Sage Ag Inc is looking for an individual who is interested in working with Precision Ag equipment both in a field and lab environment. Position requires occasional travel within the United States. You will be working as a team with engineers and technicians on the validation of precision farming equipment. Being from a farm or having experience running or working on large Ag equipment is preferred! However, having the ability to communicate, take initiative, and present yourself professionally with a great attitude is a must.

Requirements:

- Agricultural or Engineering Degree or equivalent work experience.
- Job location would be in the greater Ankeny, Iowa area.
- Prior experience working with operating farm machinery is necessary.
- Clean driving record.
- Must be able to accomplish testing within given release window.
- Must be self-directed as you will be asked to do things and not given every detail about how to do them.
- Need to be outgoing as you will meet many new people while working and must have the ability to communicate in various circumstances.
- Identifying possible root causes of failures.
- Providing professional opinions & advice to engineering on how new features are meeting customer demands.
- Must be able to maintain a good attitude during busy times and long hours.
- Can present themselves professionally always.
- Able to work as a team with engineers and technicians.
- Needs to be proficient with Microsoft Products (Word, Excel).
- Ag background – knowledge of equipment, practices.
- Familiarity with precision farming technologies.
- Ability to troubleshoot and resolve issues (remotely or onsite).
- Strong in troubleshooting and problem-solving.
- Comfortable being around and running large machinery.
- Williness to Travel (5-15%).
- Health benefits are included.

Details:

- Job Duration: Full Time
- Location: Des Moines, IA
- Compensation: Pay plus bonuses based on experience
