

Rutherford + Chekene

Current Job Openings

We are actively seeking structural designers!

R+C is one of the foremost engineering practices in California providing structural and geotechnical engineering. Established in 1960, we are committed to hands-on involvement with our clients and to maintaining a friendly and welcoming in-office atmosphere.

Our new building portfolio includes significant collaborations with internationally acclaimed architects on a variety of building types. We pride ourselves in our ability to provide creative and practical solutions that support great architectural visions. Our services also include seismic evaluations and retrofits of existing buildings. We have many new and exciting projects in the institutional and commercial sectors, both here in the U.S. and abroad.

R+C offers a competitive salary and benefits package: medical, dental and vision insurance, paid personal time off, 401(k) plan, and continuing education allowance. We believe in work-life balance. We are an equal opportunity employer.

Candidates should have strong analytical, communication and interpersonal skills. We are looking for candidates who would enjoy engaging with architects and other clients. We are seeking engineers that are able to jump into a project and start working immediately.

QUALIFICATIONS

STRUCTURAL DESIGNER, ENTRY LEVEL

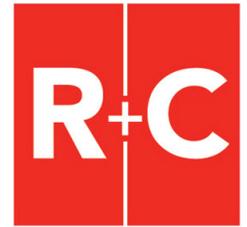

- A master's degree in structural engineering with courses in dynamic analysis, steel design, and concrete design
- New graduates or those with up to one year of structural design experience
- Familiarity with RAM and ETABS
- Experience with Revit Structure a plus

Please submit a cover letter, resume, and unofficial transcript to recruiting@ruthchek.com to apply or visit www.ruthchek.com/contact_us/careers to learn more.

Rutherford + Chekene

Summer Internships: Structural Engineering

Rutherford + Chekene provides a summer intern program for students interested in structural engineering who have already attained their bachelor's degree in civil or architectural engineering and will be entering or continuing in a related master's degree program in the fall. This intern program is well-suited for students who would like to be considered for career employment with R+C after their graduate studies are completed.

About Us

R+C is one of the leading engineering practices in California providing structural and geotechnical engineering. Established in 1960, we are committed to hands-on involvement with our clients and to maintaining a friendly and welcoming in-office atmosphere.

Our portfolio includes significant collaborations with internationally acclaimed architects on a variety of projects. We pride ourselves in our ability to provide creative and practical solutions that support their architectural visions. Rutherford + Chekene offers an opportunity for students to learn from some of the most experienced structural engineers in the Bay Area.

The Intern Experience

Interns gain experience in analysis, design, and construction administration and are exposed to a wide variety of engineering tasks. They work under the guidance of senior engineers and with other interns. The intern program includes mentoring, educational seminars, construction site visits, and company social events. This paid intern program lasts for 10 weeks between June and September; exact dates are flexible.

How to Apply

Students should submit a cover letter, resume, unofficial transcript, and the names and contact information of two structural engineering professor references no later than **March 10, 2017**. Please submit applications to:

Ms. Ayse Celikbas, SE, LEED AP
Rutherford + Chekene
375 Beale Street, Suite 310
San Francisco, CA 94105

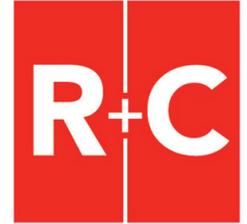

(415) 568-4451

Rutherford + Chekene

Summer Graduate Internships: Geotechnical Engineering

Rutherford + Chekene provides a summer intern program for students interested in geotechnical engineering who are currently graduate students in a related master's degree program. This intern program is well-suited for students who would like to be considered for career employment with R+C after their graduate studies are completed.

About Us

Rutherford + Chekene is one of the leading engineering practices in California providing structural and geotechnical engineering. Established in 1960, the firm's leadership is committed to hands-on involvement with our clients. We provide creative and practical solutions that support architect and owner visions. Rutherford + Chekene offers an opportunity for students to learn from some of the most experienced geotechnical engineers in the Bay Area. Our portfolio includes significant collaborations with internationally acclaimed architects on a variety of projects.

The Intern Experience

Rutherford + Chekene provides one full-time, paid intern position for a current graduate student. The intern will gain experience in geotechnical investigation and construction observation. The intern will work closely under the guidance of senior engineers and interact with our in-house structural engineers. The paid intern program also includes mentoring, educational seminars, construction site visits, and company social events. The intern program lasts for 10 weeks between June and September; exact dates of the internship are flexible.

How to Apply

Students should submit a cover letter, resume, unofficial transcript, and the names and contact information of two geotechnical engineering professor references no later than **March 10, 2017**. Please submit applications to:

Ms. Laurel Jiang, GE
Rutherford + Chekene
375 Beale Street, Suite 310
San Francisco, CA 94105
