Dr. Christine Hartmann currently serves as the Director of Lawrence Livermore National Laboratory’s (LLNL) Program Development Support Office, which helps scientists and engineers propose new technological ideas to government sponsors. In the past, Dr. Hartmann led the development of a hardware/software system that was successfully transferred to industry and provided the first FDA-approved device of its kind for cancer treatment planning. She has received the Presidential Early Career Award for Scientists and Engineers and the East Bay Business Times 40 Under 40, among other awards. Recently, she pioneered the development of LLNL’s first internal social media crowd sourcing tools, and has trained hundreds of LLNL staff members in value proposition, proposal, and presentation development. Her office has assisted LLNL scientists and engineers in proposing over $1B in technical projects to government agencies.

Come learn how to be a more successful presenter including secrets from cognitive psychology and human experience that will help you engage your interviewers, draw their attention to your ideas, and make them remember you in a positive light.
