

Baker/Koob Proposal Scoring Rubric

Criteria	Max Score	YES	NO
Projects that enable students to pursue hands-on, Learn by Doing activities are the only type that will be considered.	Yes/No	Projects exemplify Cal Poly's core teaching philosophy, Learn-by- Doing.	Projects do not provide an adequate opportunity for students to learn from a project-based learning experience.

Criteria	Weight	10 - 7	6 - 4	3 - 1
Project outcomes are measurable and attainable given time and financial constraints.	30	Outcomes clearly address problem/need; are measurable, realistic; has clearly defined steps to be taken to achieve goals.	Outcomes are loosely linked to problem/need; some may not be readily attainable or measurable.	Outcomes are missing or incomplete; are difficult to understand, unrealistic; or, appear unmeasurable.
Interdisciplinary in focus and participation	20	Project clearly lies at the intersection of disciplines and has representation from more than one college or department. Alternatively, the focus of the project lies at the intersection of disciplines. Clearly describes the interdisciplinary nature of the project.	Team may have members representing only one college or major. It is unclear if team members' disciplines are relevant or if the project itself is inter-disciplinary.	Project is not interdisciplinary in focus.
Broader Impact	20	Project addresses challenges and societal needs of today, such as sustainability, or advancing and supporting diversity, equity and inclusion; it has potential to make an impact in the field or discipline on a local, national or international scale; has identified potential partners or additional funding sources; is part of a competition; or, is linked to other academic, community or business partners.	It is unclear if the project has the potential to make an impact in the field or discipline on a local, national or international scale. or to work with outside partners or attract additional funding.	Little or no potential to evoke change; lacks partnerships or additional outside funding.
Budget is appropriate to attain project results	10	Provides detailed and accurate budget and justification; budget items are clearly linked to proposed results and are realistic: budget is within program guidelines and meets the requirement for 50% or less to be allocated to travel or publication funding. If over the 50% limit, a detailed justification is included.	Budget is provided but lacks detail or is unclear how items relate to the proposed results. Budget may not be realistic to reach goals.	Budget is not adequately provided or is not within the program guidelines.
Timeline is appropriate to attain project results	10	Timeline is well thought out with clear steps or milestones and is well presented.	Timeline is provided but its presentation is unclear, or unsure if it will accomplish the project goals.	Timeline is either missing or is poorly presented.
Clear plan to disseminate results	10	Dissemination of results to a broad community is clear and well planned.	Dissemination of results is internal only, or broadly planned but not clear who would benefit from receiving them.	Inadequate, or no plan offered for dissemination of results.
