2027 STALLION LABORATORY INTERN

JANUARY 1 – JULY 15 | DUE OCTOBER 15, 2026 | PAID POSITION

Valley Equine stands more than 50 leading stallions across the performance horse industry, supported by a semen processing and shipping department built to handle the demands of a high-volume breeding season. In 2026 alone, Valley Equine shipped 5,006 semen doses over 180 days. For interns, it's an opportunity to learn the day-to-day operation of a high-volume stallion laboratory while assisting with semen processing, shipping and freezing throughout the breeding season.

RESPONSIBILITIES

- Assist with semen processing and preparation for shipping
- Assist with packing semen shipments
- Help maintain laboratory inventory and supplies
- Assist with semen freezing for domestic and international use
- Handle horses as needed throughout daily operations
- Maintain cleanliness and organization throughout the laboratory

REQUIREMENTS

- Detail-focused and eager to learn
- Confident handling horses
- Reliable and accountable
- Strong communication skills
- Comfortable in a fast-paced, team-oriented environment
