BULL *Est. 1956* TEST & SALE

OCTOBER 5TH, 2025
SUNDAY - 1PM

69TH
ANNIVERSARY

Cal Poly Bull Test and Sale
San Luis Obispo, CA

Cal Poly
BULL
TEST & SALE

Cal Poly Bull Test Supporters,

We are thrilled to offer another outstanding set of bulls at the 69th Annual Cal Poly Bull Sale on Sunday, October 5th. Our students have focused their attention on service this year and have continued to develop opportunities to serve the industry. As always, our goal is to provide a source of performance-tested bulls with genetic potential that will add value to your herd.

This year has presented Learn by Doing Challenges, but I am so proud of the ability of our student team to adapt. From feeding bulls by hand off the flatbed trailer because the feed truck went down, to developing new training protocols, the future of the beef industry are some very resilient young people. One of the significant challenges we faced was the malfunction of our SmartFeed bunks. Technology is wonderful until things start to break down. Therefore, sale eligibility was based on growth performance of bulls during the contemporary group test, similar to previous years. The Cal Poly Bull Test implements a gain test that exceeds the minimum standards of the Beef Improvement Federation with over a 90-day testing period.

As you prepare for attendance at the sale, please visit the DV Auctions website for more information including a breeding soundness exam report, ultrasound report, and videos of each lot in the sale.

Please also join us on Saturday, October 4th at the Twisselman Barn in San Luis Obispo for the Cal Poly Young Cattlemen's Association Benefit Dinner starting at 5:30 pm. Remember to check our website (<https://bulltest.calpoly.edu/>) and social media pages for details and updates as the event approaches.

Please reach out via email or phone with any questions or to request additional sale catalogs and information about the sale. We appreciate all the support, and we look forward to welcoming you to campus on Sunday, October 5th.

Thank you,

Zach McFarlane, PhD
Associate Professor, Beef Cattle Specialist

(805) 801-7058

Dear Cattlemen, Family, and Friends,

We are thrilled to welcome you to the 69th Annual Cal Poly Bull Test and Sale, taking place on Sunday, October 5th, at the Cal Poly Bull Test facility in San Luis Obispo.

This year has been an incredible journey. We are grateful to have had such a dedicated management team and hard working enterprise members supporting every aspect of the program from bull health and nutrition, to sale preparation, marketing, and social media. Together we have worked tirelessly to make this year a success and are excited to have welcomed 150 bulls from consignors from across the region. As the bulls grew and developed over the past six months, we, as students, grew alongside them, learning, adapting, and gaining invaluable hands-on experience every step of the way.

As General Managers, we would like to express our heartfelt thanks to our consignors, buyers, sponsors, and advisors. This program has been a proud tradition at Cal Poly for many years, and its continued success would not be possible without your support and participation.

We look forward to seeing you at the bull sale in October to enjoy great company, good food, and an outstanding selection of bulls that will shape the future of the beef industry.

Thank you again for helping us keep this tradition alive and thriving.

Sincerely,

Sarah Reece & Colt Chamberlain
Cal Poly Bull Test and Sale General Managers

Cal Poly BULL TEST & SALE

69th Annual Bull Test & Sale

ALL-BREED PERFORMANCE TESTED BULL SALE

Sunday | 1 p.m.

OCTOBER 5, 2025

At the Cal Poly Bull Test Facility, Escuela Ranch
(map on back cover)

**THEY BROUGHT US 150 BULLS, WE
OFFER YOU THE TOP 85!**

Nearby Lodging:

Blue Sail Inn
(805) 772-2766
851 Market Avenue, Morro Bay, CA 93442

Auctioneers:

Rick Machado - Shandon, CA

Sale Day Phone:

Aaron Lazanoff (805) 801-7058
Jason Dubowsky (805) 623-2804

Livestock Publication Representatives:

Logan Ipsen & Jared Patterson -
Western Livestock Journal
Stevie Ipsen & Matt MacFarlane -
California Cattleman
Jake Pickering - *Western Ag Reporter*
Kelli Toledo - *Best of the West*
Landon Andrews - *Angus Association*
Representative

Schedule of Events:

SATURDAY:

Cal Poly YCA Benefit Dinner at the Twissleman Barn: 5:30 p.m. cocktail hour followed by 6:30 p.m. dinner

SUNDAY:

Bull Preview at Bull Test Facility: 8:00 - 11:00 a.m.

