

CAMPUS PLANNING COMMITTEE

Function

Each state university and college is required by resolution of the Trustees on May 12, 1961, to establish a committee whose basic membership and functions were prescribed by the Trustee action. The committee's primary function is to assist the President in the coordination, development, and control of a long-range plan for the physical development of the campus, within a framework of policy established by the Trustees of The California State University. The committee serves in an advisory capacity in relation to the following:

1. Development and maintenance of a long-range plan for the physical development of the campus.
2. Selection of sites for each new building and other physical facilities on any university-owned property.
3. Review the work of the architects during the schematic drawings phase.
4. Review of recommendations on the five-year and other long-range building programs.
5. Review of all proposed projects to be constructed on the campus that will have an architectural and/or environmental impact. These projects will include, but are not necessarily limited to, structures, roads, walks, signs, etc.
6. Study and review such other areas as may be delegated to it by the President.
7. Work with city and county planning commissions on matters related to campus development, zoning in areas surrounding the university, streets, and highways leading to and from the campus, and other matters.
