Ranch Resource and Site Coordinator

Company: ENGEOS

Location: Valencia

Position Type: Internship, potential for full-time hire

Position Summary: As an ENGEO Ranch Resource and Site Coordinator, you will play a dynamic role in working closely with Ranch and Farming experts (our client) coordinating and supporting current land operations and forward planning for farm and ranch development. Through ranch resource and site coordinating, project management, site maintenance, and client communications, you will be exposed to a wide range of exciting challenges. This position is unique at ENGEO and will be a one-of-a-kind experience!

Primary Responsibilities
- Ranch and farming operations project management and forward planning
- Range land and grazing planning
- Regenerative farming planning
- Monitor irrigation systems and water use
- Report and budget preparation
- Document preparation through ArcGIS and other software
- Database and regulatory requirements and compliance reporting and management
- Represent the property owner on site during filming operations (property leased for production filming with major studios)
- Monitor and report of film studio’s operations on the property
- Support client with coordination associated with studios for filming
- Perform other tasks as required

Our Ideal Candidate
- Can-do attitude and high attention to detail
- Excellent verbal and written communication skills
- Efficient with time and is an innovative problem-solver
- Adapts to rapidly-changing project needs and deadlines
- Works independently or collaboratively and follows instructions with minimal oversight
- Well organized with the ability to work on multiple projects simultaneously
- Works well in field and office

Required Qualifications
- Bachelor’s degree in Agriculture Engineering, Bioresource Engineering, or related field
- Experience with ArcGIS Enterprise and ArcGIS Online
- Must be able to legally work within the United States
- Must own/have access to a field vehicle (truck/SUV)

Other Desirable Qualifications:
- Minor or certificate in GIS or related fields from a major university
- Exposure to geotechnical or civil engineering a plus
- Exposure to natural resource management and regenerative farming a plus

Who We Are
