

Staff Engineer

\$50,000 to \$60,000+ / Annual

Established in 1926, the District delivers water to its landowners on a reliable basis at the most economical rate.

The District has a highly qualified professional staff which gives ample opportunities to gain professional development.

Tulare Lake Basin Water Storage District (District) has an immediate opening for a full time Staff Engineer. This is a great opportunity for someone looking to start a career in the water resources field.

The District manages Kings River and State Water Project supplies for its landowners. There is also involvement in groundwater. This allows the ideal candidate to gain valuable experience to a wide variety of duties. The ideal candidate will also have opportunities to be involved in water policy and water management policy and implementation.

Job duties include but not limited to:

- ◆ Tracking and quantifying of landowner water supplies and delivery
- ◆ Analyze current and historical water deliveries
- ◆ Manage landowner parcel ownership data
- ◆ Prepare various maps using GIS and/or AutoCAD
- ◆ Prepare presentations
- ◆ Various administrative duties such as annual and biannual reporting
- ◆ Operations and Maintenance Projects

Desired Coursework:

- ◆ Water Management
- ◆ Water Hydraulics
- ◆ Principles of Irrigation/ Irrigation Theory
- ◆ Canal Design and Structures
- ◆ ESRI GIS/AutoCAD
- ◆ Technical Writing
- ◆ Microsoft office
