

Position: Entry Level Design Engineer

Location: 9931 Muirlands Blvd., Irvine, CA 92618

Deadline to Apply: Until Filled

Contact Person: Larry Kaprielian/David Nelson

Contact Email: careers@knastructural.com

Company Web Site: <https://knastructural.com>

KNA IS HIRING motivated Cal Poly Graduate Engineers (ARCE and CE) who are eager to learn and grow within our well-established firm. We value integrity, forward thinking and a culture of collaboration both inside and outside the workplace. Our Cal Poly Alumni staff are working on some great projects that support great architectural visions.

ABOUT KNA

At KNA, we deliver innovative, creative structural engineering solutions for architects, owners and commercial developers. Our success is built upon our talented and dedicated staff of professionals and our thoughtful productive collaboration with clients and each other. Our company, located in beautiful South Orange County, has an open and friendly culture; we are resourceful and hardworking. We promote professional development through our entry-level mentorship program. In-house continuing education, community outreach and company sponsored events add to your experience

We are looking for the same qualifications in responding candidates to join our Irvine office and help support our strong client base.

The ideal candidate's qualifications include:

- Bachelor of Science in Architectural Engineering or Bachelor of Science in Civil Engineering (Structural emphasis)
- California seismic engineering background
- Familiarity with the California Building Code and related codes
- Great attitude and willingness to learn
- Self-motivated, excellent communication skills and technically proficient
- Revit skills
- EIT Certification

Essential Duties and Responsibilities:

- The ability to prepare structural calculations, create construction documents and find solutions to complex architectural designs with appropriate levels of mentoring and supervision

- Identify design and construction issues and plan clarifications that need to be finalized for completion of tasks.
- The ability to contribute to projects and our approach that continually sharpen our processes.

The successful candidates will report to the Project Manager in Charge and work under appropriate levels of mentoring and supervision with a team of talented professionals. Minimum travel may be required.

Our twenty-year success has been built on the integrity of our employees; therefore we offer competitive compensation and a generous benefits package along with a dynamic work environment that encourages professional development.
