HCS 110 Orientation to Horticulture and Crop Science (2) (CR/NC)
Understand depth and breadth of horticulture, field crops, and plant
protection careers. Examination of curricula within the department.
Introduction to both student and professional organizations. Emphasis on
curriculum and career planning. Required of all Horticulture and Crop
Science students. Credit/No Credit grading only. 1 lecture, 1 activity.

HCS 120 Principles of Horticulture and Crop Science (4)
Introduction to horticulture and crop science. Basic plant processes,
classification, anatomy, physiology, and biotechnology. Effect of
environment on plants and how we control it. Introduction to plant growth
including propagation, media, irrigation, nutrition, management, harvest,
and post harvest handling. People's use of plants. Field trip required. 3
lectures, 1 laboratory.

HCS 124 Plant Propagation (4)
Plant propagation practices with emphasis on understanding why practices
are used, how they work, and how they are applied in commercial
horticulture. Field trip required. 3 lectures, 1 laboratory. Prerequisite: BOT
121 and HCS 120.

HCS 200 Special Problems for Undergraduates (1–4)
Individual investigation, research, studies, or surveys of selected problems.
Total graduation credit limited to 4 units, with a maximum of 4 units per
quarter. Report required. Prerequisite: Consent of instructor.

HCS 231 Commercial Seed Production (4)
Production of field and vegetable seed. Seed technology, germination,
quality control, seed enhancement, storage and handling of seed, and seed
laws. Field trip to a seed conditioning/seed enhancement facility required. 3
lectures, 1 laboratory. Prerequisite: HCS 120 or VGSC 230.

HCS 270 Selected Topics (1–4)
Directed group study of selected topics. The Schedule of Classes will list
title selected. Total credit limited to 8 units. 1 to 4 lectures. Prerequisite:
Open to undergraduate students and consent of instructor.

HCS 304 Plant Breeding (4)
Principles and techniques used to develop new plant varieties. Sexual
reproduction, inheritance, selection and biotechnology methods useful in
breeding of plants. Field trip required. 3 lectures, 1 laboratory. Prerequisite:
CRSC 132, HCS 120 or BOT 121. Change effective Winter 2013.

HCS 327 Abiotic Plant Problems (3)
Diagnosis of physiological disorders associated with environmental and
nutritional factors. Particular emphasis on the systematic inquiry process.
Case histories, multimedia use. 2 lectures, 1 laboratory. Prerequisite: HCS
124, CHEM 111, SS 121.

HCS 329 Plants, Food and Biotechnology (4)GE Area F
Agriculture as applied biology and its impact on civilization. Application of
technology to increase the efficiency of food production. Genetics and
biotech-nology; culminating in an assessment of genetically engineered
foods, the myths, the controversy; the science. Not open to CRSC or FRSC
majors. 3 lectures, 1 laboratory. Prerequisite: Completion of one of the
following: BIO 111, BIO 114, BIO 161, BOT 121, or HCS 120.
Recommended: Junior standing. Crosslisted as BOT/HCS 329. Fulfills GE
Area F.

HCS 339 Internship in Horticulture and Crop Science (1–12) (CR/NC)
Selected Horticulture and Crop Science students will spend up to 12 weeks
with an approved agricultural/horticultural firm engaged in production or
related business. Time will be spent applying and developing production
and managerial skills and abilities. One unit of credit may be allowed for
each full week of completed and reported internship. Degree credit limited
to 6 units. Credit/No Credit grading only. Prerequisite: Consent of
instructor.

HCS 340 Principles of Greenhouse Environment (4)
Analysis of problems and practices affecting the contemporary commercial
horticulturist. Analysis and operation of greenhouses and related equipment
stressing the effect of environment on plant growth. Field trip required. 3
lectures, 1 laboratory. Prerequisite: EHS 245.

HCS 400 Special Problems for Advanced Undergraduates (1–4)
Individual investigation, research, studies, or surveys of selected problems.
Total degree credit limited to 4 units, with a maximum of 4 units per
quarter. Report required. Prerequisite: Consent of instructor.

