

# City and Regional Planning Department Computer Requirements

## Minimum Computer Requirements

These are the minimum recommended requirements for successful computing in the CRP Department. A faster processor, higher end video card, and an SSD hard drive will all speed up your computer. 3D graphics and rendering intensive applications will perform better with higher specifications. For your reference we provided links to some of the commonly used software throughout CRP and their computer specifications.

- **Intel Core i7 (9th or 10th gen) or AMD processor**
- **512GB SSD storage**
- **16GB RAM**
- **Graphics Card 4 GB memory**

## Required List of Software Programs

- Office 365 Applications (Free from Cal Poly Office 365 online account)
