Site Checker Internship

Company Overview
Ag Water Chemical has been in the irrigation water treatment business for over 20 years, providing growers of various commodities with chemigation solutions to ensure their irrigation systems perform at the highest efficiency. Ag Water Chemical has grown largely over the years because of time-tested products and reputation for exceptional service, taking great pride in always going the extra mile. The company’s headquarters are in Fresno, CA but services reach north beyond Sacramento and as far south as Coachella, CA.

Job Overview
Ag Water Chemical is currently seeking a driven and motivated individual who is interested in pursuing a career in agriculture. The site checker position is part of the company’s service model, keeping customers in the loop of the services they are being provided. The checker would be visiting various customer field locations, recording data, submitting reports through Ag Water Chemical’s reporting app, troubleshooting chemical injection systems, and staying in contact with customers and company personnel.

Desired Qualifications and Characteristics
- Valid driver’s license and clean driving record
- Willingness to drive long distances on a given day
- Willingness to learn technical information and troubleshooting procedures for chemical injection pumps
- Basic knowledge of iPads and data entry in an app
- Ability to meet report deadlines
- Professional attitude with a growth mindset
- Punctuality
- Good communication skills, both written and oral

Benefits
- Paid internship $15/hour
- Flexible work hours.
- Opportunities for full-time employment through internship performance