HCS 410 Crop Physiology (4)
Ecological and physiological interactions associated with the production
of crop plants. Physiological and biochemical processes that elucidate the
mechanism of whole plant performance and responses to the environment. 3
lectures, 1 laboratory. Prerequisite: BIO 263 or HCS 120; BOT 121 or BIO
162; and CHEM 312 or CHEM 316.

HCS 421 Postharvest Technology of Horticultural Crops (4)
Respiration, ethylene, ripening and senescence; modified atmosphere
packaging, controlled atmosphere storage, packhousings and
transportation; survey of postharvest techniques to maximize commodity
shelf-life. Field trip required. 3 lectures, 1 laboratory. Prerequisite: Junior
standing.

HCS 450 Plant Biotechnology Laboratory (2)
Application of genetic engineering technology to plants; methods of plant
tissue culture and transformation. 2 laboratories. Prerequisite: BIO 303 or
BIO 351 or CHEM 373 or HCS 304. Crosslisted as BOT/HCS 450.

HCS 461 Senior Project I (2)
Selection of a project under faculty advisor approval. Initial research and
data gathering period for project information. Projects typical of problems
which graduates must solve in their fields of study or employment. Project
results are presented in a formal written report completed in HCS 462.
Contract drawn up with approval of advisor. Minimum 60 hours.
Prerequisite: Junior standing and completion of GE Area A1 and consent of
instructor.

HCS 462 Senior Project II (2)
Continuation of Senior Project development. Write-up of draft and
formal draft of project. Completion of formal written report under advisor
supervision. Minimum 60 hours. Prerequisite: Consent of instructor.

HCS 463 Senior Seminar (1)
Oral presentations by students on their senior projects, critical thinking
assignment. Preparation for entry into the business world. Guest speakers.
1 activity. Prerequisite: Senior standing.

HCS 470 Selected Advanced Topics (1–4)
Directed group study of selected topics for advanced students. The Schedule
of Classes will list title selected. Total credit limited to 8 units. 1 to 4
lectures. Prerequisite: Consent of instructor.

HCS 471 Selected Advanced Laboratory (1–4)
Directed group laboratory study of selected topics for advanced students.
Open to undergraduate and graduate students. The Schedule of Classes will
list title selected. Total credit limited to 8 units. 1 to 4 laboratories.
Prerequisite: Consent of instructor.

HCS 500 Individual Study in Horticulture and Crop Science (1-6)
Advanced independent study planned and completed under the direction of a
member of the Horticulture and Crop Science faculty. Total credit limited to 6
units; may be repeated in same term. Prerequisite: Consent of instructor.

HCS 511 Ecological Biometries (4)
General survey of current analytical methodology available to ecological
researchers to evaluate effects and assess the underlying mechanisms that
drive natural and cultivated ecosystems. Methodology includes general
linear models, ordination, survival analysis, multivariate analyses, and
computer simulations. Student research used as a basis for instruction.
Total credit limited to 8 units. 3 seminars, 1 activity. Prerequisite: STAT
218 or STAT 512, or consent of instructor. Crosslisted as HCS/PPSC 511.
HCS 539 Graduate Internship in Horticulture and Crop Science (1–9)
Application of theory to the solution of problems of agricultural production or related business in the fields of horticulture and crop science. Analyze specific management problems and perform general management assignments detailed in a contract between the student, the firm or organization, and the faculty advisor before the internship commences. Degree credit limited to 6 units. Prerequisite: Consent of instructor.

HCS 570 Selected Topics in Horticulture and Crop Science (1-4)
Directed group study of selected topics for advanced students. The Schedule of Classes will list title selected. Total credit limited to 12 units; may be repeated in same term. 1–4 seminars. Prerequisite: Consent of instructor.

HCS 571 Selected Topics Laboratory in Horticulture and Crop Science (1-4)
Directed group laboratory of selected topics for advanced students. The Schedule of Classes will list title selected. Total credit limited to 12 units; may be repeated in same term. 1–4 laboratories. Prerequisite: Consent of instructor.

HCS 575 Postharvest Instrumentation and Experimentation (3)
Hands-on instruction in the instrumentation available to conduct postharvest research, including discussions of the scientific methods and typical postharvest studies. Implementation and dissemination of a personalized postharvest experiment required, both as a slide presentation and a poster. Independent research. 3 laboratories Prerequisite: STAT 218 and senior or graduate standing.
