The Michigan Summer Program in Cognition & Early Development (MSPICED) is jointly hosted by four developmental psychology laboratories led by Drs. Susan Gelman, Ioulia Kovelman, Felix Warneken, and Henry Wellman.

They are seeking motivated students to participate firsthand in developmental psychology research specifically how children cooperate with each other, think about the minds of others, and acquire language, as well as how language shapes children’s thinking.

Click here for more information. The 10-week program runs from June 1st to August 7th, 2020. Each summer intern will be paired with a graduate student or postdoctoral fellow mentor (see Researchers) to work on new or ongoing research projects. Interns will gain experience in a variety of research activities, including conducting experimental studies with children, processing and analyzing data using advanced video coding technology and statistical software, recruiting and scheduling families, and helping with study design. Interns will also be introduced to developmental neuroscience research methods, including Near Infrared Spectroscopy (fNIRS).
