

Davido Consulting Group, Inc., (DCG) is an energetic 40-person civil/structural engineering firm with three offices in the Puget Sound area. Our projects take us up and down the Western US. We work on a wide variety of structural projects from single-family residences to large mixed-use buildings.

## **Entry Level Structural Engineer**

We have an open position for a recent graduate EIT with an interest in structural design utilizing steel, concrete, and wood.

### **Requirements:**

- BSCE (or related degree) and EIT
- Self-motivated individual and fast learner
- Excellent communication and time management skills
- Excellent technical writing skills
- Proficiency in MS Office and AutoCAD, structural modeling programs (RISA, ETABS, ADAPT)
- Experience/interest in lateral and gravity design utilizing wood, steel and concrete systems
- Valid driver's license

### **Duties may include:**

- Site visits and inspections
- Compiling design criteria and load take-offs
- Gravity and lateral design of structures
- Detail work using AutoCAD
- Coordinating projects between Project Managers, CAD staff and others
- Reviewing and interpreting technical documents from other consultants (geotechnical engineering reports, civil engineering plans, etc.)
- Preparation of engineering reports and plans
- Review of shop drawings for compliance with construction contract documents
- Assist with issuance of field instructions, change orders and other construction administrative documentation

### **Benefits**

- SIMPLE IRA
- Life Insurance
- Medical Insurance and generous Health Savings Account
- Long Term Disability insurance
- Wellness Program
- On-going career growth opportunities
- Fun, flexible and supportive work environment
- Company paid lunch outings on Fridays
