DESIGN DEVELOPMENT

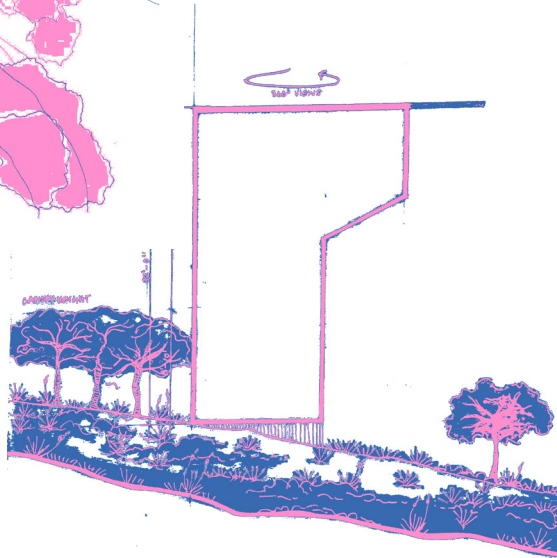

Our proposal for the Poly Canyon Architecture Graveyard reimagines the site as a **layered, elevated framework** that bridges landscape, history, and student life. Rooted in the concept of **layering** and **bridging**, the project stretches above the existing Bridge House and lightly spans the tributary below, reinforcing the canyon's culture of **experimentation**.

