STUDENT OPINION FORM

Instructor's Name: _____

Course: _____

Date: _____

22

IMPORTANT: Please use your scantron to answer the following 6 questions with letter responses (A through E). Use this sheet to write your comments.

1. Class Level
- | | | | | |
|----------|-----------|--------|--------|------|
| A | B | C | D | E |
| Freshman | Sophomore | Junior | Senior | Grad |
2. Reason for taking class
- | | |
|----------|----------|
| A | B |
| Required | Elective |

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

3. How well prepared does the instructor seem to be in the subject matter?
4. Evaluate the instructor on his/her ability to convey subject matter
5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS:

Quizzes should be shorter and conducted on a weekly/biweekly basis.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Although I find the posted online PDF version of this course's textbook to be great, I find it troublesome to read the textbook online. I prefer printing the material out and then reading them. Thus, I feel that if you offered a printed version of this course's

OVER FOR MORE COMMENTS

text at El Corral for purchase, students like myself would be much obliged.

COMMENTS: Brian Mealy shocked me as a teacher who actually puts the welfare of students above his own "comfort" as a teacher. He regularly goes the extra mile to help students out, often putting himself in slight peril. He prepares well for lectures and always has tests graded immediately. Some students might not like the pace of the course.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

It's funny and there is alot of bowling involved.

B
Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Mealy was a great professor. He's always willing to answer questions when we're confused. He grades the lab reports based whether or not we seem to understand the material, (not if we're missing a comma / making a grammatical error.) I would recommend him to anyone taking 169 (Get him for 129 too!)

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

(No textbook for lab)

The software, Xilinx was a bit confusing, but that's because it was my first time using it. I imagine that all software with a similar nature also take awhile to get used to.

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Bryan seems well versed in the topics he teaches. The reason for the "good" grade in preparedness comes only from him assuming knowledge. I feel that some classes he began talking about things I had never seen before but assumed I knew them. Overall though I feel he is an excellent teacher and I was able to learn a great deal about digital design. He is approachable and encourages questions to a point that makes questions an important part of lecture and lab. I feel that that is more important than being "well prepared".

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The textbook is written by Bryan. I've used it seldomly and think lecture is enough to learn design. It appears slightly wordy but I'm sure is accurate and helpful.

6. Overall, I would rate this instructor

COMMENTS:

Textbook - It would be nice if there was a printed version of the textbook available for purchase at El Corral or online. It's hard to read digital textbooks unless you're only reading for reference.

Power Point Slides - I feel that you always went over these notes a bit too fast... Never had enough time to copy everything down for my own reference. Perhaps you could post/email these slides online for people to have as reference.

Quizzes - weekly 10 min quizzes would have been nice (maybe more conceptual in nature)
COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Well pleased with the way Mealy ran the class. Very well structured, always ready to answer questions. Having the labs due the next day was a little tough though. It would have been nice to have them due on Monday at least. We do have other classes that require studying on Thursday night, and the lab write ups take awhile sometimes if you want to do well on them.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Inadequate

--

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Enjoyed the class. I could have used more help on labs, but there isn't a lab partner system, which is good, but makes this too individual at times.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- I wish we had a text book
- Class was/is unfair to EE students who have limited experience in programming and operating systems.

- ☒ Evaluate the instructor on his/her ability to convey subject matter
- ☒ Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
- ☒ Overall, I would rate this instructor

COMMENTS:

I really enjoyed this class. Truth be told, though, it would have been nice if it was a little more challenging. I come into class with lots of AVR knowledge and programming knowledge (CPE courses), so I didn't learn as much as I would have liked. Great teaching style, good attitudes!

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

I'm glad we didn't use a textbook - I think not having one made the class more like the real world, where you read specs and learn yourself.

6. Overall, I would rate this instructor

COMMENTS:

Course could have been more structured, but the laid back nature was refreshing. More projects and a quicker start up would be good. If we had the hardware at the start (no one's fault), knocking out the 2 LED programs in one week then moving on to more projects would have been good.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

- excellent professor
- very helpful and approachable
- easy to talk to
- I really enjoyed this course.
- Best professor I've ever had at Cal Poly.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

No textbook since there really aren't any good ones out there. Mealy's notes and slides are quite sufficient

1. Class Level

A	B	C	D	E
Freshman	Sophomore	Junior	Senior	Grad

2. Reason for taking class

A	B
Required	Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS: This class was great. I'm in CPSS (rocket club) and we were building a chip to collect data for mach rocket launches ^{this quarter} Every time I had this class there was a ton of information I could use to help us build the chip and program. Really liked it

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

COMMENTS:

Love the teaching philosophy + sense of humor

Would like to have the ppt up before class

because I like to take notes on them

Looking forward to an EE alternative to 369

Sometimes hard to follow discussion directed to ppl w/ your lab

definitely felt I was missing out

would definitely take you again

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

6. Overall, I would rate this instructor

COMMENTS:

Well, the class was tough... Programming scares me... (maybe cause I'm an EE or something). Seems like the CPEs had a breeze.

But, the Professor is AWESOME and cares about our education. EMBEDDED SYSTEMS PLEASE! Mealy is Da Man! He should clone himself and take over the CPE department. Get rid of em' dinosaurs... though they should be extinct by now, right?

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Textbook(s)? What Textbook(s)? Well, at least the class was a \$\$ saver. Can't complain; too broke to buy books. The class notes were helpful though... but I must admit, they had some grammar mistakes.

Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

very available for questions. I liked having a little flexibility when it came to Lab Report due dates. Labs were challenging but fair.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Textbook would be nice but notes and lecture were sufficient

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS: (*) I think the only thing that should be fixed are the deadlines. I'm happy that Professor Mealy allowed us to turn in the labs late, but I know from this quarter that because of that, we got lazy with the labs and held them off. Do not tell your students that the labs can be turned in later! Puts more pressure on the students to get them done.
(*) As far as the experiments, I think they were perfect in conveying the subject matter and complements the lecture material

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

IMPORTANT: Please use your scantron to answer the following 6 questions with letter responses (A through E). Use this sheet to write your comments.

1. Class Level
- | | | | | |
|----------|-----------|--------|--------|------|
| A | B | C | D | E |
| Freshman | Sophomore | Junior | Senior | Grad |
2. Reason for taking class
- | | |
|----------|----------|
| A | B |
| Required | Elective |

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

3. How well prepared does the instructor seem to be in the subject matter?
4. Evaluate the instructor on his/her ability to convey subject matter
5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS: *Capable, understanding, looks really scruffy*

Mealy > Moore

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

6. Overall, I would rate this instructor

COMMENTS:

Very supportive teacher. Knows the subject well, but doesn't lecture effectively. It's good that we practice a couple design problems in class, but I think he needs to add in more practice problems to the course that will prepare us more to do the labs assigned that day.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The textbook is great. Explains things well and keeps you interested. Equipment in class works great too.

6. Overall, I would rate this instructor A

COMMENTS:

I absolutely loved this class. You made it as simple as possible, giving us all the important and useful things. I feel like I know what I will be using when doing digital design. I feel like I'm a lazy person that wants to do the minimal amount of work to get something to work, and your approach to digital design totally fits with my work style and design.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

(cont.) approach that focuses on simplicity. The text book was amazing. FREE?! Actually interesting and entertaining to read, and whenever I didn't understand something, it would clear up all confusions I had.

COMMENTS:

Overall, a good class for an EE.

One complaint is that there's only one professor teaching 16 different groups. Even though there are 2 TAs, we still need to wait for the professor for more complicated questions.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

STUDENT OPINION FORM

Instructor's Name: Mealy

Course: CPE - 336

Date: 6-1-11

IMPORTANT: Please use your scantron to answer the following 6 questions with letter responses (A through E). Use this sheet to write your comments.

1. Class Level
- | | | | | |
|----------|-----------|--------|--------|------|
| A | B | C | D | E |
| Freshman | Sophomore | Junior | Senior | Grad |
2. Reason for taking class
- | | |
|----------|----------|
| A | B |
| Required | Elective |

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

3. How well prepared does the instructor seem to be in the subject matter?
4. Evaluate the instructor on his/her ability to convey subject matter
5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS:

Very good teaching method how you just wanted us to learn. It takes off a lot of stress about this class and actually has made embedded systems pretty interesting. I feel like now when I go into the workforce I won't be afraid of embedded systems.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

I liked this class Mealy had various experiments that helped us understand important functions of embedded systems and also had us overcome our fear of looking through datasheets, and making sense of them.

☒ 6. Overall, I would rate this instructor

COMMENTS:

You have a great teaching style that is easy to understand. However, I would like to see more guidance in Labs. I feel like often times students get stuck on the same concepts, and you address them individually, which is fine, but it would be more effective/efficient to give longer lectures, maybe a few more code examples, etc

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

6. Overall, I would rate this instructor

COMMENTS:

The course was a good substitute for EE majors. Experiments were ^{more} for EE students and went at a slower pace for EE's who can't code as well as some CPE majors. Interesting class overall.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

COMMENTS:

Good quarter byon! Get a better TA, I thought he didn't really help out, just tended to delete code.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Yeah, you kinda just gave us the assignments and said "here's these resources you need, then had us do the program. Have a "cheat sheet" of c code like you do in VHDL.

I liked how the main course material is the ATmega32 data sheet instead of a traditional text book because it gave us the resource to solve problems on our own like professional engineers.

6. Overall, I would rate this instructor

COMMENTS:

- I enjoy the shorter power point lectures and getting more time to work on the experiments. The studio style class works well.
- Very helpful during lab and office hours.
- I appreciate you taking the time to look at our code outside of class.
- The labs are practical; I think they were the correct difficulty for how little C programming most EE have done.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

STK 500 board is not reliable

IMPORTANT: Please use your scantron to answer the following **6** questions with letter responses (A through E). Use this sheet to write your comments.