Sale Day Lunch Sponsored by Zoetis Inc.:

11:00am - 1:00 p.m.

Sale: 1:00 p.m.

Acknowledgements:

We would like to extend our most sincere appreciation to Celeste Settrini, Jenna Fields, & Jason Judge for their photography & marketing expertise and guidance for our students. A special thank you to Dr. Rachael Lyons for all her incredible veterinary care and training of our Bull Test students. A special thank you to Scott Frame of JLG Enterprises and Kristy Camozzi of K Livestock Imaging. Finally, a very special thank you to all of our consignors. All of these individuals have been integral in ensuring the success of this year's sale.

Sale Order:

Calving Ease Angus
Multi-Trait Angus
Growth Angus
Red Angus
Hereford

About The Bulls

This is the 69th year of testing bulls at Cal Poly. Cal Poly Bull Test is a breeder-financed test station striving to identify and improve the quality of beef cattle. The test began with 150 bulls and were rigidly cut down to 85, using growth performance (i.e., average daily gain), genetic potential standards (i.e., EPDs), structural, and reproductive soundness criteria in the culling process.

HOW BULLS HAVE BEEN HANDLED

Bulls are lotted by weight, age, and breed in large hillside lots. They are fed a high roughage ration in Smartfeed by C-Lock Inc. feedbunks. We were able to collect individual feed intake for every bull. Water is located at the top of the hill forcing the bulls to exercise. The ration has been formulated so that the ADG of bulls will be approximately three pounds per day. This figure has proven to be adequate so they will manifest their genetic differences and at the same time remain in a hard “range-ready” condition.

Terms & Conditions

1. Any changes in this sale book will be announced from the sales block and such announcements shall take precedence.
2. Each animal will be sold to the highest bidder without a reserve bid.
3. The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.
4. Each animal will be at purchaser's risk as soon as sold; but it shall be the obligation of the consignor and thus Cal Poly Bull Test will see that purchased animals are fed and cared for, free of charge to the purchaser, until delivery to the buyer or until the expiration of 48 hours after the sale, whichever occurs sooner.
5. **TRANSPORTATION:** Transportation is the responsibility of the purchaser. Cal Poly Bull Test will provide **FREE TRANSPORTATION** to central locations in California at the buyer's request. Please contact sales clerk for transportation needs.
6. A certificate of registry and transfer will be furnished for the purchaser for each animal sold.
7. **BREEDING GUARANTEE:** All animals sold are guaranteed by the breeder/consignor to be breeding sound for at least one breeding season. The breeding season must start no more than 90 days after the sale to be considered for the breeding guarantee. Bulls are guaranteed breeders if properly cared for. Any bull that settles at least one-third of the healthy cows he breeds will be considered a breeder. Any animal found not to be a breeder may be returned to the ranch of the seller at the buyer's expense, and if in good condition and complying with the health requirements of the seller's state, shall entitle the buyer to a satisfactory adjustment. In the case a bull is claimed to be a non-breeder, the seller shall be entitled to six months following the return of the animal in which to demonstrate that he is a breeder.
8. **CLAIMS FOR REFUNDS OR ADJUSTMENT:** All claims for adjustment or refund for any reason must be made in writing to the seller within six months of the sale or three months after the animal sold reaches the age of 18 months, whichever occurs later. The return of the full purchase price will, in any case, be deemed full satisfaction and settlement.
9. Terms of the sale are cash. Settlement is to be made immediately after the completion of the sale before movement of the bulls from the facility. All checks shall be made payable to the Cal Poly Partners.
10. The above guarantees and terms of sale shall constitute a contract between the buyer and seller of each lot and shall be equally binding upon both. Neither Cal Poly nor any other person connected with the management of the sale assume any liability, legal or otherwise.
11. All persons attending this sale do so at their own risk. Cal Poly, nor any other person connected with the management of this sale, does not assume any liability for the safety of the building or premises or for the behavior of the animals.