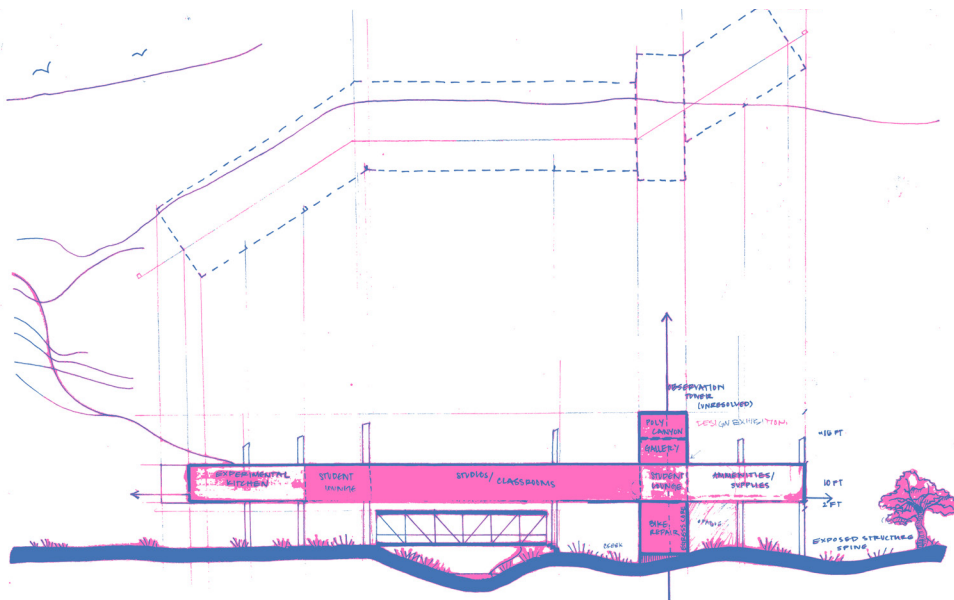

MIDREVIEW

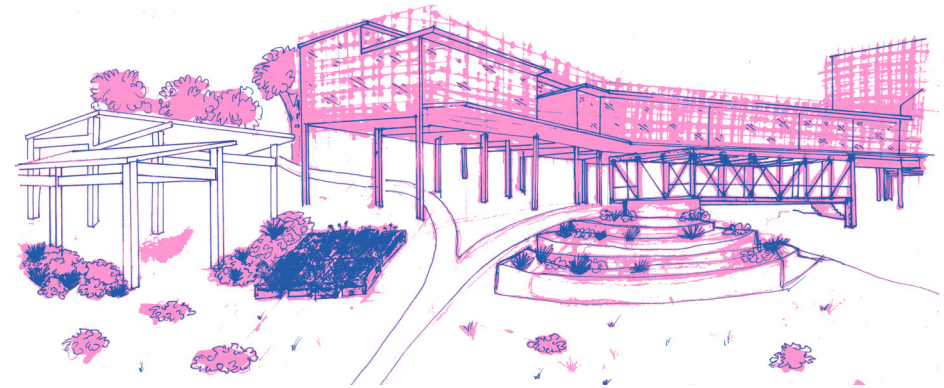

After our midreview, we adjusted the building size and footprint, focusing on accessibility, smooth entry sequence, and minimizing scale and impact on terrain.