- 1.** Class Level
- | | | | | |
|----------|-----------|--------|--------|------|
| A | B | C | D | E |
| Freshman | Sophomore | Junior | Senior | Grad |
- 2.** Reason for taking class
- | | |
|----------|----------|
| A | B |
| Required | Elective |

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

- 3.** How well prepared does the instructor seem to be in the subject matter?
- 4.** Evaluate the instructor on his/her ability to convey subject matter
- 5.** Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
- 6.** Overall, I would rate this instructor

COMMENTS:

Bryan is a model professor, other profs should try to adopt his no-nonsense teaching style and honest criticism of EE department policies. A genuine guy, super helpful. Could not ask for more.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

No oscilloscope at desk + function generator project = dumb.
Also, SDR 500 + ATmega32A not really the best combo. Fire Ahlgren and use his salary to buy non-crappy development boards.

6. Overall, I would rate this instructor

COMMENTS: I found this class to be very challenging, though Brian was the best professor I could have asked for. Even though I had trouble, he was very helpful and excellent in office hours. He truly wants his students to exceed and understand embedded systems. My only issue would be that with so many people requesting his help in class, it was sometimes hard to get the help when needed, and the T.A. wasn't very helpful.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

COMMENTS:

As helpful/nice it is to answer questions in class - answering questions CONSTANTLY from a single person is not productive especially when it is mostly from a single student.

The other students suffer from this obvious delaying / obstruction of lecture so it is best to reduce this tendency to respond to the student.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

STUDENT OPINION FORM

Instructor's Name:

BRYAN MEALY

Course:

EE 522

Date:

03/02/2011

IMPORTANT: Please use your scantron to answer the following 6 questions with letter responses (A through E). Use this sheet to write your comments.

1. Class Level

A
Freshman

B
Sophomore

C
Junior

D
Senior

E
Grad

2. Reason for taking class

A
Required

B
Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Lab assignments were relevant to lecture material. We had sufficient guidance to solve lab problems on our own.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

While I can appreciate it was the first time Mealy taught the class there was a fair level of unorganization. Biggest complaint would be that our last experiment was due before we got any of our previous experiments returned. (The lack of feedback makes it hard to know where you stand.)

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The course feels very under developed, having nearly all the experiments being centered around blinking LED's did not seem to creative.

COMMENTS:

For being the first time Professor Mealy has taught this class, I thought he did an excellent job. The EE department lacks a proper/complete digital curriculum (CPE needs more attention and funding), but Bryan did what he could with this class to get the digital curriculum moving in the right direction.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

As noted, the EE Dept. needs to do a better job funding the digital labs and supporting CPE. Students need access to modern development boards and proper tools (in-circuit emulators, etc.)

COMMENTS:

Bryan was a very laid-back prof. In class, I understood absolutely everything he was trying to explain, but it was usually @ such an awkward pace that I had to either speedup or slow down my thinking process. Also, he expects you to have read the book before class, so he would leave things out + the people who obviously didn't read would ask 1000 interesting questions.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Text was great; only had things we would actually need to know.

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS: This course is the first I've had that truly lives up to Cal Poly's "learn by doing" credo. Applying what we learned three times a week made it very easy to internalize the new ideas that were introduced.

Mr. Mealy was fantastic. I've never met a more approachable professor. He NEVER gets frustrated with students, and his explanations are clear and concise.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

One of the best college text books that I've ever read. The explanations are straight forward with absolutely no fluff. The humor made it more readable as well.

6. Overall, I would rate this instructor

COMMENTS:

Bryan is extremely knowledgeable about Digital Design and it reflects in class. He is always able to answer students questions in a way that they will understand. He is very approachable and likes when students ask questions. Bryan presents all the subject matter in a way that is not intimidating and easy to understand. During office hours he is willing to review concepts that the student did not previously understand or is confused about. Professor Mealy cares about his students he even brought us cookies one day. Thank you. They were tasty!

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The textbook was easy to understand, the examples are thoroughly presented without being boring (Always a plus.) As far as Xilinx goes it can be frustrating. Why are we using such an old version since the current version is 13?

STUDENT OPINION FORM

(15)

Course: _____

Date: _____

IMPORTANT: Please use your scantron to answer the following 6 questions with letter responses (A through E). Use this sheet to write your comments.

1. Class Level

A
Freshman

B
Sophomore

C
Junior

D
Senior

E
Grad

2. Reason for taking class

A
Required

B
Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

I think making lab reports due would push students to learn the material more

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

| Required | Elective |

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

- 3. How well prepared does the instructor seem to be in the subject matter?**
- 4. Evaluate the instructor on his/her ability to convey subject matter**
- 5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)**
- 6. Overall, I would rate this instructor**

COMMENTS: For labs, a mixed system of some labs required and some not would be good. The labs you deem are more important than others. Any other lab is optional to turn in. The way labs are now are good because it allows students to work on the labs on their own time, so if other classes are piling up, you can push labs to due later.

As for lecture it would be nice to have more examples and in your lectures you should stop saying "this isn't really important."

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Textbook is good, very nice having a digital copy.

It makes it hard to know what to study/know

6. Overall, I would rate this instructor

COMMENTS:

- Lab reports should be done but 25 labs or w/e is too many.
- office hours aren't on Tuesdays and Thursdays. Too hard to get to MWF ones ~~some~~ most cases.
- Tests are very challenging. Vocab is really hard to learn from text.
- too much superfluous info

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- Too much reading in textbooks

- Great instructor overall, nice and friendly and knows material / explains it well. & "

- 4.** Evaluate the instructor on his/her ability to convey subject matter
- 5.** Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
- 6.** Overall, I would rate this instructor

COMMENTS:

Course was very well organized and fun. However, some grade assignments activity could have been appreciated as some material had to be practiced in which some credits could have been taken from the final for the homework as this would encourage students to practice material more.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Textbook was helpful and very relevant to the course.

COMMENTS:

I really liked the relaxed environment of the class that didn't force me to do lab reports or homework, so I can work + study at my own pace and leisure instead of doing it because I have to. This, of course, is a double edge sword and I wouldn't have mind if every other lab report was due so I could get practice writing those, and some mandatory homework might have motivated me to do more problems, but I'm responsible enough. So I studied my own way.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Text book was nice! Very easy to understand (for the most part) and written informally so I wasn't overwhelmed with the straight forward and boring technical jargon. The book explained what the labs/lectured may have missed.

STUDENT OPINION FORM

Instructor's Name:

Bryan Mealy

Course:

CPE 233

Date:

IMPORTANT: Please use your scantron to answer the following 6 questions with letter responses (A through E). Use this sheet to write your comments.

1. Class Level

A
Freshman

B
Sophomore

C
Junior

D
Senior

E
Grad

2. Reason for taking class

A
Required

B
Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Bryan is incredibly smart and really helps with specific questions, but is horrible at conveying information. His lectures are cryptic and seem pointless. Saying "Massively important" every other slide isn't helpful.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

COMMENTS:

Great instructor! Understands that students have priorities and other pressing classes. Always ready to introduce new topics, always willing to help students.
HAS TA's! Man they are so helpful!

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Great book, too bad it honestly isn't used much.
Good overall undergrad course.
Would highly rec. instructor to others!

A Excellent	B Good	C Average	D Poor	E Inadequate

3. How well prepared does the instructor seem to be in the subject matter?
4. Evaluate the instructor on his/her ability to convey subject matter
5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS:

Good # helpful lab assignments
 Good examples done in class. The overall structure of the class was somewhat scattered, expectations of the instructor were at times lost on me. Material presented seemed a little disorganized.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

There were several sources of info provided on PolyLearn which was helpful. My only suggestion would be to include a text written by additional writers.

COMMENTS:

Overall great Prof

- made material seem easy
- went through material quickly, but made sure everyone was clear before moving on
- Very approachable and easy to get along with

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The fact he wrote all the learning material really allowed for great explanations from him and very clear instructions for the labs.

Also: The TAs were awesome
(Sam, Alex, Andrew)

COMMENTS:

I like that you put all the slides in poly learn, though I would've liked more descriptive names so I know which is which.

More examples of questions that would be asked in exams and quizzes, and the ones that were presented were gone through way too fast.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

A more concrete textbook to look through would've been very helpful.

At the very least I would've want more references for

material for more information

3. *How well prepared does the instructor seem to be in the subject matter?*

4. *Evaluate the instructor on his/her ability to convey subject matter*

5. *Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)*

6. *Overall, I would rate this instructor*

COMMENTS:

Material was well presented and easy to understand
The quizzes gave a good view on how well we understood
the material, but were not unnecessarily harsh.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Apart from the RAT manual, none of the texts felt necessary
for me to understand the course material

The no test thing is kinda scary because I have no idea what is on the final. But there are practice ones online so its fine. I liked how the class was this quarter.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

STUDENT OPINION FORM

Instructor's Name: Bryan Mealy

Course: CPE 133

Date: 6/5/13

IMPORTANT: Please use your scantron to answer the following **6** questions with letter responses (A through E). Use this sheet to write your comments.

1. *Class Level*

A
Freshman

B
Sophomore

C
Junior

D
Senior

E
Grad

2. *Reason for taking class*

A
Required

B
Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. *How well prepared does the instructor seem to be in the subject matter?*

4. *Evaluate the instructor on his/her ability to convey subject matter*

5. *Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)*

6. *Overall, I would rate this instructor*

COMMENTS:

I enjoyed the new style for the class because it allowed me to focus on learning and understanding the material instead of cramming for quizes and tests.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS: A great class, My favorite this quarter. A few things:

- I would have liked more theory, the hands on portion was great but some more depth into the theory behind topics would be great.

- No lab reports was good ~~but~~ but I might have preferred a midterm. I can't really say, depends on how the final goes. :o

- I wish we had done experiment 19, or something with the logic analyzer.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

6. Overall, I would rate this instructor

COMMENTS:

I really liked that there were no Lab Reports due because it lowered stress & gave more time to implement more designs & VHDL modules. I don't retain as much information under stressful environments like most labs so I really liked that this one was more lax & he genuinely cared just abt us working hard to learn the material.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Mealy
CPE 233-03/04 (14)
Winter 2013

STUDENT OPINION FORM

Instructor's Name: Bryan Mealy

Course: CPE 233
Date: 3/13/13

IMPORTANT: Please use your scantron to answer the following **6** questions with letter responses (A through E). Use this sheet to write your comments.

