TITLE: FPRF Engineering Intern / Coop (a.k.a., Research Associate)

Who: The Fire Protection Research Foundation is the research affiliate for the National Fire Protection Association (NFPA), a worldwide leader in fire, electrical, building, and life safety.

What: The Research Foundation supports NFPA in their mission to protect the public from fire related injury, death, and property damage by providing NFPA with the scientifically based data and information it needs in support of its key program activities, most notably the NFPA fire safety codes and standards.

The Fire Protection Research Foundation is looking for a unique engineering student to work in a collaborative environment on a number of tasks involving fire safety research and data synthesis and analysis. Interns will also have a chance to build their portfolios through co-authorship on internal and external publications.

NFPA is committed to creating a diverse environment and is proud to be an equal opportunity employer. Candidates of diverse backgrounds are encouraged to apply.

Required:
• Senior or graduate level engineering student (any engineering discipline)
• Basic knowledge in written and oral communication skills

Job Details:
• Full-time position (7.5 hrs/day)
• Duration: 1 year position from 1/January/2019 through 31/December/2019
• Location: 1 Batterymarch Park, Quincy, MA 02169

Please send your resume to Victoria Hutchison at vhutchison@nfpa.org.
