This Dream Recalls Another
Expressions of the Memory of Landscape Reflecting Rising Sea Levels
Jordan Chiang | LA 403 - Of Natural Environments Design Focus Studio | Fall 2019 | Prof. Ellen Burke

Theme
The design of this project evolved from the exploration of a memory of a place, and the attempt to recall that memory in a new context through landscape design. The project aims to reflect the effects of rising sea levels on the landscape, while also preserving the memory of a past place.

Design Process
1. Memory Capture
2. Landscape Analysis
3. Conceptual Design
4. Detailed Design
5. Presentation

Ecological Functions
- Water Management
- Biodiversity
- Human Experience

Tide Pool Formation
- Adaptation to Rising Sea Levels
- Preservation of Natural Beauty

Marsh Pool Development Over Time
- Year 2000
- Year 2050
- Year 2100

Visualizations
- 2D Plans
- 3D Models
- Site Analysis
- Conceptual Drawings

Conclusion
The project aims to create a place that not only reflects the memory of a past place but also addresses the challenges of rising sea levels through thoughtful design.