- 1.** Class Level
- | | | | | |
|----------|-----------|--------|--------|------|
| A | B | C | D | E |
| Freshman | Sophomore | Junior | Senior | Grad |
- 2.** Reason for taking class
- | | |
|----------|----------|
| A | B |
| Required | Elective |

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

- 3.** How well prepared does the instructor seem to be in the subject matter?
- 4.** Evaluate the instructor on his/her ability to convey subject matter
- 5.** Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
- 6.** Overall, I would rate this instructor

COMMENTS:

Cool

Mealy, enough said

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Instructor's notes are thorough and organized,
notes on RATSIM are still developing

Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Bryan Mealy has inspired me. He gave me hope for my major. In class with Mealy feels more productive than any of my other classes. I actually feel prepared for a job in this field.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

He is awesome 1-on-1. He rushes through the lectures so students can get straight to work. He doesn't waste time telling students things that are hard to explain w/o learn by doing. "This stuff will make sense when you do it." Questions were easily answered by Bryan or the TAs. One was kinda bad though, maybe better TA selection.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Bryan should lecture more and explain how things work. It is very difficult to grasp the material in the course solely through "learn by doing."

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

6. Overall, I would rate this instructor

COMMENTS:

Flexible deadlines for experiments are great, however 11 experiments and a final project is a bit too much for 10 weeks. My lab partner and I are very pressed for time to finish everything. Weekly quizzes would've also been helpful. I know you don't like to give quizzes, but perhaps they could be ungraded? Something to actively review the lecture material and be more prepared for the final.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Great online books/materials for the course (although there are quite a lot of typos haha)

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Seems unprepared for class. Projects were not managed well, or assigned in meaningful intervals. The class structure that was OK in the beginning broke down early. The 70% final only seems to be a workaround. Was very helpful and responsive when asked questions directly.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Labs need to be spellchecked/proofread. Some things are almost impossible to understand.

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS:

The class needs more structure. I know that is not how Mealy likes to run this class but we need it. A majority of students cannot prioritize without due dates that's just the reality of college life. We will prioritize with what is actually due. There should also be quizzes on the reading. I believe Mealy will then see a significant increase in students' understanding of material.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

I appreciate that the textbook was provided. Mealy does a good job of providing useful class material.

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

- 3.** How well prepared does the instructor seem to be in the subject matter?
- 4.** Evaluate the instructor on his/her ability to convey subject matter
- 5.** Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
- 6.** Overall, I would rate this instructor

COMMENTS:

Great instructor. Helpful in answering all questions from design to implementation. Always easy to approach, and fair with all expectations/deadlines. Good amount of supporting material on pplylearn.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

He explained the material very well and all of his experiments were useful in exploring the different concepts we came across.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

It was awesome that rather than making us buy a textbook, he wrote his own and put it up for free.

Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A
Excellent

B
Good

C
Average

D
Poor

E
Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Too many ~~projects~~ experiments. Should assign homework and have ~~less~~ a proximately 15 experiments instead of 24. Bryan is very helpful & so is his TA's. Great teacher. Should maybe engage students a little more with homework. (a bit very hard to be motivated in this class cause no midterms or quizzes)

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

Mealy is a really nice professor. However, the final is 80% of our grade but the teacher skims over the material very lightly in class, hardly teaching. It would be more effective if there were more opportunities to teach & practice what we learn in ways other than just programming.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

4. Evaluate the instructor on his/her ability to convey subject matter
5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS: Bryan Mealy is a dream come true. He knows the material and can very effectively teach it. The way he has designed CPE233 is unique and works. I'd love to see CPE233 as a model for CPE and EE classes in particular with regards to ① the teacher written materials instead of a text ② weekly assignments that work toward a quarter-long project

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

I think the large class size made it difficult for students with less experience. I saw some students especially struggling and I think a smaller class size would have given them more hands on time, reinforcing class concepts

Bryan is an awesome instructor! He conveys the information well, and does very little hand-holding. I learned a LOT, and appreciated the freedom. He rocks! (There should be another continuation of the 133-233 series, too. More digital classes!)

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The textbook is great: it's clear, informative and the information is presented interestingly. The lab could have more TAs or something. Waiting for ages to get a simple question answered THANKS.

4. Evaluate the instructor on his/her ability to convey subject matter
5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
6. Overall, I would rate this instructor

COMMENTS: The idea of what you don't know at the beginning does not mean that you don't know at the end is good. In fact, having only 1 final test make me delay studying until the final exam. I suggest to have 2 mid term & a final exam, and the grade is based on either final exam score or the average score depending on which one is higher. A funny TA also helps me to attend the class every day :>

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

2. Instructor Evaluation

2.5) COMMENTS:

- Best professor I've ever had.
- Brian does an excellent job helping out students and lectures the material really well. Overall, I became a better programmer after this class.
- Bryan is an excellent professor. He pushes his students to evaluate problems and design well thought out solutions. He encourages clever thinking and is VERY helpful when one asks him the right questions.
- Bryan was probably one of the best teachers I have had at Cal Poly. He was extremely helpful answering our questions while doing the labs. When answering our questions he also did a great job guiding us towards solutions and helping me understand the material. The one thing I would want to change about this class would be more in depth lectures. I was not dissatisfied with the lectures this quarter, but I personally would have liked them to be a little more in depth and slower paced.
- Fantastic professor. I wish this professor taught every EE and CPE class. Easy to understand and very fun
- Great instructor!
- Mealy was incredible, probably my favorite professor so far. This class was a lot of work, but he was always very helpful and didn't leave anyone until they figured out their problem.
- New the topic extremely well and was always very helpful
- Not quite sure why virtually all of the grade is determined by the final. This is very unfair. I also do not agree with the flipped class setup. Learning should be done in lecture not at home by reading 5000 pages.
- One of the best professors I've had at Poly.
- This has been one of my favorite classes that I've taken in college so far. The material is interesting and I have an incredible amount of respect and admiration for Bryan. It was a joy to attend this class every week, and I am genuinely sad that it's over.
- This is my favorite class. I feel like I learn so much. Lecture are short and to the point. Labs are interesting and lab questions force you to understand the material. There is no required homework or due dates for the labs, which is really nice and forces you to stay on top of your work. The workload is very reasonable but can add up if you don't stay on top of it. Mealy is very helpful, both in lecture and one on one with labs.
- Very good professor, a lot of work, but I've learned a lot.
- YOU'RE THE BEST GODDAMN TEACHER MEALY, BUT THE LABS ARE TOO MUCH DAMN WORK.

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- Awesome class
- Book is excellently written and priced.
- Book is good, didn't read it fully though as its not required. The printer is god awful.
- Book was very verbose and hard to read.
- N/A
- Overall, the textbook was good and did a good job explaining the material. The computers in lab were pretty solid all quarter and we didn't have many issues with them. The Nexys board I checked out from the department works fine.
- Textbook is helpful and necessary for gaining information about what is gone over in class.
- Textbook is super helpful and interesting/easy to read, with lots of helpful examples.
- The book is great. Easy to read and understand
- The books were ok

- the textbook was extremely useful, and easy to understand the material.

2. Instructor Evaluation

2.5) COMMENTS:

- Awesome guy who really knows his stuff, but the class may be more laid back than desired.
- Great course, great teacher. Only recommendation would to implement some sort of quiz to enforce students do the reading.
- I really enjoyed CPE 233. The "lecture" can be a bit light on material and somewhat disjointed at times, but the labs with Bryan's help more than make up for that. Some of the material is abstract, and really just needs to be played with get a good grasp on it.

There is definitely a lot of work to do, especially in conjunction with EE 306 and EE 228. Coupled with a lack of Saturdays due to the Mustang Marching Band and ISE's fickleness with Windows 8 and 10, my lab partner and I are definitely scrambling to finish all the labs. Then again, many of the other groups are scrambling as well, so we're not alone.

I would suggest potentially including a simple lab 0 in the very beginning to just remind us how VHDL and our Nexsys boards work before we jump straight into new material, especially since we haven't touched VHDL for 2 quarters.

To the CPE department: May I strongly suggest not putting CPE 133 and 233 a year apart? The Spring and Summer quarter gap (I took 133 winter quarter last year) made jumping back into VHDL difficult, and really set us behind the optimal lab completion pace.

- Lectures were sometimes hard to follow but extremely helpful during office hours
- Mealy is a little scattered, but he really knows what he's talking about.
- Mealy is an expert on the platform, which he should be, because he created it. I don't like how little the lab experiments impact the grade, and how heavily the class is based on the final exams
- Mealy is the nicest and yet probably most brilliant professor I've had yet, I'd say. Super intelligent but extremely capable of explaining complex concepts in easy-to-grasp ways.
- Not a fan of powerpoints, but he makes them interactive so they are a bit instructive. He also is somewhat responsive to emails - though not as much as I would like.
- Really awesome professor. Super responsive to emails and very helpful.
- The class itself is hard, the things that are learned are cool, the teacher himself is really god but just the size of the class and the difficulty levels of the projects take his attention.
- There are too many experiments assigned in this class for the time allotted. Combining/removing some of them would make the class FAR more effective.

