

# Degraded Rangelands and Soil Health:

## An Experimental Approach to Compost Addition

An In-Person, Hands-On Workshop  
at  
Swanton Pacific Ranch, Davenport, CA  
Wednesday, June 30  
1:00 - 4:30pm

Previously tilled, now degraded rangelands are unfortunately abundant across California. For these types of sites, might redirecting compost from landfill waste help to improve productivity of rangelands, while sequestering carbon? We're researching these questions at Cal Poly's Swanton Pacific Ranch and invite you to join us as we start our exploration.

Join us for a workshop featuring Cal Poly Soil Scientists **Stewart Wilson** and **Charlotte Decock** along with Rangeland Resource Management Scientist **Marc Horney** as talk about this research and help us learn hands-on techniques to assess rangeland soil health.

### **Logistics:**

Registration is limited: to reserve a spot email Grey Hayes [gfhayes@calpoly.edu](mailto:gfhayes@calpoly.edu)  
Deadline to register - June 23, noon.

**Cost:** no cost- this is a free workshop!

For more information - [gfhayes@calpoly.edu](mailto:gfhayes@calpoly.edu) or 831-227-7163

This workshop is sponsored by Cal Poly and the California Department of Food and Agriculture in partnership with California Climate Investments- carbon cap and trade funding at work.
