

NUTRITION MINOR Enrollment Criteria & Procedures for Students outside the Food Science & Nutrition Department

Nutrition Minor Coordinator:

Any students interested in the Nutrition minor should reach out to the department office at fsn@calpoly.edu requesting the contact information for the minor coordinator.

Criteria and Procedure:

1. Look at the most recent catalog to see your options for course selections within the Nutrition Minor. Visit with the Nutrition Minor coordinator if you have questions about the options offered.
2. Before you can enroll in the Minor, you must meet the following criteria:
 - ___ Completion of FSN 202 (or officially articulated equivalent from another college/university) with B or better
 - ___ Sophomore standing or beyond
 - ___ **Cal Poly GPA of 3.3 or better.** Incoming transfer students must complete at least your first quarter at Cal Poly with GPA 3.3 or above.
3. If you meet these three prerequisites, please see the Nutrition Minor coordinator during office hours (or make an appointment via email if office hours conflict with your class schedule) to fill out paperwork and officially enroll in the Minor. Bring with you a copy of your most recent unofficial transcript so that prerequisites can be verified.

Please note: Because of growing numbers of students in Nutrition courses, without compensatory increases in faculty and class sections, FSN faculty give priority to Nutrition Majors for enrollment in courses. After meeting needs of Nutrition Majors, however, faculty will give next priority to students officially enrolled in the Nutrition Minor.

Also note: For many Nutrition courses, ALL seats are reserved in Schedule Builder and Student Center for Nutrition Majors, and the only way for a Nutrition Minor to enroll is via a permission number from the faculty member listed on that course. When this is the case, you should send an email to the instructor detailing your situation (including class standing; planned graduation date; official status in Nutrition Minor). Instructors will make decisions about permission numbers at the end of the registration period or by the end of the first class meeting. For Nutrition courses with spots available for non-majors via Schedule Builder and Student Center, please be sure to get on the official waitlist if all spots for non-majors are taken by the time you register.