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- Every other class's textbook should take this class's textbook as a near PERFECT example.
 - I like that the books are free
 - Textbook needs work. But he supplies a lot of course material to compensate for that.
 - The book is pretty good, and free so that's great.
 - The equipment and textbook were all great.
 - The material presented in this class is very interesting, and Bryan is another factor that increases many students' love for the class itself. I understand there is a lot of material to cover within 10 weeks, and the labs help with that but I feel that some of the deliverables for each of the labs take an unnecessary amount of time. The questions in the lab manual are very crucial to enhance understanding of the subject, but these questions are often lengthy and there are many to complete per lab. Also, I feel that there are some TAs that are not as qualified as expected to answer questions when Bryan is busy.
 - The textbook is great, and I really appreciate that it is made available as a free pdf. This is my preferred way to access textbooks.
- I hope the Basys/Vivado trial in CPE 133 is going well, as ISE's poor support for newer versions of windows made it difficult to work on labs outside of class time, as I only have windows 8, and my partner has Windows 10. The extra time would definitely have helped us complete the labs in a more timely manner.
- This teacher knows his audience when writing this book.

- Very good documentation for everything in the class.

2. Instructor Evaluation

2.5) COMMENTS:

- A lot of labs
- Bryan is a great guy who is dedicated to the efforts of his students.
- Great guy, always helpful. Very understanding and open to ideas. Always to the point, which I really like.
- Great teacher, clearly gives a crap about his students and is definitely knows how to convey the subject matter effectively.
- Great teacher, would take again. Always willing to help the students and encourages them to think out of the box.
- He really cares about his students and their wellbeing.
- He's an OG
- Kind of wish there were quizzes to see if I'm understanding the subjects well enough
- MEALY!
- Mealy knows the material completely. If you have a question, you just need to know how to ask and you will get an answer. Sometimes the lectures go too fast, but he is ready to help and clarify anything.
- Thank you Bryan. I'm afraid I'm supposed to get this turned in by June 5th so I cannot wait until after the final to make this evaluation. I really liked your teaching style, it was different but good. I read some of the textbook, mostly in the first half of the quarter, and now I worry about the finals because I haven't been doing the reading. At this point I'm really not sure how important reading the text is because it's hardly ever stressed.
- Very helpful if stuck or have questions. Is straight forward about what you need to know/what is important.

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- Bryan provides all the necessary materials for one to learn the subject online and coupled with Benson's Youtube lectures, this makes for a very comprehensive class.
- Did not use or need a textbook, and his teaching ability more than made up for the lack of textbook.
- Free! :)
- It was written by Mealy. I think it is explained better than it could be in other textbooks.
- Labs were great, difficult, and fun.
- Really enjoyed this class and how it was very lab based. Instructive and fun experiments.
- Textbook was excellent and related very closely to the subject matter
- The book was to the point, which I liked. It only told us what was necessary and the tone was relatable.
- Worried about finals being 80% of grade. I feel like I can design a circuit in VHDL with the cheat sheet but the lecture final scares me. I'll do a practice exam or two but yeah... kinda panicked. Maybe having some optional in tests in class would help us get a feel earlier when we don't think about finals at all like in week 5 or 6. Or having a take home quiz that is graded based on completion would be awesome too. That way we can get some practice in for sure, not having to spend money on ink, and you still wouldn't have to grade a bunch of papers. Thanks again Bryan, I've enjoyed the class a lot.

2. Instructor Evaluation

2.5) COMMENTS:

- Bryan is very clear about expectations in class and communicates concepts very well.
- Expected us to learn most of the material from the textbook, but I learn much better from lectures. The short lectures weren't really helpful for me because he went so fast, but the slides were helpful to review afterwards. He was really helpful one on one. Also the labs were a little too dense. We spent at least 3 hours each week outside of class working on the labs, and we still were consistently behind. I think having even one less lab would be good. The fact that there's only one final is really stressful. I think it would be better if we had a chance to see what we needed to improve on with at least one midterm.
- I appreciate Mealy taking the time to help every lab group. He understands student frustrations when codes are not working properly. He lectures fast but always answers questions by students. An interesting way how he goes with class: no quizzes and midterms. You can submit labs anytime. If you wanna learn and pass 233, you gotta do the work.
- I liked how he had everything for the quarter posted on Polylearn from the beginning of the quarter. Mealy is very helpful during lab. He also grades fairly on lab submissions. Besides the lab submissions and final project, the final was worth 65% for our course grade. I feel that this is unfair given the amount of work and time spent in the class doing the labs. A final worth more than half of a course grade puts a lot of pressure and anxiety on his students. Overall, I do feel like I learned a lot in his class, but I think his final should not be worth as much as it currently is.
- I loved this professor, but I do wish there were more things to be graded other than just labs. Weekly quizzes would have really helped me know what I should be comfortable with for that week.
- I think the teaching style provides a great learning environment and leaves room for creative thinking. I did not get what I wanted out of the class, but that is due to me focusing on other classes more than this one (just because that's the way things go sometimes). I appreciate the book and will probably be reviewing that at some point because I do enjoy it. Thank you.
- I would prefer CPE 233 to have a midterm midway through the course, instead of end-loading 65% of the course grade during finals week. He was very knowledgeable about the material and helpful too. The lectures were short and fast, I wish they were longer. Overall a very good professor.
- I would prefer to have weekly quizzes for this class because it helps stay on track with the material.
- Mr. Mealy is a good professor but I believe he needs to assign homework. I see many students not doing the suggested reading to understand the material and relying entirely on his lecture to try to understand the material.
- Overall, I would say that Professor Mealy is an intelligent and very kind individual. He was very helpful during lab always doing his best to answer any question or address any problems that we might have. I would have appreciated if he had presented his expectations and introduced his material in a slightly less ambiguous manner so that the students had a clear understanding of the topics that were being covered and their relative importance to the lecture final. The lab final material was presented very clearly and concisely.
- Probably one of my top 5 teachers at cal poly. On of the most sensible men I know that only thinks about the best for his students. It'd be a crime to not give the man credit for his work. He expects a college level discussion and thinking process and helps develop where you lack.
- There are a lot of materials to cover in this class, and the professor did the best he could in the short amount of time that we had. He always asked if we had questions. Even when he knew the students were not going to ask him a question, he still asked. When I did ask him questions in class, he was able to answer everything from easy to hard questions without hesitation nor judging on what we did know or did not know. It was a very good learning environment instead of wondering if I should ask this question or not. The best class and professor I've had at Cal Poly.
- This is now my favorite class, I've learned so much from the experiment and how the general idea of computers work (or at least CPU's in a broad sense) as well as what it means to program in an assembly language.

I have to say, the transition into writing assembly language was a little too brief, it seemed like we were supposed to have seen/used assembly language in CPE 133 and that was not the case. Otherwise, the class seemed to fit scheduling quite snug, these last few experiments (#9-12) are a little rushed, but if given the attention outside of class, they seemed to be manageable.

I wish there were one less experiment in order to really have the freedom to work on the final project and make something amazing.

Otherwise, it was a wonderful class and whenever I had questions, Prof. Mealy was able and ready to help! Thanks!

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- Awesome textbook. Very informative, concise, and good descriptions for all MCU modules. Reading the assigned chapters before coming to class gives you a better understanding in lecture. Some modules provided in class work well with the Nexys 2 board. Highly recommend

the EE or CPE department to provide Nexys 2 boards or configure the lab code to work with Nexys 3.

- He wrote the book. He didn't charge 150+ for it. Thank you sir.
- His written books were very informative and useful. It would be nice to have a solutions manual for the book problems, there was no good way to check the answers except contacting him or TAs (especially the RAT programming in ch 14).
- I really don't like the studio classroom for this class. It's really awkward trying to take notes on his lecture because the tables face away from the front of the classroom, and the lectures often take away from the lab time. I would much rather go to an hour lecture, then have a 3 hour lab for this. We ended up spending countless hours on the weekend doing labs that may have been possible to do in class if we had a full 3 hours.
- I used the textbook spastically throughout the quarter for reference; however, I plan to use it extensively in my studying for the upcoming lab/lecture final (worth 65+% of our final grade). The laboratory computers worked but for later experiments took a considerable amount of time to compile the project. The lab materials (RAT Activity Manual, RAT Assembler Manual, etc.) were helpful but their usefulness and appropriateness was not clear until a week or two into the quarter because most of the resources were presented haphazardly if mentioned in class at all.
- Mealy's textbooks are very useful in learning the subject. I learned most from this class from doing the reading. The studio setup in the classroom was fine.
- Textbook is really great.
- Textbook was written by this professor and it was absolutely amazing
- The FRCD texts are complete and concise. They are very useful to understanding the material.
- The book used was great and helped with the course material.
- The professor provided the textbook in pdf form for free online. This was the first time in my college career where reading the textbook helped me with whatever I was learning/doing in class. The textbook was applicable, and if I did read, I often found myself getting ahead of my peers just because it was my second time seeing the materials. The lab experiment questions were definitely helpful and might even say sometimes more important than the experiment itself. The questions were very thorough, and really made easy for me to see if I understood the material or not.
- The textbook was written at a level that is easy to understand and it was helpful for doing most of the experiments.
- The textbook was written by Prof. Mealy and so it seemed to make the class less intimidating since the author was right there to figure out what might have been an issue.

I must say, I didn't follow the reading (which I regret, honestly). However, the questions, albeit sometimes vague and could use diagrams or further clarification, were thorough and helped to understand what we were supposed to find out and understand.

Lastly, iSim could use an update, which I've heard may be in affect? maybe? but all the software was provided and fair.

- Used the textbook all the time

Inadequate☒ 3. How well prepared does the instructor seem to be in the subject matter?☒ 4. Evaluate the instructor on his/her ability to convey subject matter☒ 5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)☒ 6. Overall, I would rate this instructor**COMMENTS:**

Prof Mealy truly cares for the success of his students, but it becomes difficult for him to handle such a large lab because of the nature of CPE 233. Consequently, many students have had a hard time in the class, to no fault of Mealy. Mealy goes above and beyond what is expected of him, by answering emails over the weekend or whatever it takes.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

COMMENTS: Great textbook, I wish I would have done the readings from the start rather than doing it all at the end.

