

Understanding the CalVTP

A beginner's training for successfully completing wildfire risk reduction projects

What is the CalVTP?

The California Vegetation Treatment Program is a streamlined framework for improving Wildland Urban Interface (WUI) fire resilience, ecosystem health, and increasing forest carbon sequestration through targeted vegetation treatments.

*Treatments included in the Cal VTP:
prescribed burning, vegetation treatments,
herbicide application, prescribed grazing*

IN THIS TRAINING YOU WILL LEARN:

- how the CalVTP meets our needs
- where it may be applied
- to identify costs and benefits
- about common stakeholder views
- how to access resources