GENOMIC-ENHANCED EPDS

Genomic-Enhanced EPDs

This is the 15th year that breeders have the opportunity to incorporate genomic-enhanced EPDs into their 2025 Cal Poly Bull Test consignment. All Angus bulls have been tested with genomic testing technology. Please note those bulls which have been marked with the appropriate logo will tell you that these EPDs not only have contemporary evaluated traits, but have the latest technology incorporated to improve the accuracy level of various growth and carcass traits.

Back when EPDs were first used as selection tools, over twenty years ago, there was a learning curve of how one needed to use them in selection. It can be said that genomic-enhanced EPDs offers cattlemen the latest in technological advances to improve their selection accuracies of non-parent (yearling) animals.

How to use genomic-enhanced EPDs

Genomic-enhanced EPDs are to be used in the exact same way other EPDs are used, as a comparison between animals. The EPDs include all available

records, including ultrasound, carcass, and genomic profile results. As data is added to an animal's record, the EPD is expected to change to reflect the animal's true genetic merit. Accuracy values associated with EPDs are the best indicator of the possible amount of change expected in the EPD and will increase as more information is added. Therefore, those animals that have genomically enhanced EPDs will have a higher predictability of their true genetic merit of these traits reported in this year's sale book.

A. EPDs

Expected progeny difference (EPD) is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. (Compare only within breed.) EPD is expressed in pounds, either plus or minus.

Calving Ease Direct - predictor of the average difference in ease with which a sire's calves will be born when he is bred to firstcalf heifers.

Birth wt. - correlated to progeny birth weight.

Weaning and yearling wt. - predictor of a sire's ability to transmit weaning and yearling growth to his progeny.

Scrotal - Important trait affecting a sire's ability to transmit early sexual maturity to his daughters.

Milk - predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters, or that part of weaning weight attributed to milk and mothering ability.

%Intramuscular Fat (%IMF) - Subjective measurement of intramuscular fat in the ribeye. This score can be used to select sires that will produce progeny with more marbling at a consistent fat or age point. The higher the score, the more intramuscular fat.

Ribeye Area EPD (REA) - The Cross-section area of the longissimus dorsi muscle (Ribeye area) at the 12th rib has been shown to account for a significant amount of variation in %Retail Product at a constant carcass weight end point.

B. \$VALUE INDEX (ANGUS)

\$Values encompass the revenue generated from genetically derived outputs and associated costs (expenses) from required inputs.

Weaning Value (\$W) provides the expected dollar-per-head difference in future progeny performance within a typical U.S. beef cowherd, and includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

1		2		3		4		5		6	
CED		BW		WW		YW		SC		Milk	
+9	.38	-.5	.54	+68	.44	+113	.39	+170	.42	+25	.29
7		8		9		10		11		12	
Marb		RE		\$W		\$F		\$G		\$B	
+43	.37	+89	.36	+79		+87		+46		+133	
14		15		16		17		18		19	
BW		Adj. 205		Adj. 365		Final Wt.		ADG		WDA	
68		809		1342		1285		3.18		3.34	
Genomic-Enhanced EPDs											
CED	BW	WW	YW	DMI	YH	SC	DOC	HP	CEM	MILK	MH
4	2	53	68	59	86	2	38	59	45	64	82
CW	MARB	RE	FAT	TEND							
62	81	17	58	49							

Feedlot Value (\$F) is not only an account for the estimated difference in the dollar value of weight gain, but is adjusted for the cost of achieving that gain. Yearling weight EPD and weaning weight EPD and their relationship are the genetic components to which the feedlot assumptions are applied.

Grid Value (\$G) is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires. The Grid Value combines quality grade and yield grade attributes, and is calculated for animals with carcass EPDs, ultrasound EPDs or both.

Beef Value (\$B) represents the expected average dollar-per-head difference in the progeny post-weaning performance and carcass value compared to progeny of other sires. The \$B value is comprised of two pieces: \$F and \$G.

Combined Value (\$C) expressed in dollars per head, is an index which includes all traits that make up both **Maternal Weaned Calf Value (\$M)** and **Beef Value (\$B)** with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass-merit grid. EPDs directly influencing a combined index are: CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, DMI, Marb, CW, RE and Fat.

C. PERFORMANCE RECORDS

ACT BIRTH WT. - Actual birth weight of the animal, as determined by the breed association.

ADJ 205 - Adjusted 205 day weight.

