

**KNA Structural Engineers** delivers innovative, creative structural engineering solutions for architects and owners. Our 24-year success has been built upon the integrity of our talented and dedicated staff of professionals and our thoughtful productive collaboration with clients and each other. Our company has an open and friendly culture, and we are looking for the same qualities in responding candidates to join our company and help support our strong client base. Our centrally-located Irvine office gives us the opportunity to work on projects all across southern California.

### The ideal candidate's qualifications include:

- Bachelor of Science in Architectural Engineering or Civil Engineering (Structural emphasis)
- EIT Certification
- Familiarity with the California Building Code and related Standards
- Great attitude and willingness to learn
- Self-motivated, excellent communication skills & technically proficient

### Essential Duties and Responsibilities:

- The ability to prepare structural calculations, create construction documents, and find solutions to complex architectural designs with appropriate levels of mentoring and supervision.
- The ability to collaborate on projects with internal staff and clients.
- The Design Engineer will report to the Project Manager in charge and work with a team of talented professionals.
- Minimal travel may be required.