Maybe a midterm wouldn't be so bad, so we aren't overly stressed for two finals that are worth 65% of our grade.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

COMMENTS:

Good instructor, the only thing is that you need to ask very specific questions in order to understand what's going on, he won't just hand it to you. very helpful in lab, but slightly inconsistent with grading. It's also stressful to have all ^{of} the grades in the class rely on the final. Cool guy though

☒ 6. Overall, I would rate this instructor

COMMENTS:

Mealy is a great instructor who can clearly convey the material, Very helpful one on one and spends a lot of time helping students actually understand the material.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

There are a lot of Experiments. Maybe reduce by one or two.

Also, A smaller class size would allow Mealy to help more students and increase the amount of students actually learning the material.

COMMENTS:

Mealy is fantastic - he obviously cares deeply about his students' success & well-being and is extremely helpful in lab. He is knowledgeable and has an intimate grasp of the material in CPE 233. His textbook is great too.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Unfortunately, having a large number of benches in 233 meant that Bryan was only able to help us a few times during the quarter, which was somewhat frustrating. TA's were skilled, though.

COMMENTS:

Bryan is an interesting, canny, passionate, and knowledgeable professor. He definitely knows what's going. Bryan's passion for CPE is evident by the way he talks about CPE. Also, he is very passionate about student's learning. He has extremely helped us with our labs when he wasn't busy with everyone else (back).

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The textbook is written by Bryan. It is EXTREMELY important to read the textbook, which Bryan notes in his syllabus. All the necessary documentation is available on polylearn and Bryan has done a great job pointing them for our use.

6. Overall, I would rate this instructor

COMMENTS:

Professor Mealy is great. He wants students to actively take part. I do wish though that there is no homework & reading section. The lab already required a lot of time out of class that was difficult and fun.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

I enjoy the textbook but don't have time to read it :-

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

- 3.** How well prepared does the instructor seem to be in the subject matter?
- 4.** Evaluate the instructor on his/her ability to convey subject matter
- 5.** Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)
- 6.** Overall, I would rate this instructor

COMMENTS:

Ten lab assignments along with a final project require a great deal of time spent trouble shooting instead of learning how the RAT works as a whole. I have had hardly any time to code in assembly as well and don't feel prepared for the final exam.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

The text was very helpful, but if I spent time reading it then I would not finish the labs on time.

6. Overall, I would rate this instructor

COMMENTS:

No Quizzes³ which was nice but I feel like they would have forced me to read. Often didn't really follow the lectures because they were fast paced & I'm scared to ask millions of questions because then the smart nerds would know I wasn't one of them.

Also I had a weak background from 133 because that teacher was bad. Labs were good for learning though. Mealey is still a Boss though.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Great textbook, when I would read it if I had time. T.A.'s were super helpful too.

6. Overall, I would rate this instructor

COMMENTS:

The instructor was a great professor. Always running to help the students.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

There are too many students in the classroom!
There is not enough time for everyone to get help
and makes the class hard!

A	B	C	D	E
Freshman	Sophomore	Junior	Senior	Grad

2. Reason for taking class

A	B
Required	Elective

INSTRUCTOR EVALUATION: Your thoughtful comments about your instructor and the course are very important. They are used by your instructor to improve his/her effectiveness in class where needed, or to emphasize his/her strengths. They are also used by his/her peers for personnel evaluations.

Answer the following questions on your scantron with the following letter scale:

A	B	C	D	E
Excellent	Good	Average	Poor	Inadequate

3. How well prepared does the instructor seem to be in the subject matter?

4. Evaluate the instructor on his/her ability to convey subject matter

5. Evaluate the instructor on his/her availability and effectiveness during scheduled office hours (if unknown, leave blank)

6. Overall, I would rate this instructor

COMMENTS:

"it's really important that you understand this slide"
Most of the time when you say this, you also spend very little time on this slide and only vaguely explain it.
Lots of repetition in assignments. Time-consuming. My group got almost 2 weeks behind due to problems with Exp 8+9.

COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- He is very straight forward in his expectations. He also will not leave anyone in the class behind if they ask for his help. He knows his information and stresses the concepts rather than vocabulary. Overall he is a great professor.
- James is an amazing teacher. He works so hard to help students and seems to love the work he does. Always friendly and approachable.
- Mealy breaths this subject. His knowledge is vast and is great at explaining subject matter. He is especially helpful during 1-on-1 interactions, where we can fully take advantage his knowledge. He cares deeply for his students (every day after class, he sits with one of my classmates who is having trouble in class and helps her with any questions she has for over half an hour).
- Mealy clearly knows the material and can be quite helpful when you know the questions you need to ask and are not afraid to ask 'dumb questions' during lab time. However he struggles when explaining concepts during lecture. This difficulty is due to his knowledge and comfort-ability with the material. Some concepts he knows so well and some intricacies seem so obvious to him that he will breeze over them leaving students confused and will not realize that they did not understand.
- Mealy is good instructor, however i feel he can do better when explaining the material. meaning he assumes we know everything in the course despite not having been thought.
- Overall good instructor, he wrote the textbook so he knows everything there is to know about the course
- Professor Mealy is clearly very intelligent and understands digital design and assembly language very well. However, he speaks very quietly during lectures and the slides on the projector have very small font and I can never read it. He asks a lot of questions during the lecture and does not reiterate what the correct answer should be after rambling on for a few minutes.
- Professor Mealy is extremely helpful during class and outside of class. He always responds quickly to any questions by email, and he expects the students to manage their own time and workload, while providing the support we need.
- Professor was extremely knowledgable about the subject matter and he worked hard to convey it in a manner that everyone would understand.
- Pure genius.
- This guy cares more than just about any instructor I've ever met. The material is a little hard to wrap your head around at first, but James is super helpful when it comes to explaining how to approach something, and he puts in a tremendous amount of time when it comes to debugging and fixing student code. Honestly, he's got the job that at least three professors should have because he's just so busy trying to help everyone. The lab itself is over-populated and could use some revamping--all James can do is apologize for not being able to help us as well as we may need. That shows an instructor that cares. He's by far one of my favorite dudes I've ever met and I genuinely hope to be able to take other classes with him in the future. Also, he's just such a nice guy. I enjoy being in this class.

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- A lot of material to cover in 10 weeks
- I feel that experiment one could have been simpler while still effectively re-acclimating us to VHDL and the Vivado environment. I rather would have spent the extra time we had to put into experiment one, working on a final project.
- Loved the style of the class one giant project split into 11 smaller sub-sects.
- Textbooks are pretty helpful, but he wrote them so its not very surprising.
- The book is amazing and the class was fun but James gets sadly overwhelmed by the lack of help from the administration. If there was more support like TAs or just other help this course would be perfect, but because James can only help so many people at a time the class can get hard. Come on guys help him out he is an amazing teacher!
- The course material was all very up to date and appropriate for the class. When errors in the text were found, the professor would correct them promptly. The equipment seemed to work just fine.
- The textbook and activities were written by Professor Mealy, and given out for us to use for free, and I am grateful for that.
- The textbook and lab manual were both used very often and were very helpful. However, it would be EXTREMELY useful if the textbook had solutions to the practice problems because it is a waste of time to practice without knowing if we are getting them right.
- The textbook, activity manual, and RAT assembly manual are all amazing. They're some of the most helpful textbooks I've ever used, and it's awesome that James is constantly updating them and improving things. I really wish other classes and labs were like this too, because

it definitely shows when effort is put into designing the labs we do. Effort is definitely required to learn this material, but when we do our part, James makes it easy to understand what's going on and succeed. This is interesting stuff and I enjoyed the class more than I thought I would. There could be more instructors or TAs in the lab, though. That's some bullshit right there.

- textbook and subject matter are fine, but the class is very hard to not get behind in
- the entire series was difficult because the text book contains vague examples.

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- He really cares about his students, and is extremely helpful every time you ask him questions. He's awesome!
- Great guy. Really cool and his attitude about the class and the assignments is refreshing.
- Great instructor. Extremely knowledgeable in the subject and explains the abstract concepts of computer design very well.
- Instructor is very knowledgeable about subject.
- Knowledgeable and helpful in class and office hours but didn't explain material as well in lecture.
- Mealy might actually be the best professor I have had during my time at Poly. He treats the class like a work place, where he gives you the information you need, gives you an assignment, and lets you work and complete your assignments at your own pace. This means that if you procrastinate, you won't finish all the assignments, but I like that, because it also teaches time management and responsibility (two very important life skills).
- Prof. Mealy has a very fluid teaching style that I appreciated. It was very different than many other professors I have had, yet I enjoyed the freedom in the lecture to ask questions whenever. I appreciate how Prof. Mealy always asks the class if there are any questions because he wants everyone to understand the material as well as possible.
- Professor Mealy is one of the most dedicated teachers I've ever met. He always puts his students first, and will go out of his way to make sure all of us succeed in his class. With the labs, he is very helpful and knows how to explain concepts and ideas so that everyone is able to understand what he's saying. It is a very cool environment to work in, because of the fact that he treats his class like a work place--he gives us a project with a deadline, and if we need help along the way, he is there for assistance. Overall, his teaching style was very effective and it was one of the classes in which I learned a lot from in a single quarter.
- This course was definitely difficult and confusing, but I blame the subject more than the instructor. The instructor was extremely helpful when asked for help during class though the lectures themselves were very confusing.
- Very knowledgeable professor who knows the material inside out.
- good

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- I really like that we didn't have to buy any textbooks for this class. The material was structured well, and it served as a great reference.
- All the material was easily found and used.
- Books are extremely helpful. They perfectly correlate with the subject matter in class.
- The class teaches a lot and is a good time. This was one of the best classes that I have taken at Cal Poly because of the instructor.
- The textbook recommended was extremely helpful. I don't typically use textbooks to learn, but this textbook was very helpful in the course.
- This course is an essential part of my field of study. The textbooks and other material were very effective in teaching about the subject.
- This was a tough class with many labs, much more than most other CPE 233 classes. I find that not as fair, as other classes have more lecture time, and thus, have a better grasp of the material. There are too many lab tables, and the professor was not able to help many lab groups that needed help, simply because he was overwhelmed with groups asking for help.
- While there is a lot of content in 233, I feel like it is all beneficial content and thus should be maintained. However, I do wish RATSIM worked a bit better and did not bug out when I was writing my assembly code.
- good

