PACE Engineering, Inc., Redding, CA
Seeking Full-Time Entry-Level or Experienced Structural Engineer

February 7, 2018

PACE Engineering, Inc. (PACE), Redding, California is seeking a career-oriented, dedicated, full-time structural engineer. This position is open immediately, and candidates must have a BS in Architectural Engineering or Civil Engineering with a structural emphasis. Entry-level and experienced engineers will be considered for this position.

PACE is a multi-disciplinary, employee-owned company that is dedicated to finding economical, efficient, and reliable solutions to today’s complex engineering challenges. PACE has been providing engineering services in Northern California for over 40 years, has over 50 employees, and provides the following services:

- Structural Engineering
- Water/Wastewater Engineering
- Land Development
- Electrical Engineering
- Controls Engineering
- Surveying and Mapping
- Construction Inspection

Our range of structural-related projects include hydropower facilities, heavy civil facilities, seismic retrofit, expert witness and forensics, historical rehabilitation, damage assessments, schools, hospitals, public works projects, water and wastewater facilities, and bridges.

PACE’s greatest asset is our employee ownership program made up primarily of professional staff, and we strive to provide opportunity for each employee to grow professionally.

PACE offers a comprehensive group health insurance program, a flexible spending arrangement (FSA) for medical/dependent care expenses, long-term disability insurance, life insurance, and a 401(k) retirement plan that is matched with employer funds. We offer competitive salary and benefits, as well as ownership potential.
