

HeavyConnect

HeavyConnect is a high-growth AgTech startup and a proud alumnus of the 500 Startups and Techstars accelerators that is revolutionizing compliance workflows in the food supply chain.

Deployment Intern (Summer 2026)

The Opportunity

HeavyConnect is offering a hands-on summer internship for a motivated student looking to dive into the world of AgTech operations. As a Deployment Intern, you will work directly alongside our field team to support the onboarding and success of our customers during our most active growth season. This isn't a typical office internship; you will be in the field with growers, packers, and shippers, seeing firsthand how digital transformation is changing the produce industry.

In this role, you will assist in executing deployments, troubleshooting real-world challenges, and helping agricultural professionals adopt our cutting-edge software. We are looking for a high-energy individual who is eager to learn by doing and wants to contribute to a fast-paced, venture-backed startup. This is a unique chance to build your professional network and gain technical experience that will set you apart in the agricultural sector.

Learning Objectives & Experience

- AgTech Operations: Learn the end-to-end process of deploying enterprise software in a traditional field environment.
- Stakeholder Engagement: Gain experience interacting with diverse agricultural stakeholders, from field crews to operations managers.
- Compliance Technology: Develop a working knowledge of food safety and labor compliance platforms.
- Professional Mentorship: Work directly with the HeavyConnect leadership and deployment teams to understand how to scale a technology business.

Key Responsibilities

- Deployment Support: Assist the Deployment Coordinators with on-site customer training and app setup.
- Data Quality: Help customers transition their paper-based records into the HeavyConnect digital dashboard.
- Field Troubleshooting: Provide "elbow-to-elbow" support to field users to ensure successful adoption of the platform.
- Project Documentation: Help track deployment progress and gather feedback to improve our onboarding journey.

Qualifications

- Education: Current student (Junior or Senior standing preferred) in an Agricultural program or similar field of study.
- Language: Bilingual fluency in English and Spanish is highly preferred.
- Mobility: Must have a valid driver's license and be willing to travel to various field locations across California.
- Mindset: A "boots on the ground" attitude and a genuine interest in the intersection of technology and farming.

Additional Details

- Duration: 10-12 weeks (June – August 2026).
- Location: Remote (California-based) / Frequent Field Travel.
- Schedule: Full-time (40-hour workweek).
- Compensation: \$20.00 – \$24.00 per hour.
- Travel: 100% of all field travel expenses (mileage, lodging, and meals) are covered or reimbursed.
