

DCI IS LOOKING FOR YOU!

be a part of the experience

DCI Engineers is a leading structural and civil engineering firm with ten office locations; Seattle & Spokane, Washington; Portland, Oregon, San Diego, Irvine, San Francisco and Los Angeles, California; Austin, Texas; Anchorage, Alaska; and Denver, Colorado. We have been providing client focused, award-winning, structural and civil engineering services for almost 30 years. These ten offices are comprised of more than 250 dedicated engineers and technical support staff. While we have offices in six states, we are licensed in all 50 states which provides tremendous opportunity for a career that fits your lifestyle!

Throughout our geographic growth, DCI has focused on ensuring that all of our offices remain highly connected. This connection includes sharing intellectual resources, physical resources, and workload. As a result of this close collaboration our staff always has the assets and leverage necessary to successfully complete projects.

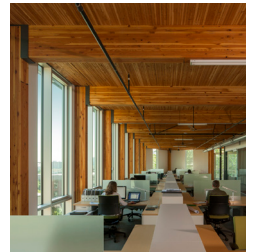

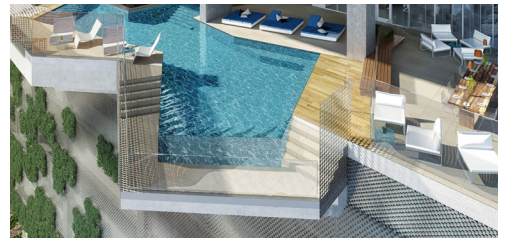

CAREER OPPORTUNITIES

STRUCTURAL PROJECT ENGINEER

We are currently seeking graduating Cal Poly ARCE students for Structural Project Engineer positions in many of our offices. We're looking for motivated individuals who want a creative, challenging, and fun work environment. Our focus on client service makes good communication skills a must. The position will involve the design of all categories of seismic and gravity framing systems for every building and material type.

Please email your resume and cover letter to:
resumes@dc-engineers.com, indicating which position and office location interests you.
