

## **ADVANCED STRUCTURAL DESIGN, INC. (ASDi)**

ASDi is a structural engineering firm located in Fresno, California. Established in 1984, we provide structural engineering services for various types of projects including educational and healthcare facilities, industrial structures, municipal airports, sports stadiums, office buildings, government facilities, modernizations, structural investigations and seismic retrofits. To learn more about ASDi, visit our website at [www.asdiengr.com](http://www.asdiengr.com)

### **ENTRY LEVEL ENGINEER**

ASDi is currently seeking an Entry Level Engineer. Under the direction of a Structural Engineer, the Entry Level Engineer assists in the design of concrete, steel, wood, and masonry building projects. Typical job duties include:

- Assisting in the preparation of structural calculations using both hand calculations and computer analysis software
- Preparation of structural drawings using AutoCAD and Revit software
- Sketching of construction details for drafters
- Review of shop drawings
- Field visits and report writing
- Confers with Contractors and Architects regarding design and construction activity

ASDi offers a comprehensive compensation package, including health coverage and profit sharing.

### **JOB REQUIREMENTS**

- BS Degree in Civil Engineering or Architectural Engineering required
- Possession of a valid certificate as an Engineer-in-Training (Passed the FE Exam)
- Experience using AutoCAD, Revit, and RAM Structural System is a plus
- Practical detailing and problem solving skills are a must

To apply for this position, submit résumé, cover letter and availability to Craig Hiatt at [chiatt@asdiengr.com](mailto:chiatt@asdiengr.com)
