Are you looking for a different type of civil engineering job? Join Caltrans District 5 Construction in beautiful Santa Barbara County. A Construction field assignment offers the opportunity and flexibility to work both in the field and in an office environment, administering heavy civil transportation infrastructure projects for the State of California.

Our mission is to provide a safe and reliable transportation network that serves all people and respects the environment. We are looking for candidates to be members of a premier engineering team delivering transportation projects for our stakeholders and regional partners.

Transportation engineers assigned to construction perform various transportation construction and engineering work in the office and field settings, inspecting construction work, enforcing compliance with plans and specifications, making change order recommendations, and reviewing and analyzing material testing data. Our engineers are an integral part in ensuring the plan becomes a reality with the help of our contractor partners. Caltrans has added new construction technologies and techniques like electronic documentation management systems (FALCON), Drones, AMG, new safety innovations, and the use of the latest Mobile devises.

If you are interested in being part of the construction team where we make projects come to reality, this could be the opportunity for you. Please apply today.
