Student Campus Computing Committee (SC3)

Meeting Notes

January 8, 2019

Present: Camron Dennler, Chairperson
Carter Terranova, CAED
Nicole Hill, CENG
Michael Brazil, OCOb
Steven Pineda, Tech Group 1
Matthew Wallace, Tech Group 2
Alison Robinson, AVP for ITS
Kathryn Hammer, ITS

Absent: Sarah Rutland, DRC
Vacant, CAFES
Abi Iriafen, CLA
Isabella Roldan, CSM
Jacqueline Aenlle, Graduate Student
William Sambar, ASI Rep

Guest: Cem Sunata, Office of the Registrar

Next meeting: February 5, 2019 12 – 1pm, Building 02-024

1. Mobile App Strategy with Cem Sunata, Office of the Registrar

Cem Sunata and Alison shared that they, with Bret Heenan from ITS, are partnering together on the new mobile app strategy for campus. The President’s Cabinet communicated that they want one app for campus. Students echo that. Cem, Alison, and Bret will meet with university leadership and SC3 to talk about mobile app wants and needs. They will look at what transactional features can be included to improve/enhance life on campus vs. what can be included for academic success, i.e. register for classes from phone, purchase parking permits, reserve laundry machine, and sign up for rec center classes. The mobile app strategy may need to consider Single Sign On capability.

During a previous meeting, SC3 shared that they want the flexibility to see only what they want to see, in other words filter out functions that they don’t want to see.

Discussion about what can SC3 do to help. Discussion continued about how SC3 members can poll their colleagues about what they want in a mobile app. SC3 will look at using UserVoice to see real-time input from students. Discussion continued about how to follow up with students about their interests in a mobile app. It is important for the polling to be transparent, i.e. advertise in Mustang News.

Discussion continued about the context of surveys and how to frame the questions. ITS will work with campus to identify how much funding is available before a survey is sent to students. Cem, Alison, and Bret will look to SC3 members to help engage students in the research.

Question about working with departments who have their own app and how will that be incorporated into the new app. The strategy, with ITS Governance, will identify which features to include first, third, etc. and how to incorporate other features.
Discussion about PolyLearn and will that move to the mobile app. It seems that other universities are using newer technology. Discussion about exit barriers about moving to a new Learning Management System.

Discussion about writing a resolution about a LMS in the mobile app. Camron will talk to Jasmin Fashami, ASI President.

**Action Items:**

- Camron: Talk with Jasmin Fashami, ASI President, about a resolution for a new LMS
