journalists, video reporters, photographers, social media coordinators, advertising account executives, designers and so many more. For more information visit apply.mustangmediagroup.com. For further questions on any of the positions, feel free to reach out to next year’s Editor in Chief Tessa Hughes at tkhughes@calpoly.edu.
