

# They tell me that compost is good, but how much do I need?

*A virtual workshop about degraded rangelands*

~via Zoom webinar~

Tuesday, June 29

3:00 pm - 4:30pm

Previously tilled, now degraded rangelands are unfortunately abundant across California. For these types of sites, might redirecting compost from landfill waste help to improve productivity of rangelands, while sequestering carbon? We're researching these questions at Cal Poly's Swanton Pacific Ranch and invite you to join us as we start our exploration.

Join us for a short virtual workshop featuring Cal Poly Soil Scientist **Stewart Wilson** and assistant researcher **Aaron Lee** as they describe their work and some preliminary results.

## **Logistics:**

To join the webinar, use this link: <https://calpoly.zoom.us/j/83392229409>

**Cost:** no cost- this is a free workshop!

For more information - [gfhayes@calpoly.edu](mailto:gfhayes@calpoly.edu) or 831-227-7163

This workshop is sponsored by Cal Poly and the California Department of Food and Agriculture in partnership with California Climate Investments- carbon cap and trade funding at work.