Comments Report

2. Instructor Evaluation

2.5) COMMENTS:

- Explains topics like he expects us to know all the topics / vocabulary that he never explained. Doesn't fully understand questions.
- He is a very funny and interesting professor who genuinely cares about the success of his students.
- Bryan is well prepared and is an effective teacher.
- Bryan was a great professor and was very understanding to student needs and loved helping my fellow students as well as myself. He gives you all the tools and information necessary to be successful in his class.
- He's good. Stuff's a bit unclear at first, but you just have to work through it.
- Really knows what he is talking about, keeps the topics engaging and helpful. only problem is he goes slightly too fast with subject matter at times.
- Smart and friendly, definitely knows the subject. Good at communicating with students.
- The classwork is a bit excessive, with a lab being assigned pretty much every class period. With even a modest class load to accompany this class it is difficult to keep up. Maybe eliminating one lab per week and merging some of the skipped lab's topics into the other two might help to pace the class better.
- Too many experiments, but very helpful and smart

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- All good.
- All textbooks were provided however they were constantly updated which made it confusing at times.
- Text book was amazing, couldn't recommend it more, some students might not like it. The class is definitely designed for groups of two, having a group of three really detracted from the course.
- Text was very helpful in answering questions prior to going to the instructor for help.
- The book was helpful for reference but most of the learning took place in labs.
- The text is easy and fun to read, although there are a number of type-o's. It is clear and helpful. The lab equipment all worked for me.
- The textbook was written by Mealy himself and it is a very extensive book that can be relied heavily on by students.

2. Instructor Evaluation

2.5) COMMENTS:

- Class movies at a really fast pace.
- Does not lecture well.
- He definitely is well-educated in this topic (he wrote his own textbook in this course), however he seems too humble in a way where he acts like he doesn't quite understand the topic himself and tends to go with the flow. This is a good thing in which he is laidback and lenient, but also a bad thing in terms of professionalism and how he comes off. The first few weeks of this course, I was confused as to what this course was even about and what I was doing because he himself seemed like he did not quite know what it was about, even though he has taught it multiple times.
- I feel the finals are too large a portion of the overall class grade, but other than that he is a great instructor.
- Ridiculous professor. Always says "that's all I know about this" and doesn't actually teach us anything. TAs are more helpful than he is when we have questions.
- The sheer amount of work that goes into each lab kept me really stressed through the quarter, but It helped me learn.
- entertaining teacher made learning interesting.

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- All required materials were provided for free.
- I really liked the fact that everything is online
- Lab time is very helpful IF you ask for help. Textbook was helpful and entertaining.
- Only used a notebook for notes and everything else I needed was in the lab
- Textbook was very helpful
- The text is sometimes unclear.
- good

Comments Report

2. Instructor Evaluation

2.5) COMMENTS:

- I don't know if this is possible, but setting up the polylearn site with the syllabus and the textbook earlier would have been helpful. For example This quarter I gained access to the polylearn site the Sunday before classes started and saw the suggested reading for Monday was 5 chapters (about 200 pages). This was an overwhelming amount of reading and made me, and other people that I talked to, feel like we were behind from day 1. If the syllabus had been posted over winter break, then I might have had time to look through the reading especially since I was getting bored by the end of the break. I think it would have been helpful to have a small head start on the material since there was so much covered in the class.
- Extremely fast while go over power points.
- GO BRYAN!
- He really wants students to get the material and urges students to ask him questions no matter the amount.
- Mealy is a great instructor and is genuinely interested in the success of his student. He's a little scatterbrained at times, but it's more quirky than distracting, overall he really knows his stuff.
- Professor Mealy is very helpful during class and office hours.
- Professor Mealy was extremely helpful at answering any questions. His lectures were a little too fast sometimes, though.
- Really fun class, although time consuming at times.
- There are too many students and Mealy just can't get to them all. His laid back approach to teaching does not work for me.

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- It would be very helpful to read the textbook required for this class.
- It would've been nice to have been informed of the 8 chapters of reading that we had to do on the first day of class. Maybe a week prior to starting the class, you could've informed us of the reading so that we would've had plenty of time over break to read those chapters without other classes interfering.
- The book is alright, good that it is free.
- The book is very helpful once you get to reading it.
- The development boards and the version of Vivado we used had some problems and we weren't able to complete some of the labs to their ultimate conclusion. The textbook was informative and very useful, and not having to buy a text was great, but there were some typos and unclear sections which would have been caught by a proper editor.
- The textbook we used was excellent and explained every concept necessary to the class amazingly. The practice problems in the book allowed for real learning of concepts and were quite relevant to the class.
- Unfortunately I didn't have time to do all of the suggested reading. I only read the chapters in part 2 of the book because I was struggling the most with understanding registers and all of the other more complicated memory components in the MCU. After reading these chapters and doing a few example problems I was able to understand the memory in the MCU much better. It was extremely helpful to have a book specifically written with this class in mind because you could easily get help with any of the topics we covered by reading the appropriate section in the textbook.

2. Instructor Evaluation

2.5) COMMENTS:

- Good and helpful in class
- I really enjoyed the content of the class, however I would've rather had the final be required and have been given more time. I think that being able to apply what we learn in the course for the final project really ought to be one of the more important pieces. Perhaps consider removing one of the labs from the schedule, I think that the project for the scratch ram and dual port ram was disproportionately time-consuming for what were otherwise pretty simple components that we were given the code to. Maybe that one could be cut to make more time for the final project. Also the hardware assignments and lab questions sometimes felt like hoops to jump through, maybe the questions could be narrowed down to just the ten most important questions for each lab, or even less.
- It would be nice if we could jump right into the RAT MCU in the experiments in order to cut down on experiments and leave more time for the final project. It would've been nice to be able to do it and help reinforce the material better.
- This class has too many benches for one professor and the amount of time allotted. Bryan was an excellent professor but the course load had too many difficulties for the entire class which made it harder to ask our questions because he was always busy with another bench. This class would run smoother with less students and more teachers for the course.

2.6) COURSE EVALUATION: *Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.*

- Need better introduction to Java coding environments
- The class, is difficult and fast paced, but very interesting and worth my time

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- He's just odd
- Mealy was a great instructor and clearly knew the material he was teaching very well. Although most material was very difficult, he did his best to help students understand the concepts. However, due to the very large class size, it was difficult to receive help a lot of the time, to no fault of Mealy who did his best to get to everyone. Section size should be reduced to alleviate this problem.
- Pretty straightforward in teaching, which I liked. Easy to understand and learn the material
- Takes the time to make sure his students understand the material.

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- Had all the information required for the course
- Need smaller classes or more help in class.
- Software used in the course (Vivado Studio) cause many problems and frustration with the course. This software is awful and changing the platform used should be considered.
- The structure is weird, but I guess it works in the end

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- He is extremely knowledgeable about the subject but not the best at conveying information. His lectures either go too fast or too slow and he seems to skip over important topics.
- Instructor was well prepared for class and conveyed material well. Subjects were tested on accurately with the quizzes and kept students on par with the course. Labs were straightforward as well, and were well paced for the course.
- James is a very good professor with well done lectures and a firm grasp on how much time is needed to cover a given topic. James is very helpful one on one, and I appreciate how much effort he puts into helping students. While the large weight of the final is daunting, it makes sense for this course in my opinion.
- Knows his stuff, sometimes has difficulty explaining things
- Mealy is great for one on one work, but his lectures are not usually very worthwhile. You learn more by actually doing the labs rather than listening to his jumbled lectures.
- Very good at working with students one on one, but not as good teaching everyone at once, give this guy smaller class sizes and he would be amazing
- Very helpful! Always ready to answer questions, very understanding and resourceful professor
- Very passionate about the material and wants students to be proactive in seeking help. This makes students put in effort to succeed, which is good.

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- Equipment is getting old, some development boards are losing quality in buttons/switches. Would recommend changing equipment/software to Intel boards/Quartus.
- I do not like using vivado
- If the class sizes were reduced, this course would be more effective. It is common that students need assistance, but the class is very large that Mealy can't get to everyone. It is clear that he is overworked and still continues to try to help everyone.
- My only complaint about this course is the student to teacher ratio affects the quality of the class.
- No textbook. The software, Vivado, is awful and has a lot of problems.
- Online resources (FRCD, RAT manual, Lab Manual supplemental information, Architecture sheet, and Assembly cheat sheet) all incredibly useful
- The textbook is funny, and easy to read though I didn't need it very much. (Only for clarification on a few points) The Lab computers are decent, but Vivado runs poorly on them. The Basys3 board is nice, but it would be really helpful if the boards could be checked out from the EE helpdesk Furthermore, the way that the boards are secured in the lab is not very secure since they can simply be unscrewed from the acrylic.
- Too many people in the lab.
- Was ok not great

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- Aside from not having this course properly organized, the instructor could not convey what little material he was attempting to teach his class in an effective way. It felt as though he was as lost teaching this course as his students were learning it.
- Each class day consisted of one lecture hour and one lab hour, but both were in the same room. In the first half of the quarter, Mealy would only lecture for the first hour and leave the second hour for practicing on design problems (written practice problems). Some students would even leave during that last hour. Then during the latter half of the quarter, he would lecture for around 30 minutes and let us use the rest of the time (1 hr and a half) to work on implementing our experiments in lab. I wish he had started doing this earlier on in the quarter. He is very helpful in lab, and I appreciate the help that the TA's also give us, but I feel like I along with many other students in the class feel like they're falling behind on the experiments. A lot of it has to do with learning how to code in VHDL and getting comfortable with the hardware and software (navigating around Vivado, working with constraints, etc.). If he had done more lab activities in the first half of the quarter (especially using that latter hour of the class session), I don't think many of us would be behind, in terms of daily experiment completion.
- He knows his stuff and teaches clearly.
HOWEVER:
The class is 2 hours per day, 3 days a week.
the first 5 weeks he lectured an hour and let everyone go home.
The last 5 weeks have involved 3-4 hour days 3 times a week because he assigned a quarters worth of labs in half a week.

