### How Do You Enroll in a Supplemental Workshop in Math?

- **During Initial Enrollment Period:** If you are enrolled in the corresponding lecture (see schedule), you can add a workshop via your Student Center during your initial registration rotation. Log on to the Portal, go to "Student Center", and click on the word "Enroll." Insert 4-digit workshop number.
  - Winter quarter Round 1 registration rotations (up to 16 units) begin **November 6th**
  - Winter quarter Round 2 registration rotations begin **November 30th**
- **During Open Enrollment:** You can also add a workshop during the Open Enrollment period from **December 8th** to **January 10th** if space is still available.
- **After Classes Begin:** there's one last chance to add a workshop after the quarter begins, if space is available, and if you are enrolled in the corresponding lecture (see schedule).
  - Attend the evening workshop and obtain a permission number from the facilitator.
  - Log on to your Student Center and use the permission number to Add.
  - Begin attending the workshop.
  - The last day to add using a permission number is Wednesday, **January 16th**. After that date, workshops are closed just like other classes. Auditing is not permitted.
  - A "Late Add Appeal" process is available for a \$20 fee and may be approved in special cases if class spaces are available. The Late Enrollment Appeal deadline is Thursday, **January 24th**.

### What is Supplemental Workshops in Math?

It's a campus program that offers workshops that meet twice weekly throughout the quarter for students enrolled in the lecture listed on the other side. During the workshop, you will review lecture notes, discuss important concepts, develop study strategies, and prepare for tests. You will work closely with other students and earn one unit of elective credit. Workshops start the **first week** of classes and continue until the last week of classes before finals. You are expected to attend workshop regularly, bring notes, textbooks, and questions, participate in discussions, and work together as a team.

### Who leads the workshop?

They are led by an upper division student who is proficient in the subject. The facilitator guides the discussion and keeps things on track. Your facilitator attends **every lecture** in order to stay current with the material.