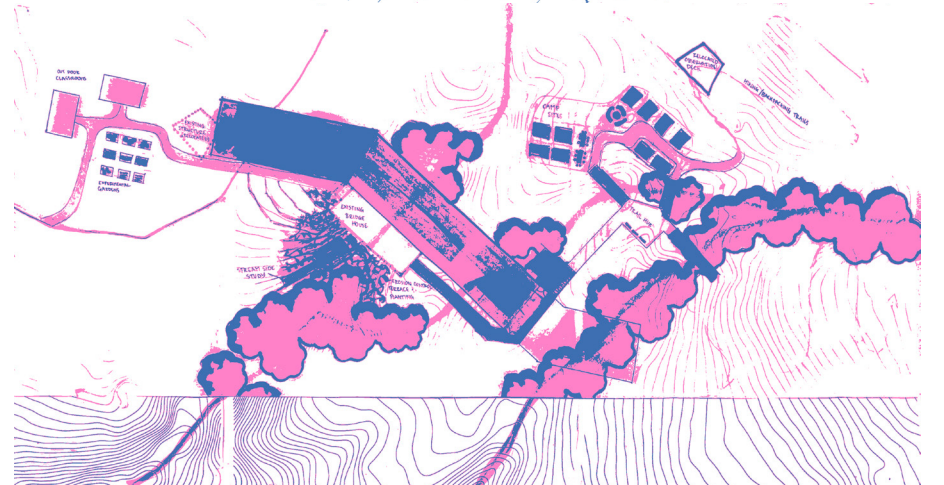

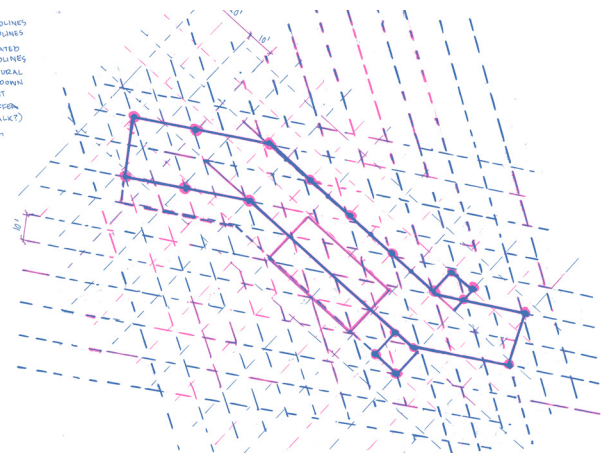

PROPOSED TOWER VESTIBULE CONNECTION

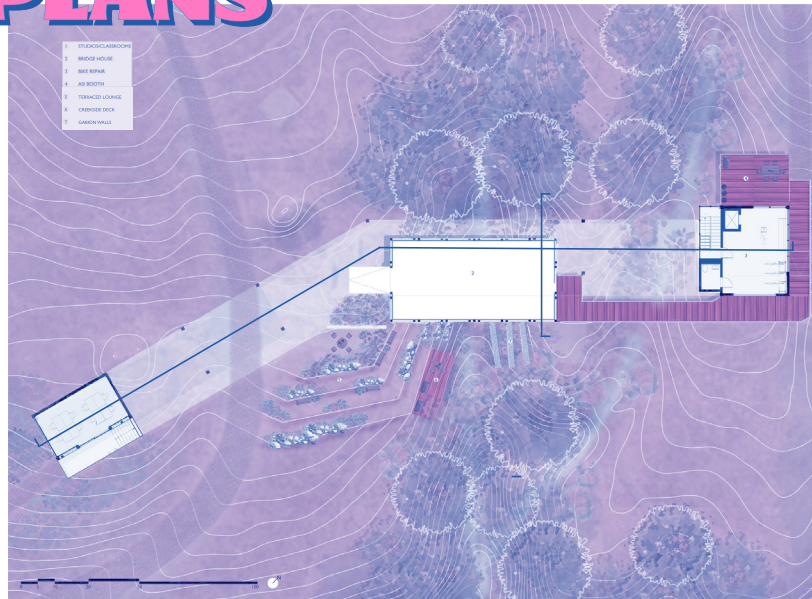

MIDREVIEW

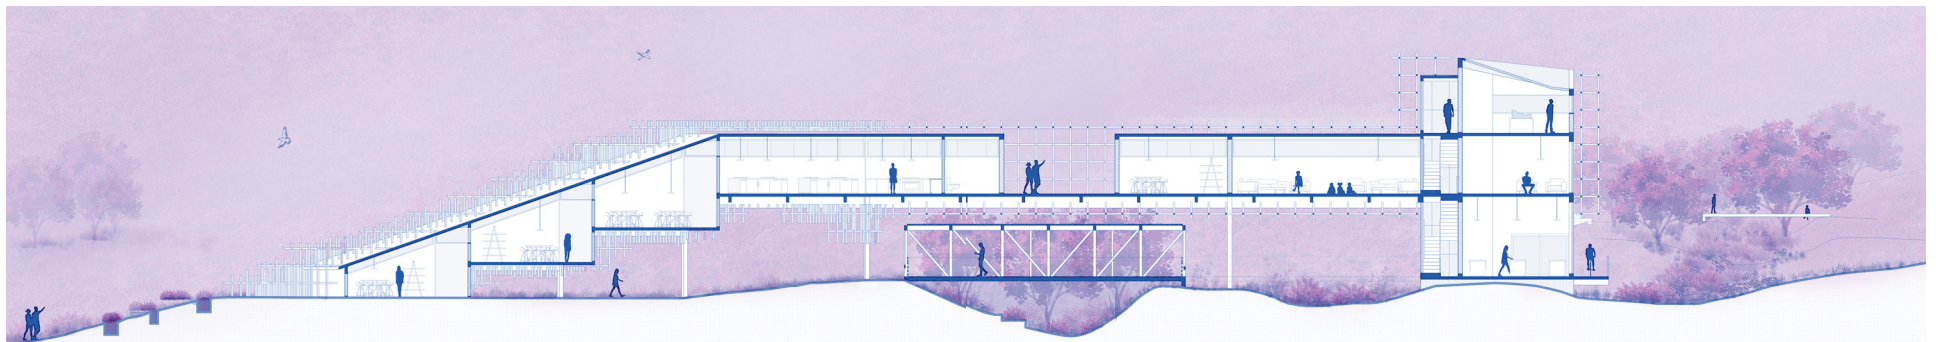

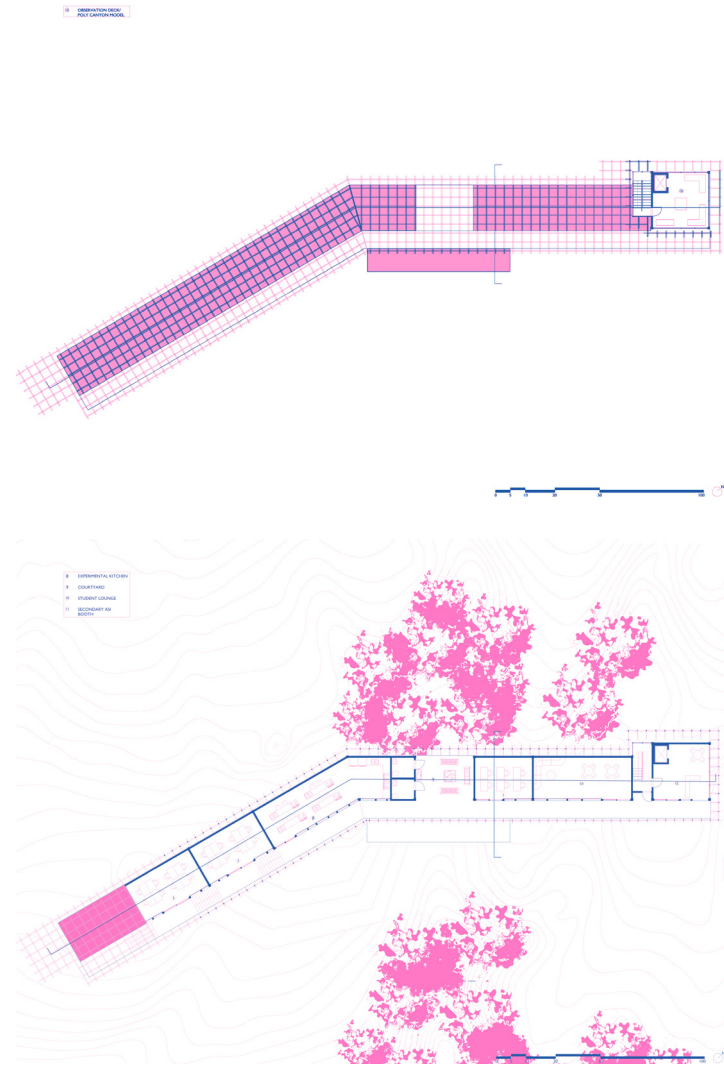

- 20' GRIDLINES
- 10' GRIDLINES
- 50' BOUNDED 10' GRIDLINES
- STRUCTURAL TOUCHDOWN POINT
- 10' BUFFER (CATWALK?)
- EXISTING ROAD

PLANS

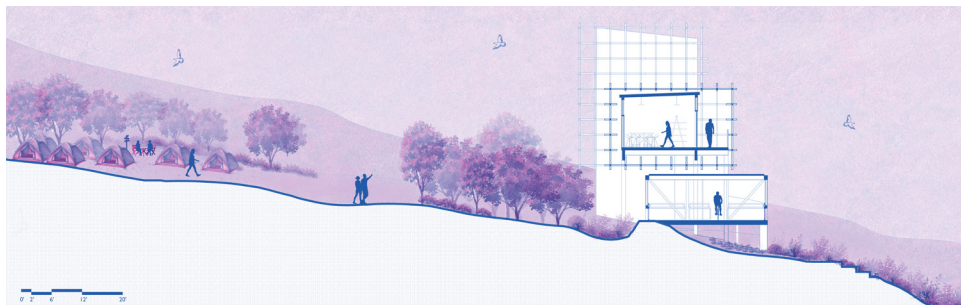

The design balances **permanence** and **adaptability**. Hybrid indoor-outdoor spaces blur **enclosure** and **exposure**, engaging climate and landscape. Terracing descends toward the stream with riparian restoration, while the project operates as a **trail hub**, stitching together existing canyon paths and creating a **connective threshold** within Poly Canyon.

