A Review & Tribute to Sir Richard Taylor, Weta Workshop & Companies
Connecting Cinematic Imagination, Invention and Advanced Technology to Real World Solutions

6–8:30pm, Saturday March 10th
The Fremont Theater, Downtown SLO

You are invited to attend a panel discussion, workshop and awards ceremony honoring and discussing the work of Richard Taylor, one of the founders of New Zealand’s Weta Workshop. Richard Taylor and a number of other leaders from the image technology industry will discuss and show many of the current and upcoming uses for the advanced technologies Weta Workshop that he and others have developed both for cinema and for real world application.

Along with his wife Tania Rogers (COO of Weta), and director Peter Jackson, Richard Taylor and the Weta Workshop developers have created many of the new imaging technologies that have forever altered the film industry, and have now been fully embraced by filmmakers all over the world, including James Cameron, Bob Zemeckis, and Steven Spielberg.

This is a unique opportunity to hear, first-hand, from the developers and designers who are charting the future of the film, television and gaming industries.

To learn how you can participate in this event, please contact:

Dr. David Gillette, Coordinator, Expressive Technology Studios
