ENGEO Field Representative

Location: Valencia, CA
Position Type: Full-time hire, hourly

Position Summary: As an ENGEO Field Representative, you play a crucial role in the success of our projects by being the eyes and ears of our project managers on job sites. You’ll work alongside talented peers and technical leaders as you assess geological and environmental hazards on challenging and world-renowned projects.

Primary Responsibilities - At a Glance
• Perform well-defined practical, analytical, and project administrative responsibilities in the field
• Observe work performed by contractors on job sites
• Visit project sites to collect and document environmental soil samples and monitor environmental excavations
• Perform field observations and in-place testing of soil and rock materials during grading and construction of utilities, walls, and streets; execute construction SWPPP services
• Use a nuclear gauge to test soil moisture density
• Communicate and collaborate with project managers (locally and in other regional offices), clients, subcontractors
• Confirm compliance with project and plan specifications, and engineering recommendations

Requirements
• Must own a construction site appropriate vehicle (Truck/SUV)
• Bachelor’s degree in Geology, Environmental Engineering, Civil Engineering or related field
• Exceptional communication and interpersonal skills
• Able to perform potentially strenuous field activity
• A team player who enjoys fast-paced environments
