Position: **Structural Design Engineer**

Job Code #: JC-208902  
Company: State of California Department of Water Resources (DWR)  
Location: Sacramento, CA  
Job Type: Permanent, Full Time  
Date Posted: 10/31/20  
Deadline to Apply: Until Filled  
Submit Resume to: Jon Kwan  
Jonathan.Kwan@water.ca.gov  
(916) 654-5498

At DWR you will have the advantage of numerous resources to support your work and your professional growth—including training, organizational memberships, and knowledgeable PE & SE colleagues, of which many are under one roof and all of which collaborate for project success.

This position is open to engineers of varying levels of experience. Actual assigned duties will be commensurate with skill level. Under the direction of a Senior Engineer, the incumbent performs structural analysis, design, and prepares plans and specifications for a variety of projects including buildings, bridges, spillways, hydraulic structures, radial gates, intakes and miscellaneous water-related facilities, as well as prepares designs for modifications to existing structures. Additional duties include performing engineering studies and analyses of existing and proposed facilities, site inspections, and engineering support for projects under construction.
