Job Title: Project Manager/Senior Engineer

Description: Our goal is to build a high quality and design focused engineering practice. We are already working with many of the Bay Area's best design oriented Architectural firms (e.g. WRNS Studios, Bohlin Cywinski Jackson, Aidlin Darling, Walker Warner, and others) focusing on high-end custom residential, education, civic and other institutional projects and providing engineering services for the Boeddeker Park project which was one of just two projects this past year to receive an honor award from the San Francisco Chapter of AIA. We are a creative team of young professionals, with a casual and fun office environment, focused on engineering expertise but also great design, creative exploration of materials and building systems, all founded on a high level of client service. We are looking for a mid to senior level engineer/project manager capable of running projects from concept through construction.

Qualifications:

- 10+ years of experience
- Bachelors/Masters Degree in Civil/Structural Engineering
- California P.E. License - S.E. license a plus
- Building Design Experience
- Experience in detailing in all materials
- Working knowledge of CAD required - Revit a plus
- Excellent communication skills (written and verbal) are required as the job will entail coordination with clients, owners, other consultants, and contractors
