

Boething Treeland Farms

Wholesale grower of trees and shrubs since 1952

Position opening: Irrigation Specialist

Location: Lodi, CA

Boething Treeland Farms is seeking an Irrigation Specialist for its Lodi nursery location. The position can be full or part time.

We have two irrigation wells and one domestic well at our 360-acre Lodi nursery. All of the wells are approximately 30 years old. We grow containerized ornamental plants at our Lodi nursery from propagation cuttings and seedlings to 48" box trees.

The majority of the nursery is irrigated with spray emitters in the containers, though most of our #1 and propagation plants are overhead irrigated. Most of the irrigation runoff is captured in drainage channels and feeds into an on-site holding pod. We have very little runoff from the nursery property.

We are looking for an individual with the education and hands-on experience to help us maintain and improve our irrigation infrastructure, from well pump to clocks, valves, PVC lines and emitters. We hope to find a hard-working and creative person, who will work with our management and irrigation teams to reduce our use of labor, water, nitrogen, and electricity in delivering water to our nursery plants.

If you are interested in learning more about the position, please call Haydi Danielson at (209)339-3065.
