Exhibition featuring photographs, original construction drawings and student design proposals for the Salinas Dam in Santa Margarita, CA

**Location:** Cal Poly College of Architecture and Environmental Design Lobby, Building 5-212

**Date:** May 12- June 10

**Opening Reception** Wednesday May 18, 12-1

Instructors: Kelle Brooks and Ana Ozaki

Located less than thirty minutes from Cal Poly’s campus, the Salinas Dam served as the setting for Kelle Brooks’ and Ana Ozaki’s second-year Architectural Studios in the Winter of 2022. The pictures in the Salinas Dam exhibition, in show between May 12 and June 10 at Cal Poly’s CAED lobby, were taken by students, who toured the site, Santa Margarita’s reservoir, and dam structures on January 18, 2022. In featuring their work, this exhibition showcases the site as a central asset to Cal Poly’s and San Luis Obispo’s communities through the unique eyes of second-year architecture students, while educating our community on the history of water systems that supply our campus and city.
