Open Research Assistant and Coordinator Positions

The Center for Biobehavioral Health (CBH) at Nationwide Children’s Hospital (NCH) in Columbus, Ohio anticipates hiring 10-12 fulltime Research Assistants or Coordinators in the spring/summer of 2020 to work on investigations relevant to the psychosocial and medical outcomes experienced by children, adolescents, young adults, and their families facing developmental and health challenges. Studies include observational research and clinical trials with a variety of populations, e.g., congenital heart disease, epilepsy, palliative care, pediatric cancer, prematurity, and traumatic brain injury. Learning opportunities, depending on the position, include training in early childhood development, neuropsychological assessment, neuroimaging techniques, and/or assessment of diverse phenomena such as peer relationships, physical activity and other health behaviors, and family interactions. Research staff will recruit participants; collect data in clinical, research, and community settings; code and manage data; and participate in data analysis and dissemination of research results.

CBH is committed to the professional development of research staff, providing seminars and 1:1 mentoring to build research skills and assist with applications to graduate programs as well as career planning.

Individuals interested in learning more are invited to submit a CV or resume through the link below. After submitting your CV, you will be asked to provide an email address to which we can send a list of the CBH research teams that will have open positions in 2020.