ADJ YR WT - Adjusted 365-day weight is equal to final test weight less actual birth weight divided by age in days, times 365, plus actual birth weight, plus additive age of dam adjustment for weaning weight.

FINAL WT. - The average of two weights taken on two consecutive days (additional information distributed at the sale) and 08/14/18.

ADG - Average daily gain in lbs. during the test period (additional information distributed at the sale).

FCR - Feed conversion ratio is a measure of production and feed efficiency that is calculated by using the weight of feed intake divided by weight gained by the animal (i.e., average daily gain). A lower FCR value indicates a more feed efficient animal. Typically, FCR ranges from a value of 6.0-10.0 for beef cattle.

RFI - Residual feed intake is a measure of feed efficiency in beef cattle that is defined as the difference between an individual animal's actual feed intake and the expected feed intake. The expected feed intake is calculated based on the animal's size and growth. The lower the RFI value, the more feed-efficient the animal.

D. \$VALUE INDEX (HEREFORD)

Baldy Maternal Index (\$BMI) is an index to maximize profit for commercial cow-calf producers who use Hereford bulls in rotational crossbreeding programs on Angus-based cows and heifers. Fed cattle marketed on a Certified Hereford Beef (\$CHB) LLC pricing grid.

Brahman Influence Index (\$BII) is similar to BMI\$, with one difference-Hereford bulls are used in rotational crossing with Brahman, rather than Angus.

Certified Hereford Beef Index (CHB\$) is a terminal sire index where Hereford bulls are mated to British-cross cows and all offspring are sold as fed cattle on a CHB LLC pricing grid.

F. HEALTH

All sale bulls were provided a vaccination program designed by Merck Animal Health including a respiratory viral vaccine, an anaplasmosis vaccine and a clostridial regimen.

LOW BIRTH WEIGHT BULLS

The following criteria must be met to qualify for a low birth weight designation with the exception of the Angus breed:

CED Minimum Values Representing the Top 30% of the Respective Breed

- Angus: +9.0
- Hereford: +4.5
- Red Angus: +14

Angus Divisions

Cal Poly consulted with the American Angus Association to provide more accurate and relevant criteria for the following divisions:

1. Heifer Bull Division: HEIFER BULL ANGUS

- Calving Ease Direct EPD: +8.0, Minimum (Top 40% of the breed)
- Birth weight EPD: +0.8 or lower, Maximum (Top 40% of the breed)
- Actual Birth Weight: 85 pounds, Maximum

2. Multi-Trait Bull Division: MULTI-TRAIT ANGUS

- Calving Ease Direct EPD: +6.0, Minimum (Top 55% of the breed)
- Weaning Weight EPD: +62 lb., Minimum (Top 55% of the breed)
- \$C EPD: +245., Minimum (Top 55% of the breed)

3. Growth Bull Division:

- All bulls not qualifying for one of the above divisions

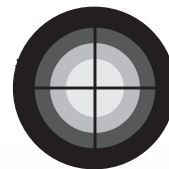

PLEASE NOTE !

The above guidelines are only breed association recommendations. There may be other bulls in the sale, which may meet your individual low birth weight requirements.

CAL POLY BULL SALE IS AVAILABLE ONLINE WITH THE HELP OF OUR SPONSOR WESTERN VIDEO MARKET. BID ONLINE FOR BULLS IN REAL-TIME BY USING THE INFORMATION BELOW

PRODUCTION SALES – WATCH AND BID!

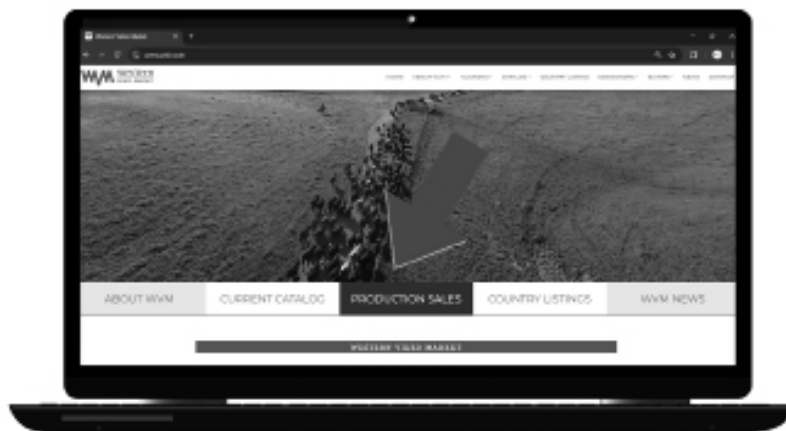

WESTERN VIDEO MARKET and **CCI.LIVE**
*have joined forces to offer comprehensive livestock
marketing services throughout the country!*

