

JOB DESCRIPTION (INTERNSHIP)

TITLE: Substrate Production Intern

REPORTS TO: Ranch/Production Manager

LOCATION: TBD

CLASSIFICATION: Paid Internship

POSITION PURPOSE:

The Substrate Production Internship will give students an opportunity to excel in our multi-cultural work environment, while gaining valuable perspectives on our global business operations. Graduating students may be recruited as full-time employees on their contributions and learning in their internship.

RESPONSIBILITIES INCLUDE:

- Apply agricultural science knowledge and learn in the process of the day to day operations of substrate ranch.
- Learning in assisting the ranch manager or production manager in laying out the season's plantings.
- Work with ground prep supervisor on learning irrigation system installation and management, land prep, planting, fertilization and pesticide applications, pruning and harvesting.
- Work with ranch manager to maximize efficiency and performance in all cultural labor operations.
- Work with ranch manager to maximize harvest packaging potential, as well as harvest labor efficiencies.
- Other learning objectives as assigned.

QUALIFICATIONS:

- In Progress of completing a Bachelors of Science degree in Crop Science, Soil Science, Agricultural Science or other related field.
- Familiar with production agriculture
- Proficient in Excel and Word
- Strong communication skills and mathematical skills
- Ability to understand and speak English and Spanish language