Horrible use of time, second half of the quarter has been very rushed and I am scrambling to get three labs done during dead week while trying to study for his 75% weighted final.
- He knows the material but the class format is terrible. Cramming 12 labs into the second half of the course is unreasonable. He also thinks everything is easy and straightforward when it isn't.
- His lectures did not really convey the information well. He went very quickly through the lecture. So quick that I couldn't even come up with questions to ask before he changed the slide. However, if you did have a question, he was quick to clear it up.
- It may simply be because of how he just redesigned the course, but Mealy's lectures are hardly helpful and the real learning takes place during the lab time. Once you sit down and talk with Mealy directly, he is able to explain very well the material, but the lectures seemed to have many gaps.
- James is an amazing one on one teacher. I appreciated his eccentric personality. I emailed him frequently and he always replied surprisingly fast. I also asked an exuberant amount of questions in class and he tore through them. Lets have a chat about the beginning of the course though... you changed your course around thats great but near the beginning you skipped a bunch of stuff which you later expected us to know. I can only explain this blatant overlook with one (very possible) explanation. You wanted us to ask you questions personally to learn the content. In the future be more prepared for lectures, assume your students are stupid little shits and think about the questions they SHOULD be asking and answer those in lecture. Misc: cut down on your use of the word minutiae, and oh thats just stupid. Have a great day! I learned a lot and only had a few breakdowns. Oh also the workload was impossible if you don't come in after class.
- Mealy changed the curriculum for this class, thus he was slightly unprepared. However, he tries to help everyone as much as he can, and is always available and eager to assist.
- Not much. Just that he is will to help if asked.
- Professor Mealy cut out a lot of "unimportant" concepts from the class that I think would have helped us to understand the concepts that we DID go over. I think this is not acceptable coming from a Cal Poly professor. Additionally, we basically had the lecture part of the class for the first half of the quarter and lab for the second half. This did not work out well at all. The labs take lots of time to catch up on, but since we had a lab per class since week six, we've been extremely busy with this class and are currently 4 experiments behind schedule to catch up on in just the last week. The first half of the class we barely did anything, he sped through lecture slides not elaborating enough, and many people left class early. It was a waste of time. It would have been much more efficient to mix lab and lecture so that students could have 2 or 3 class days to catch up on the lab before the next lab was assigned. This way we would also get to apply lecture material hands on so that we know a little bit about what we're actually learning about instead of everything being abstract. Also, none of our material was graded until labs started in week 6, so we had no idea wether we were doing well or not in the class. Him not grading any homework or questions or anything until then came across as lazy, as he complains about not wanting to grade things. 80 % of the grade is determined in finals week. The organization of the class is awful, it is terribly backloaded to the end of the quarter.
- Professor Mealy is knowledgeable on the subject matter. In fact, he wrote the textbook. The issue I had was that he found it difficult to convey the material to a beginning group of students. For many concepts, he described them as "easy to understand" instead of actually describing them. This made the course extremely confusing in the beginning as we were still figuring out what digital design was or what the logic components were. Mealy is very helpful on a one on one basis, however, and during the labs he could also help us track down issues. It's just difficult when there's a big class and one professor.
- Professor Mealy obviously knows a lot about digital design, but he did not convey that knowledge in a way conducive to student learning.

Most of the time during lecture he's call what he lectured on "stupid easy", spend about 5 minutes talking about it and then move on, even though most of us had never seen the components or topic before. Also, almost all of the design problems he had us work had an error in them, or he would make an assumption that we knew how to do something that he never taught us how to do, and it made this class really confusing and stressful. Even the TA's weren't sure what he was asking on some of the questions he asked in the class and ultimately this class just felt very disorganized and not well taught. Mealy also never really kept up with how well everyone was doing on the labs. Instead of noticing that every group in both sections was taking way longer than he predicted on the labs and adjusting the schedule accordingly, he kept assigning labs, so that by the last week of the quarter most groups have 4 labs to do by Friday, where we've only had a maximum of 2 labs due per week. Every group I've talked to is insanely stressed, has no clue how to solve their problems in the class and is worried about even finishing lab 10 or 11 let alone lab 12. I don't know if it is just that Mealy has not taught 133 in a while (and is used to 233) or what it is, but the pace of this class was ridiculous and it just added to the disorganization and confusion of the class.

- Really caring and considerate. willing to help, but sometimes messes up with his own questions
- The instructor often did not know how to explain certain topics in the course. Although he was readily available to answer questions, students were often confused about the course material. I think this instructor should have a more organized approach to teaching digital design. Although I learned a lot from this course, I feel there was extra stress caused by the lack of clarity and thorough planning. However, I feel the instructor worked very hard to do what he could to help the students understand, and I felt his course was educationally effective.
- The instructor seems disorganized and scatterbrained when it came to presenting the material.

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- I appreciate how the lab (Engineering East Rm 100) is open 24 hrs (you just need the access code to open the door). Many students don't know this, so if it could be made better known or publicized more, it would help a lot of us, especially those struggling to complete experiments on time in lab.
- I found this course very interesting. However, there is a major lack of resources for this course. The professor provides a textbook which he wrote. This book is one of the only resources available. The lab is also short of equipment. Some of the testing boards do not work properly because they are very old.
- I'm sure everyone is writing about this, but this course was an absolute train wreck. The lab manual was significantly edited over 15 times by week 9 and all 15 labs were jammed into the last 5 weeks of school. Not only was this class taught in the exact opposite way as the "learn by doing model" what was being taught was poorly explained and was ineffective at being anything other than an absolute time vampire.

This course was the worst course I've ever taken at Cal Poly and is the first instance of me actually learning nothing over the course of 10 weeks.

- It is a very annoying class because there are so many labs which need to be done but not enough time to do them.
- Lab space was often dirty but otherwise the hardware was always functional save a few minor issues.
- My lab bench never had a board so we would always have to spend around 10 minutes of lab trying to find a board which wasted a lot of our limited time and was really frustrating.
- No textbook should be needed for the course, the supplementary one is good enough.
- Recommended textbook was very helpful though Mealy did not encourage reading it much. The equipment in the lab was always available no matter the time of day, which helped a lot.
- The course was good. Not much to say
- This course taught digital design in the context of black box diagrams and VHDL on an FPGA. I had no idea what the last sentence meant at the beginning of the course, but now I feel like I have a basic understanding of making digital circuits and the standard logic components like adders, registers, and finite state machines. Pacing of the course was completely whack however, as the first 5 weeks dragged on extremely slowly and the last 5 weeks felt like there wasn't enough time to complete all the labs.
- book sucks, he knows it I know it, we didn't use it.
- no textbook

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- Excellent teacher, really nice and understanding guy
- Excellent, knowledgeable about the topic and could figure out our problems quickly.
- He has a very hard time conveying information to students.
- I respect professor Mealy's attitude of "do whatever you need to to learn the material." Clearly care about students who want to learn, and will literally run to students with a question on anything. Super helpful and learn-by-doing teaching style, but there are times I wish he would just tell us the info so we can learn how to do something, rather than leaving us to wander in the dark forever. Sometimes comes across as expecting students to know things we really don't. Intimidating until you get to know him. 80% of our grade being based on 2 finals is extremely daunting and I think a bad strategy considering the first 5 weeks of class were spent without ANY lab activities/ experience.
- It was very helpful to know the theory behind the design before applying it with VHDL, but I feel like it would have been better to allot one more week or so to the second portion of the course. Maybe have the design problems as homework instead of classwork and just have people ask questions the next class time. Having the experiments back to back was tough for a variety of reasons, but having days to fix up the experiments at the end was really helpful. I feel like I learned a lot of new material.
- James was always there to answer any questions we had, and it's clear he cares very much about his students. I think all the labs for the second half of the quarter were too rushed, I would have preferred starting on them a little earlier in the quarter so we would have more time to work on them.
- Mealy is a character. I love his attacks on academic administrators. The material isn't always conveyed clearly so most of the learning occurs when the TA's tell you why your code isn't working.
- Needs a better understanding of class structure. I understand that he has his own style, which works, but assigning 12 labs for the last 5 weeks of class is a little silly.
- Professor Mealy knows what he's talking about and is very helpful in answering questions that I had or helping me with the labs.
- Professor Mealy sometimes went a little too fast for me, but it wasn't bad enough for me to not learn anything.
- The instructor knew the topics very well and was very helpful. Structure of the class felt a little hectic towards the end with 12 lab experiments in 5 weeks.
- Very knowledgeable on topic. Could be better at
- had to do some corrections to posted notes/answer keys

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- Can very easily see usefulness. Should standardize more so (80% of my grade is in finals)
- Confusing and seems like there needs to be a class before this one
- It seemed that for a lab of that size that there was not enough equipment or additional TA support to take care of the difficulty of the course.
- It was hard to get a spot to work on the labs outside of class. Also, during lab there was a lack of people to help everyone with the labs. The lectures were insightful and optimally explained what we needed to know, clearing the concepts up and making them easier to understand. The textbook had a lot of information to understand the details of the concepts at different level, so it was useful. Applying those concepts through the design problems and experiments really helped set them in place. The handouts were really came in handy.
- Lab equipment and the way the lab desks were arranged were not conducive for learning. Computers were often too slow to test lab experiments in a reasonable time. The way the desks were arranged made it hard to see the lectures' materials.
- Mealy is in the process of reorganizing his curriculum so the course was tossed about. The first five weeks were somewhat wasted on optional busy work while the last half of the course had a new lab assigned three days a week. This totally overloads the students. It kills them. Spread out the workload in the future.
- The textbook was moderately helpful in understanding the topics and the lab equipment had some issues but was good overall.
- This class dint have TA's until 2/3 through the quarter, which is a major problem. One professor can only do so much with the number of

students that there are. Otherwise no complaints about materials.