HOW TO BID ONLINE

-  **VISIT WVMCATTLE.COM**
-  **CLICK ON THE SALE EVENT**
-  **CREATE A PROFILE TO BID**

- For a successful bidding experience, be sure to have adequate internet service
- If you are bidding on a mobile device, we recommend staying stationary for a stable signal

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits
(such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

TOUGH ON TOUGH WORMS, EASY ON CATTLE PRODUCERS.

VALCOR
(doramectin and levamisole injection)

You can achieve effective parasite control in one product, where before you may have needed two. Valcor (*doramectin and levamisole injection*) is the first prescription cattle dewormer with two active ingredients in one dose. It's never been easier to be tough. Get tough at ValcorTough.com.

IMPORTANT SAFETY INFORMATION: Do not treat cattle with Valcor within 15 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows; not for use in beef calves less than 2 months of age, dairy calves, and veal calves. Safety has not been evaluated in breeding bulls. Use with caution in cattle treated with cholinesterase inhibitors. This product is likely to cause injection site swelling; tissue damage (including granulomas and necrosis) may occur. These reactions have resolved without treatment. See Brief Summary of Full Prescribing Information on the next page.

THIRD PARTY VERIFICATION

Whether you need to meet basic identification and traceability requirements or you want to market your beef in premium markets, value-added verification programs give you a competitive edge.

RCR Natural

• ANNUAL ON-SITE AUDIT

Cattle in the RCR Natural program must never be fed an animal by-product, must never be given hormones, and must never have been treated with an antibiotic.

Source & Age Verification (SAV)

• RANCH: ANNUAL PHONE & RECORDS AUDIT

• FEEDYARD: ANNUAL ON-SITE AUDIT

We collect calving dates of birth (first to last calf is required), number of head to verify, and identification information.

Non-Hormone Treated Cattle (NHTC)

• ANNUAL ON-SITE AUDIT

Cattle in this program must not be given any hormones at any point in their lifetime. Requires an annual on-site audit for both ranches and feedyards.

Saudi Arabia Export Verified (SA EV)

• ANNUAL ON-SITE AUDIT

Cattle may not be fed any animal protein post-weaning in order to qualify for this program. Requires an annual on-site audit for both ranches and feedyards.

Feed Bunk Ready Vaccination Verified

• RANCH: ANNUAL PHONE & RECORDS AUDIT

An RCR exclusive verification program. Cattle in this program must have at least two rounds of a Modified Live vaccine and been weaned for 45+ days. A certificate and Management Information Sheet is sent to the feedyard at shipping time.

NO PER-HEAD FEE

Phone & Records Audit Starts at \$250

On-site Audit Starts at \$1250

We also offer competitive pricing on tags

AUDIT PROCESS

1. Contact RCR or Download Online Application
2. Submit Your Application
3. Set a Meeting with RCR

TAKE OUR WORK FOR IT.

Protect your investment with decades of research, support and proven products.

Bovine Respiratory Disease (BRD) is a challenge all producers face, but you don't need to face it alone. Merck Animal Health is by your side with over 25 veterinarians and a research facility in the heart of cattle country supporting our local teams of cattle experts. We work hard to deliver the industry's most comprehensive BRD portfolio, including AROVYN™ (tulathromycin injection). Merck Animal Health ensures you have the right solution for your cattle's health and your bottom line too.

You stand behind them, we stand behind you.
Learn more at The-BRD-Experts.com.

*All the expertise and support
of Merck Animal Health plus
the benefits of tulathromycin.*

AROVYN®
(tulathromycin injection)
Injectable Solution
Antibiotic

IMPORTANT SAFETY INFORMATION: AROVYN has a pre-slaughter withdrawal time of 18 days in cattle. Do not use in female dairy cattle 20 months of age or older. Do not use in animals known to be hypersensitive to the product. See Full Prescribing Information.