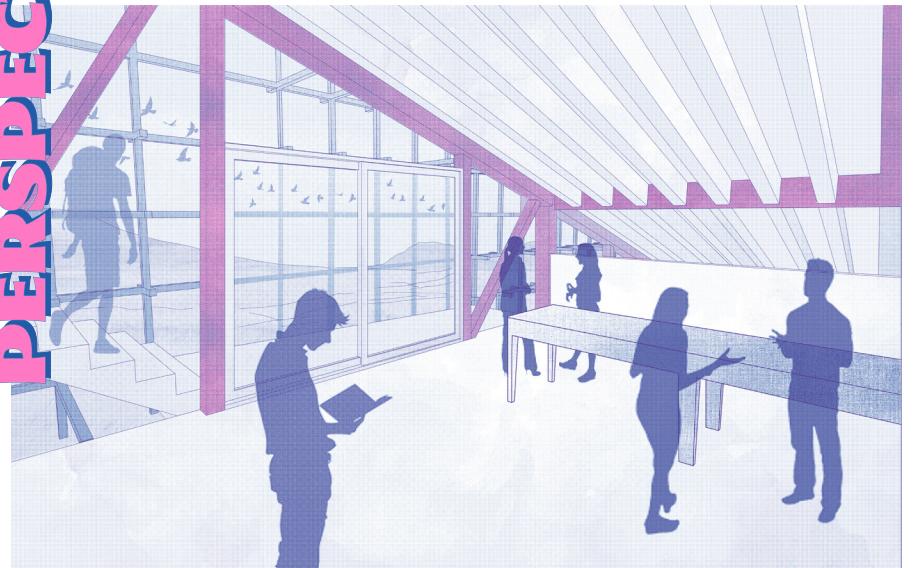

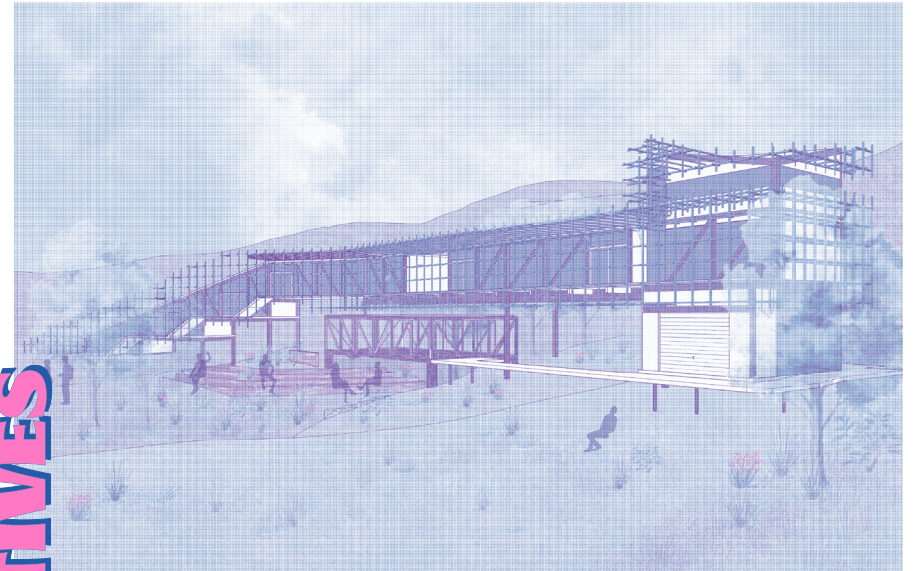

MASTER PLAN

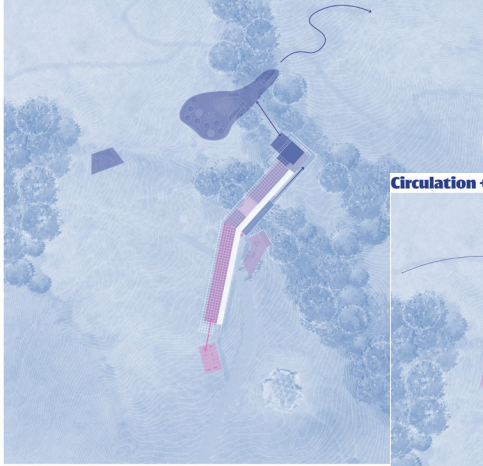

The parti is expressed as a long, linear bar aligned with the **bridge axis**, subtly skewed in plan to **optimize daylight** and **frame views**. A continuous exterior walkway organizes circulation, reinforcing the project's **bridging** gesture and **layered** spatial experience.