- Too many variables in the class. Hard to predict what to expect. No exams or evaluations throughout the quarter.
- it was reorganized better than before I feel
- professor didn't follow the textbook strictly

Comments Report

2. Instructor Evaluation

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- Everything was good, but more specifics for answering more of the lab questions during lecture would be very helpful in doing all the labs.
- Focused on students truly understanding material.
- He knows his stuff, but his mind seems to be all over the place at times.
- James (bryan? let's call him mealy) is great. The man cares about his students and teaching in general. Despite his many critiques of Cal Poly, he shines through with enthusiasm and intelligence as an instructor and engineer. We need more people like him and Jeff Gerfen here.
- Mealy is amazing at answering question and aiding with student difficulties. He can be a little soft-spoken sometimes, which makes it hard to hear, but the quality of the information that he provides is amazing. I only wish that he was more strict with due dates.
- Mealy makes me feel like I am learning something and understanding it, not just memorizing it.
- Professor Mealy is helpful, knowledgeable, and eager to teach. Unlike some professors, Mealy is much more concerned with his students truly understanding the material, rather than simply memorizing it. Mealy allows students to interact during class and encourages questions.
- Professor went out of his way to help us succeed. I have had few professors that were better.

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- All of the texts, including the lab manual, were informative and adequate.
- I learned a a lot in this class, but there is way too much content that we cover way too quickly.
- Mealy's book had all the info i needed. The class itself was pretty cool and I feel like I achieved something really cool by participating in the labs.
- Textbook is clear & informative
- Textbook was fantastic! It complemented the course and helped me to understand the material.
- The book he wrote is insanely helpful, and the course as a whole is the most interesting class I've taken at Poly so far.
- The resources were excellent in this class.
- The text book was well written and easy to understand. The lab assignments ensured a thorough understanding of the material.

Comments Report

2. Instructor Evaluation

^{2.5)} INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

- James is clearly one of the smartest professors I have ever had at Cal Poly. He know the material like the back of his hand and can answer anything you ask him. Thoroughly enjoyed having him as a teacher. 10/10.

^{2.6)} COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- The 80% Final and super low pass-rate are major issues.
- The textbook was not too much help for the questions in the lab reports.

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

COURSE SUMMARY

DEPARTMENT: EE

TERM: Spring 2018

RESPONSES: 16 OUT OF 28 - 57.14%

INSTRUCTOR: Mealy, Bryan

COURSE: CPE-133 01 Digital Design

QUESTIONNAIRE: EE168ALL

- If you ask questions then it is a lot better.
- He means well and really wants his students to succeed, but he never knows how to do the experiments himself or explain material clearly. Also, why on earth is the final worth 80% of my grade, and why are there two finals?
- It seems like the Instructor really knows his stuff and will not further explain unless we have questions, but how does one form questions when he doesn't know the question except for, "what does _____ do?".
- Mealy seemed like he knew a lot about the subject but he did not seem to care about the class very much. He would often skip practice problems or information in lectures because he didn't feel like doing them. Some he would skip because he had forgotten how to do them, and then expected us to be able to. He would provide help whenever needed and was willing to provide information, but he did not put much effort into his presentations or actual teaching.
- Answers all questions very well. Very nice and easy to approach. Sometimes lectures are hard to follow.
- very intelligent, but doesn't present material clearly in lecture and often leaves everyone with a lot of questions that we're unmotivated to ask because he seems unmotivated to present the material, very helpful in one-one-one interactions, but needs a smaller class size in order to be effective as a lecturer
- Mealy is cool. (o-o)
- Professor Mealy is very proficient in the knowledge of the course and is great at helping students and explaining topics 1 on 1.
- I have no idea what happened in this class and I have not missed a day.
- Covered material inconsistently, focused on small points rather than big important parts.
- Class based too heavily off final.

2.6) COURSE EVALUATION: Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- The one he wrote
- Good class. Was fun to learn about re things.
- Way too many labs. There is no way I can finish all of those. Most of the ones at the end seemed to be repeating themselves. I don't think I really learned any vhdl. For the most part, didn't understand what the syntax was doing.
- Skeptical about self written textbook with no credibility
- The textbook is useful however I wish there were more direct connections to the labs.
- We need more testbenches! and a better way to decode, generate code, learning how to properly signal modules together. textbook is cool but is super dense and makes it easier to understand than lecture, but is a large amount of reading.
- his textbook is very helpful and addresses exactly what the course focuses on, WE NEED MORE TESTBENCHES in order to gain any substance from the experiments; either more testbenches or smaller class sizes because it is very difficult at times to get the help we need
- The two textbooks that we used for the course were both written by Mealy himself. Even though they are still being edited and changed, they were fairly well put together and provided the information. The only problem with the books were that because they were written by him, any material that was confusing in lecture was explained in an equally confusing way in the textbook.

COMMENTS

2.5) INSTRUCTOR EVALUATION: Please share any comments related to the instructor.

COURSE SUMMARY

DEPARTMENT: EE

TERM: Spring 2018

RESPONSES: 12 OUT OF 24 - 50%

INSTRUCTOR: Mealy, Bryan

COURSE: CPE-133 03 Digital Design

QUESTIONNAIRE: EE168ALL

- Elaborate more on topics. Often times, he skimmed through sections quickly and it was hard to keep up.
- He clearly knew the material very well, he was very willing to work with and help anyone to learn more or clarify if they didn't grasp it at first.
- Mealy was super good at knowing his stuff. Really catered to students who were really behind conceptually. Would take a class you again. Super enthusiastic about the content.
- i feel like this man created digital design himself. Hes very laid back but he knows everything. He is like God. This class is still pretty hard though
- Very knowledgeable and helpful, always available and eager to help when asked, can easily go into detail and give extra information. He WANTS to teach and help, that's one of the most important things.
- Mealy is great professor that wants to help, and make sure you understand the material.
- Great at helping students understand the material.
- The instructor did not convey the course material very effectively in my opinion.
- Worked hard to serve his students and help them get the information they needed. Overall was a great instructor.
- I really like Mealy as a professor. I feel like sometimes he isn't the best lecturer. He is will always be willing to help.

2.6) **COURSE EVALUATION:** Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- I used his online textbook which was pretty useful and I ended up using it a lot. His lecture slides online were a great resource.
- The textbook was not the easiest to read and I had a difficult time finding the information that I needed in it.
- Software used was not very intuitive and there wasnt a lot of textbook help for it.
- Mealy makes his own textbook, this year the book was still being worked on, and was constantly being changed. However, the book had very valid information and helpful book problems.
- He provides SO much stuff and practice problems. I wish he forced us to do them because I definitely could have done more. This course is so hard though.
- Textbook on point
- Textbook was a nice addition to use for practice or refer to incase you didn't get it first in class. Equipment in lab worked well. I really enjoyed the quizzes, they helped keep me on track and check my understanding.

QUESTIONNAIRE: EE168ALL

- James is an incredible professor. He is incredibly intelligent, provides incredible thoughts on a variety of problems, and teaches the basics of a computer in a way that is understandable and relatable.
- He is a very nice person who is willing to explain things many times until you understand them. The main issue I have is with the materials presented in the PowerPoint lectures as I feel they could be more detailed or specific towards what we need to know and then examples with solutions rather than being vague and unorganized. Otherwise, I felt the instruction was good at presenting examples, but did sometimes comment that he did not know what was going on.
- He would dedicate more than enough time trying to help you through any given problem.
- This instructor did a lot of example problems for the students, which are helpful for understanding the material. The best way to learn from this instructor is to ask specific questions.
- He is great. A lot of this class is up to the student. Dr. Mealy is willing and very capable to help students. He's an effective teacher and excellent communicator.
- Professor Mealy was awesome. Some of the topics in the class were kinda weird at first but he covered them from different angles until they were clear. He is very humble about his skill with digital design but his strategies for problem solving worked well for me. He also definitely enjoyed entertaining odd questions and would guide me to the answer instead of just giving it away. I wish I could have him again as a professor.
- Knew the stuff very well
- Really appreciated the time/effort he put into helping students. Also a very down to earth guy.
- Prof. Mealy is a great teacher with plenty of knowledge in computer design. He's very honest with the students about his abilities in the area and lets everyone know if he can answer certain questions at the top of his head. I believe he is one of the better teachers in the EE department since he cares about his students and goes above and beyond to help everyone out as best he can, despite the large class size. I'd highly recommend my peers to take this class with him.

2.6) **COURSE EVALUATION:** Please comment about the textbook(s) you used, both required and recommended, their appropriateness, content, level, etc., or about the equipment used in a laboratory course.

- All of the materials in this course were relatively easy to use and access. The lab is accessible whenever a class is not present.
- Activity and assembler manual were very useful, did not really use the textbook itself though
- The course was extremely interesting and fun to participate in. It did take a lot of work and the lectures were a bit difficult to follow at times, but the content was absolutely there.
- All the documentation for the RAT MCU is excellent and the complexity of the MCU seems appropriate for the level of the course. My only gripe is that the Digital McLogic Design PDF textbook has no bookmarks :(
- I really enjoyed this course and the material covered. I would like if we excluded the assignments that didn't build towards the RAT MCU and replace them with assignments that maybe implemented some software or something useful in conjunction. Smaller class sizes and/or more TAs are essential to doing well in this class. Without the extra help, assignments would not be completed due to the lack of help received by the instructor or the TA. I'm disappointed in the EE and CPE departments for not fixing these problems since students pay a lot of money to be taught and are not getting the required help for the money spent. Ultimately graduating with less knowledge than in schools with smaller class sizes.
- His literature is very effective in teaching the content of the class.
- I think it is great that the RAT MCU was a senior project now used for the course, however, it does have some errors in it which should be fixed for

future classes. Also, it should be ensured that any provided modules actually work as sometimes my lab partner and I found that the reason our project was non-functional was due to the given module failing itself.

- He wrote the textbook. It does an effective job.
