

Engineering and systems management support for agriculture

THE BRAE WEEKLY

The Weekly Newsletter for the BioResource & Agricultural Engineering Department

WEEK 2~ April 12th, 2017

Sign up for
the AES
End of the
Year Club
Banquet by
May 5th!

Thank You to everyone who came out to the Zohns Brothers Endowment Dinner Friday Night! It was a great success honoring two men who made an impact on generations of students.

Wasn't it exciting to see AES in action all of Open House Weekend? We sure thought so!

Meet AES Engineering Council Representative Mitchell Jackson a double major Fifth Year in BRAE and Mechanical Engineering originally from Escalon, CA.

Why did you decide to attend Cal Poly?

Cal Poly is in a beautiful location and has a great reputation.

Why the BRAE Department?

The community is really cool. Because it's not as big as some of the other departments, there are more opportunities to know people and make good connections with the majority of the people in the program.

What has been your favorite class at Cal Poly?

I actually took a music theory class during my freshman year that I really enjoyed. Understanding music theory is something I've always wanted to be better at.

What has been your favorite class in the BRAE Department?

BRAE 234 with Dr. Zohns. The material was interesting and the class was taught really well.

Where do you see yourself in 5 years?

Probably taking the P.E. Exam while working for the coolest engineering company on the planet.

What has been your best story related to the BRAE department?

The first year I was ever involved in tractor pull I got to help work the starting line for the open house pull. I really liked that as a freshman I was able to just jump in and do something like that.
