

CASTILLO ENGINEERING, INC.

CIVIL & STRUCTURAL ENGINEERS

JOB POSTING PROJECT ENGINEER

We are a boutique award winning Southern California structural engineering firm with a diverse project portfolio that includes commercial, office, retail, multi-family and high end residential. Our office environment is open, communicative, team-oriented, fast-paced, high energy, flexible, and fun. We work on projects in all practice areas, and we strive to be an outstanding provider of engineering and innovation.

Candidates joining our team should have exceptional engineering, communication, and relationship skills to aid in producing a complete detailed set of construction documents. Candidates should be flexible in assigned tasks, work diligently, meet deadlines, and be able to work independently. We seek Engineers who want to learn and grow both personally and professionally by taking ownership of projects, from inception with initial site visits through to construction administration.

The duties for this position will require the following:

1. Perform Field Visits to Assess and Document Existing Conditions.
2. Perform Calculations (Gravity and Lateral)
3. Use EXCEL, RISA And ENERCALC
4. Work with Drafters to Develop Structural Drawings
5. Read Architectural Plans, Sections and Elevations
6. Work with Deadlines
7. Communicate with Clients

At Castillo Engineering we have succeeded by the "hands on" mantra.

Requirements: The position requires a Bachelor's degree and completion of EIT a plus.

Pay Rate: Commensurate with prior experience/internships and schoolwork

Job Site: 2919 W. Burbank Blvd, Suite D. Burbank, CA 91505
